We have a special technical customer service staff to solve all kinds of consumers' problems.

## Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q23-Q28):

### NEW QUESTION # 23
Your customer has a requirement to allow adjustment and reversals for transactions imported from an external expense entry system. Which section on the Manage Project Transaction Sources page will allow you to enable these options?

- A. Documents
- B. Transaction Entries
- C. Transaction Source
- D. Document Entries

**Answer: D**

Explanation:
The section on the Manage Project Transaction Sources page that will allow you to enable these options is Document Entries. This section allows you to define the attributes and options for each document entry type that is associated with a transaction source. A document entry type represents a group of transactions that have similar characteristics and processing rules. For example, you can define a document entry type for expense reports and enable adjustment and reversal options for this document entry type. The Documents section allows you to define the attributes and options for each document type that is associated with a transaction source. A document type represents a source document that contains one or more transactions. For example, you can define a document type for expense reports and enable validation and transfer options for this document type. The Transaction Source section allows you to define the attributes and options for each transaction source that is used to import transactions from an external system. A transaction source represents a system or application that provides transactions to Oracle Fusion Project Costing. For example, you can define a transaction source for expense reports and enable costing and accounting options for this transaction source. The Transaction Entries section allows you to review and manage the transactions that are imported from an external system using a transaction source. You can view, edit, adjust, reverse, validate, and transfer transactions in this section. ### NEW QUESTION # 24
Your customer complains that their project resources do not report their time promptly, which has resulted in incorrect reporting of project performance. What should you do to fix this problem? (Choose the best answer.)

- A. Enable track missing time at project template.
- B. Enable track missing time at project unit.
- C. Enable track missing time at business unit.
- D. Enable track missing time at project type.

**Answer: B**

Explanation:
To fix the problem of project resources not reporting their time promptly, you should enable track missing time at project unit. This option allows you to track and report on missing time entries for project resources based on their work assignments and schedules.

You can also set up notifications and reminders to prompt resources to enter their time on a regular basis. Reference: https://docs.oracle.com/en/cloud/saas/project- portfolio-management/20c/oapfm/manage-project-time-and-labor.html#OAPFM2356011

**NEW QUESTION # 25**
While opening an organization tree on the Manage Organization Trees page, you notice that the hierarchy status is displayed as Inactive. Identify the two reasons for the organization tree to be in Inactive status. ( Choose two.)

- A. You used View Tree Version in the action menu.
- B. You used Create Tree Version in the action menu.
- C. You opened the hierarchy by clicking the name.
- D. You selected the Edit icon for opening the hierarchy.
- E. You used Create Tree in the action menu.

**Answer: B,E**

Explanation:
When you use Create Tree or Create Tree Version in the action menu, you create a new organization tree or a new version of an existing tree, respectively. These actions result in an Inactive status for the organization tree, until you activate it. When you use View Tree Version or select the Edit icon or click the name of the tree, you open an existing organization tree that has an Active status. **NEW QUESTION # 26**
Which three tools are available for accessing REST APIs?

- A. Programming Language
- B. cURL
- C. Oracle Transactional Business Intelligence
- D. Web Browser

**Answer: A,B,D**

Explanation:
Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/18b/fapap/Use_cURL.html
REST API = REpresentational State Transfer (REST) Application Programing Interface (API)

**NEW QUESTION # 27**
Green House Corporation has decided to enable the budgetary control feature for their projects. At which two levels will they be able to enter the amounts in the budget versions for these projects?
(Choose two.)

- A. Project
- B. Expenditure Type
- C. Top resource
- D. Task
- E. Expenditure Category

**Answer: A,D**

Explanation:
Budgetary control is a feature that allows you to monitor and control project costs against approved budgets.
You can enter the amounts in the budget versions for these projects at two levels: Task and Project. These levels correspond to the budgetary control levels that are defined for the project type. You can also view and compare the budget amounts and actual costs at these levels using reports and dashboards. Expenditure Type, Top Resource, and Expenditure Category are not levels at which you can enter the amounts in the budget versions for these projects. These are attributes that can be used to group and filter the budget and actual amounts for reporting purposes.
