C-SEC-2405 Quizfragen Und Antworten & C-SEC-2405 Praxisprüfung

Die Schulungsunterlagen zur SAP C-SEC-2405 Zertifizierungsprüfung aus unserem Zertpruefung kann Ihren Traum - die C-SEC-2405 Prüfung bestehen - verwirklichen, denn sie alle Dinge für den Durchlauf der SAP C-SEC-2405 Zertifizierungsprüfung enthalten. Wählen Sie Zertpruefung, können sie bestimmt die SAP C-SEC-2405 Zertifizierungsprüfung bestehen, so werden Sie auch ein Mitglied der Eliten im IT-Bereich. Worauf warten Sie? Bitte beeilen Sie sich!

SAP C-SEC-2405 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Thema 2	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.

Thema 3	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Thema 4	• Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Thema 5	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

SAP Certified Associate - Security Administrator C-SEC-2405

Prüfungsfragen mit Lösungen (Q14-Q19):

14. Frage

In SAP S/4HANA Cloud Public Edition, what does the ID of an SAP-predefined Space refer to?

- A. The business roles it is to be assigned to
- B. The SAP Fiori applications it was defined for
- C. The software release it was created for
- D. The business area it was designed for

Antwort: D

Begründung:

* Context: SAP-predefined spaces in S/4HANA Cloud are aligned with specific business functions to streamline access and usability.

* Solution Explanation:

* The ID of an SAP-predefined Space corresponds to the business area it supports, ensuring alignment with functional requirements.

SAP Security References:

* SAP Fiori Launchpad Space Management Documentation

* SAP Help Portal for Space Configuration

15. Frage

Which optional components can be included when transporting a role definition from the development system to the quality assurance system? Note: There are 3 correct answers to this question.

- A. Generated profiles of dependent roles
- B. Generated profiles of single roles
- C. Direct user assignments
- D. Personalization data
- E. Indirect user assignments

Antwort: A,B,E

16. Frage

In the administration console of the Cloud Identity Services, which system property types can you add? Note: There are 2 correct answers to this question.

- A. Credential
- B. Default
- C. Standard
- D. Internal

Antwort: A,C

Begründung:

In the administration console of SAP Cloud Identity Services, administrators can add system property types to configure system behavior and integration settings. The Credential property type allows the definition of authentication credentials, such as usernames and passwords, for connecting to external systems or identity providers, ensuring secure communication. The Standard property type is used to configure general system settings, such as URLs, timeouts, or other operational parameters, that are essential for system functionality.

These property types enable flexible and secure management of identity services. Internal and Default are not recognized property types in this context; Internal may refer to system-internal configurations not exposed to administrators, and Default is not a specific property type but rather a concept for preconfigured values. This structure supports robust identity management across SAP's cloud ecosystem.

17. Frage

What use cases are available for a Local Identity Directory? Note: There are 3 correct answers to this question.

- A. S/4HANA use case
- B. Proxy mode
- C. Merging attributes
- D. Hybrid mode
- E. Classic use case

Antwort: A,D,E

Begründung:

* Context: Local Identity Directory supports scenarios where identity management needs flexibility for hybrid systems, specific application integration, or traditional setups.

* Solution Descriptions:

* Hybrid mode: Combines local identity storage with cloud capabilities.

* S/4HANA use case: Specific to SAP S/4HANA integration.

* Classic use case: Refers to traditional on-premise identity management.

SAP Security References:

* SAP Local Identity Directory Documentation

* SAP Identity and Access Management Guidelines

18. Frage

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Business Catalogs
- B. Restrictions
- C. Pages
- D. Business Role Template

Antwort: A

Begründung:

If the "Inherit Spaces in Derived Business Roles" checkbox is not selected in the leading business role, you can still adjust Business Catalogs in the derived business role to refine access or align it with specific user requirements.
