## Free PDF Adobe - AD0-E725 –The Best Reliable Test Pass4sure

The latest Adobe Commerce Developer Expert AD0-E725 exam and exam study guide is reliable, Adobe Commerce Developer Expert AD0-E725 with reasonable exam price and guaranteed questions answers. Adobe offers actual Adobe Commerce Developer Expert to sure your success in AD0-E725 Exam. Don't worry, this Adobe Commerce Developer Expert AD0-E725 test price is benefit and content is 365 days updates!

## Adobe Commerce Developer Expert Sample Questions (Q43-Q48):

### NEW QUESTION # 43

A third-party company wants to integrate into Adobe Commerce by using webhooks; they would like to emulate the webhook endpoint. As part of this process, they will send payload data to a Developer for testing. What format should the payload be as part of the webhook test command?

- A. Plain text
- **B. JSON**
- C. XML

**Answer: B**

### NEW QUESTION # 44

A client wants to calculate tax differently when an order is billed for a range of particular postcodes. They want to implement their own system instead of using a third-party system. The Developer is asked to assist in this task by creating a conditional webhook. What must be done to achieve this?

- A. Create an after plugin on the webhook class and check for a list of postcodes at the time of processing and return true for certain postcodes.
- **B. Create a webhooks.xml file and add the rules wanted in the form of a rule node element using the regex operator to catch a range of postcodes.**
- C. Implement a new webhook with a list of postcodes and link it to the original webhook, then advise the client to monitor for the new webhook instead.

**Answer: B**

Explanation:

Webhooks in Adobe Commerce can be customized using webhooks.xml, where rules can be defined with conditions, including regex-based filtering. This allows the developer to configure postcodes that trigger specific webhook behavior.

A is not correct: modifying core webhook logic via plugin is not the recommended approach.

C is incorrect: duplicating webhooks is unnecessary when rules can be defined declaratively.

B is correct: webhooks.xml with rule conditions provides the proper solution.

Adobe Commerce DevDocs - Webhooks configuration

#### NEW QUESTION # 45

A Developer working on a Magento 2 store needs to modify the Content Security Policy (CSP) to allow loading of images from a trusted external domain while maintaining strict policies for other resources. To accomplish this, the csp\_whitelist.xml file must be updated.

Which code snippet should the Developer use to update the CSP configuration?

- A. XML

```
<policies>
<policy id="img-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
```
- B. XML

```
<policies>
<policy id="default-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
```
- C. XML

```
<csp>
<policies>
<policy id="media-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
</csp>
```

**Answer: A**

#### NEW QUESTION # 46

An Adobe Commerce Developer is tasked with configuring a custom module to allow for different behaviors of a core class without altering the original class code.

How should the Developer achieve this flexibility by leveraging Magento's dependency injection system?

- A. Use constructor arguments in the di.xml file.
- B. Use a transient object in the di.xml file.
- C. Use virtual types in the di.xml file.

**Answer: C**

#### NEW QUESTION # 47

A Developer is working on an Adobe Commerce store, and the security team has flagged certain inline scripts in the store as vulnerable to potential attacks. The Developer decides to implement Content Security Policies (CSP) to secure the store's environment.

What will the Developer achieve by taking this action?

- A. Prevent users from accessing certain areas of the website based on their IP address.
- **B. Restrict which resources (scripts, styles, images) are allowed to load on the website.**
- C. Ensure that all user input is sanitized before being processed by the application.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation (with official references):

The correct answer is C. Restrict which resources (scripts, styles, images) are allowed to load on the website.

Adobe Commerce supports Content Security Policy (CSP), a browser-level security feature that mitigates certain types of attacks such as Cross-Site Scripting (XSS) and data injection attacks.

By defining a CSP in Adobe Commerce, developers can control:

- \* Which scripts can be executed (script-src).
- \* Which stylesheets can be applied (style-src).
- \* Which images and media can be loaded (img-src, media-src).
- \* Whether inline scripts or styles are allowed.

This does not sanitize user input (A) nor restrict user access based on IP addresses (B). Instead, it focuses on restricting the sources of content that the browser can load.

Official Documentation Extracts:

\* "Content Security Policy (CSP) is an added layer of security that helps to detect and mitigate certain types of attacks, including Cross-Site Scripting (XSS) and data injection attacks. CSP works by restricting the sources from which content can be loaded."

Adobe Commerce DevDocs: Content Security Policy

\* "A CSP allows developers to define approved sources of content that browsers can load. These policies help reduce the risk of malicious content injection in Magento storefronts."- Adobe Commerce Security Guide

## NEW QUESTION # 48

.....

With AD0-E725 test training materials of Prep4sures, you will own the key to pass AD0-E725 exam, which will make you develop better in IT. All of this just need you trust us, trust in Prep4sures, and trust in AD0-E725 test training materials. Our training material of AD0-E725 exam is absolutely real and reliable. What's more, the passing rate of AD0-E725 test is as high as 100%.
