NEW QUESTION # 130
A consultant is building an agent console for an insurance company using FlexCards to provide a 360-degree view of its customers. An Integration Procedure will be used to retrieve Account, Opportunity, and Contract dat a. The agent wants the following information displayed:
* Account information including account name, phone, and website
* Active opportunities related to the Account
* Active insurance policies related to the Account
* The ability to view and renew policies
How should the consultant design the FlexCards to meet these requirements?

- A. Parent FlexCard with single Child and multiple Card States
- B. Parent FlexCard with multiple Cnrraren and different Card States
- C. Parent FlexCard with single Child and Card Actions
- D. Parent FlexCard with multiple Q**jld Flex Cards and Card Actions

Answer: D

Explanation:
The consultant should design the FlexCards as follows to meet the requirements:
Parent FlexCard with multiple Child Flex Cards and Card Actions. A Parent FlexCard is a construct in Financial Services Cloud that allows you to display information from one record in a card-like format on a Lightning page. A Child FlexCard is a construct in Financial Services Cloud that allows you to display information from related records in a card-like format within a Parent FlexCard. A Card Action is a construct in Financial Services Cloud that allows you to perform actions on a record from within a FlexCard, such as edit, delete, renew, or view details. You can use Parent FlexCards, Child FlexCards, and Card Actions to create an agent console that provides a 360-degree view of your customers and enables quick actions on their records. NEW QUESTION # 131
An insurance company aims to improve a call center's productivity. A detailed analysis discovered that agents spend a lot of time capturing data while adding and updating beneficiary details. Capturing premium payment details (payment date and frequency) is another time-consuming task. Which action should a Financial Services Cloud consultant take to resolve the issue?

- A. Create an Action Plan Template for capturing beneficiary data and payment information.
- B. Install an Insurance Data AppExchange package.
- C. Utilize Insurance Flow Templates.
- D. Provide a better user interface by building Lightning web components for beneficiary data and payment information.

Answer: C

Explanation:
Explanation
A Financial Services Cloud consultant can suggest utilizing Insurance Flow Templates to resolve the issue of improving the call center's productivity and reducing the time spent on capturing data for beneficiary details and premium payment details. Insurance Flow Templates are prebuilt flow templates that guide users through the steps of creating or updating insurance policies and beneficiaries in Financial Services Cloud. The templates can be customized to suit the specific needs and requirements of the insurance company. By using Insurance Flow Templates, the call center agents can streamline their data entry process and provide better service to their customers.
