

# Sample HPE7-J02 Questions Pdf - New HPE7-J02 Test Notes

2026 Latest PremiumVCEDump HPE7-J02 PDF Dumps and HPE7-J02 Exam Engine Free Share: <https://drive.google.com/open?id=18ZHNzwHx4QmxyB1AUBu9CKzrFSqOdr4>

Our HPE7-J02 exam questions are totally revised and updated according to the changes in the syllabus and the latest developments in theory and practice. We carefully prepare the HPE7-J02 test guide for the purpose of providing high-quality products. All the revision and updating of products can graduate the accurate information about the HPE7-J02 Guide Torrent you will get, let the large majority of student be easy to master and simplify the content of important information. Our product HPE7-J02 test guide delivers more important information with fewer questions and answers.

HP HPE7-J02 actual test question is a good choice. The HP HPE7-J02 PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual HP HPE7-J02 exam questions and answers. The PDF is also printable so you can conveniently have a hard copy of HP HPE7-J02 Dumps with you on occasions when you have spare time for quick revision. The PDF is easily downloadable from our website and also has a free demo version available.

## 2026 Useful 100% Free HPE7-J02 – 100% Free Sample Questions Pdf | New HPE7-J02 Test Notes

Aspiring HP professionals strive to excel in HP HPE7-J02 exams such as the Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) to achieve their dream careers. However, passing the HPE7-J02 Exam can be challenging, especially with a demanding schedule that leaves little time for preparation.

### HP HPE7-J02 Exam Syllabus Topics:

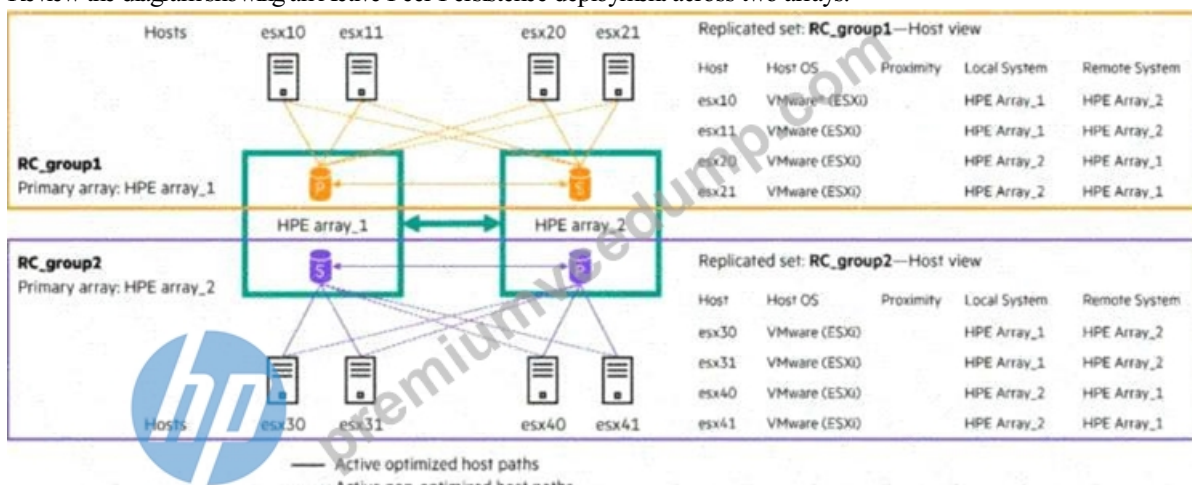

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Planning and Validating Storage Solutions:</b> This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Optimizing the Customer’s Environment:</b> This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Advanced Troubleshooting and Prevention:</b> This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.</li> </ul>

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Review the diagram showing an Active Peer Persistence deployment across two arrays.

Question: Which Host Proximity Parameter should be configured for ESX31 to ensure localized access?

- A. All
- B. Exclusive
- C. Primary
- D. Secondary

Answer: D

### NEW QUESTION # 42

Refer to the exhibit.

Qty	Part Number	Description
1	S1R06A	HPE GL Block STG MP Base Clstr Config
1	R7C75A	HPE Alletra STG MP 2U Chassis
4	R7C76A	HPE Alletra STG MP C14 1600W AC PS
2	R9R52A	HPE C13 - C14 250V Blk 1.4m WW Pwr Cord
2	R9S00A	HPE C13 - C14 250V Gry 1.4m WW Pwr Cord
2	R7D02A	HPE Alletra STG MP 16c Cluster Blk Node
6	S2A68A	HPE Alletra STG MP 100GbE 2p OCP
12	R9F76A	Aruba 100G QSFP28 to QSFP28 2m AOC
2	S2S64A	HPE Alletra STG MP 32Gb 4p FC HBA
2	S1R08A	HPE Alletra STG MP 32p 100GbE Swch Blk
2	S3L68A	HPE C13 - C14 250V Blk 2m WW Pwr Cord
2	S3L69A	HPE C13 - C14 250V Gry 2m WW Pwr Cord
1	S0A95A	HPE Switch Pair Install Kit
1	S1J10A	HPE AL STG MP NVMe CTO Block Shelf
2	S1R28A	HPE Alletra STG MP Block Exp Shelf Node
24	R9H67A	HPE Alletra STG MP 3.84TB NVMe SED SSD
1	S0A98A	HPE SED LTU
1	S3Q00A	HPE GreenLake for Block Storage MP OS per TB 3-year LTU
92	S3Q00AAE	HPE GreenLake for Block Storage MP OS per TB 3-year Software and Support SaaS

Your customer had an unexpected failure of their current storage array, causing them to lose some of their critical data. As a result, they are looking for a storage array with a guarantee of 100% data availability to prevent this failure and loss in the future. They need 80TB raw and two new 25GbE top-of-rack switches to connect to their environment. They expect 5% annual growth. Which correction should be made to the configuration in the exhibit to meet the customer's requirements?

- A. Change to 25G networking
- B. Add 2× Aruba 8325 switches
- C. Decrease to 20 × 3.84TB drives
- D. HPE GreenLake financial model

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The exhibit shows the use of 32Gb FC HBAs and 100GbE switches (Aruba 100G). However, the customer specifically requires 25GbE top-of-rack switches. Therefore, the configuration needs to be corrected to 25GbE networking. The HPE Alletra MP B10000 guarantees 100% data availability SLA, so the primary correction is networking alignment, not drives or financial model.

Distractors:

B: Reducing drives reduces raw capacity below 80TB requirement.

C: GreenLake is a consumption model but not the technical correction required.

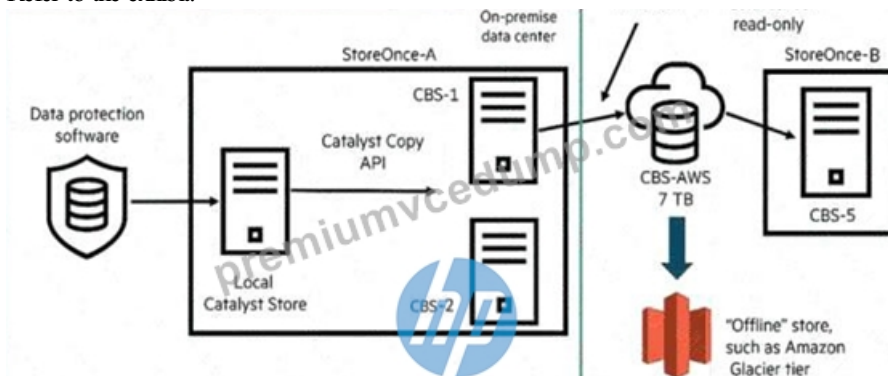

D: Aruba 8325 is a core switch option; customer only asked for ToR 25GbE.

Key Concept: Networking alignment with requirements.

Reference: HPE Alletra MP Ordering and Configuration Guide.

### NEW QUESTION # 43

Refer to the exhibit.

A junior engineer is expanding a StoreOnce deployment for a law firm with a hybrid environment. The customer already has Veeam backing up to StoreOnce 3660 Gen 4 at both primary and secondary sites. They want to add Cloud Bank Storage (CBS) to archive into AWS Glacier tier for compliance. The junior engineer has added Cloud Bank licenses for the 80TB onsite capacity at the primary office.

Question: What does the junior engineer need to add to enable this scenario?

- A. Cloud Bank Storage for AWS Glacier
- B. Catalyst License for StoreOnce-B
- **C. Detach License on StoreOnce-A**
- D. Federated Management

Answer: C

#### NEW QUESTION # 44

The storage solution based on the exhibit is deployed at a customer site.

How can the sequential read performance values be enhanced for this configuration?

- A. By replacing 10/25 Gb with a 32 Gb FC HBA
- B. By adding another expansion shelf
- **C. By increasing the amount of 10/25 Gb NICs**
- D. By adding SCM to the solution

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The exhibit shows a system delivering ~2.3 GB/s sequential read. For large-block sequential workloads, aggregate host link bandwidth (number × speed of front-end ports) is the primary limiter. Increasing the count of 10/25 Gb iSCSI NICs adds parallel lanes, raising sustained read GB/s to the hosts. This is a recommended first step in HPE sizing before changing protocols.

Analysis of Incorrect Options (Distractors):

A: Adding an expansion shelf increases capacity, not front-end bandwidth.

C: Moving to 32 Gb FC can help, but simply adding more existing 10/25 Gb ports achieves the same goal without a protocol/adaptor change and is the straightforward, supported scale-out path.

D: SCM (Storage Class Memory) targets latency/IOPS; it doesn't materially lift sequential GB/s if the link budget is the bottleneck.

Key Concept: Scale front-end connectivity to increase sequential throughput; capacity or media class changes won't fix a link-limited system.

Reference: HPE Alletra 6000/MP Sizing and Host Connectivity Guidelines (throughput scaling via additional host ports).

#### NEW QUESTION # 45

Your customer is deploying HPE Morpheus Enterprise Software as a single orchestration platform for compute and storage resources. To achieve a high-availability deployment in a single site, how many VMs must be deployed if distributed databases are not required?
