

Up to one year of Free Cisco 350-501 Exam Questions Updates

BTW, DOWNLOAD part of PassTestking 350-501 dumps from Cloud Storage: https://drive.google.com/open?id=1mo3UQPGW1YHdOwrFwStBtp_naDGzJRS

It is well known, to get the general respect of the community needs to be achieved by acquiring knowledge, and a harvest. Society will never welcome lazy people, and luck will never come to those who do not. We must continue to pursue own life value, such as get the test 350-501 Certification, not only to meet what we have now, but also to constantly challenge and try something new and meaningful.

We have a large number of regular customers exceedingly trust our Implementing and Operating Cisco Service Provider Network Core Technologies practice materials for their precise content about the exam. You may previously have thought preparing for the 350-501 practice exam will be full of agony, actually, you can abandon the time-consuming thought from now on. Our practice materials can be understood with precise content for your information, which will remedy your previous faults and wrong thinking of knowledge needed in this exam. As a result, many customers get manifest improvement and lighten their load by using our 350-501 practice materials. Up to now, more than 98 percent of buyers of our practice materials have passed it successfully. 350-501 practice materials can be classified into three versions: the pdf, the software and the app version. So we give emphasis on your goals, and higher quality of our 350-501 practice materials.

100% Pass 350-501 - Implementing and Operating Cisco Service Provider Network Core Technologies Pass-Sure Standard Answers

Inlike other teaching platform, the Implementing and Operating Cisco Service Provider Network Core Technologies study question is outlined the main content of the calendar year examination questions didn't show in front of the user in the form of a long time, but as far as possible with extremely concise prominent text of 350-501 test guide is accurate incisive expression of the proposition of this year's forecast trend, and through the simulation of topic design meticulously. With a minimum number of questions and answers of 350-501 Test Guide to the most important message, to make every user can easily efficient learning, not to increase their extra burden, finally to let the 350-501 exam questions help users quickly to pass the exam.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q117-Q122):

NEW QUESTION # 117

What are two characteristics of MPLS TE tunnels? (Choose two)

- A. They are unidirectional
- B. The headend and tailend routes of the tunnel must have a BGP relationship
- C. They require EIGRP to be running in the core.

- D. They use RSVP to provide bandwidth for the tunnel.
- E. They are run over Ethernet cores only.

Answer: A,D

NEW QUESTION # 118

Refer to the exhibit. An engineer is preparing to implement link aggregation configuration.

Which statement about this configuration is true?

- A. The switch port actively sends packets to negotiate an EtherChannel using PAgP
- B. The switch port passively negotiates an EtherChannel if it receives PAgP packets from a connected peer
- C. The switch port negotiates an EtherChannel if it receives LACP packets from a connected peer
- D. The switch port accepts LACP and PAgP packets from a connected peer and negotiate an EtherChannel using the common EtherChannel mode.

Answer: A

Explanation:

NEW QUESTION # 119

A network engineer must configure a router for Flexible NetFlow IPFIX export. The IP address of the destination server is 172.17.12.1. The source address must be set to the Loopback0 IPv4 address and exported packets must be set to DSCP CS3. The TTL must be 64 and the transport protocol must be set to UDP with destination port 4739. Which configuration must the engineer apply to the router?

- A. configure terminal
flow exporter EXPORTER-1
destination 172.17.12.1
source Loopback0
dscp 3
ttl 64
export-protocol ipfix
end
- B. configure terminal
flow exporter EXPORTER-1
destination 172.17.12.1
source Loopback0
dscp 24
ttl 64
export-protocol netflow-v9
transport udp 4739
end
- C. configure terminal
flow exporter EXPORTER-1
destination 172.17.12.1
source Loopback0
dscp 3
ttl 64
export-protocol netflow-v9
transport udp 4739
end
- D. configure terminal
flow exporter EXPORTER-1
destination 172.17.12.1
source Loopback0
dscp 24
ttl 64

```
export-protocol ipfix
end
```

Answer: D

NEW QUESTION # 120

Refer to the exhibit. The ISP is implementing a new hosting-as-a-service solution for its business customers. Service accessibility must be unique and separate for each customer. The network architect must ensure that multiple paths toward the hosting-as-a-service solution are always available. Basic protection against traffic black-holing on the MPLS network is required in case of link failure. Which two actions must the engineering team perform to meet the requirements? (Choose two.)

- A. Create the hosting-as-a-service VRF on router R4 and configure it with the route target both 65123:88 command.
- **B. Configure the mpls ldp sync command in the MPLS network with the BGP additional-paths receive and additional-paths send options.**
- C. Configure the fast-hello command under the IS-IS routing protocol with the BGP multipath 2 option enabled.
- D. Enable the VRF-Lite feature on router R4 and enable BGP address-family VPNv4.
- **E. Configure the fast-reroute per-prefix command for the IS-IS protocol in the MPLS network and enable the BGP route-reflector feature on R2.**

Answer: B,E

Explanation:

To ensure multiple paths toward the hosting-as-a-service solution and basic protection against traffic black-holing in case of link failure, the engineering team should:

* B. Configure the fast-reroute per-prefix command for the IS-IS protocol in the MPLS network.

This action enables fast reroute, which is a mechanism to quickly switch over to a backup path in case the primary path fails, without waiting for the routing protocol to converge.

* D. Configure the mpls ldp sync command in the MPLS network with the BGP additional-paths receive and additional-paths send options. MPLS LDP (Label Distribution Protocol) synchronization ensures that a label-switched path (LSP) is not used for forwarding traffic until all routers along the path have signaled that they have label information for that LSP. The BGP additional-paths feature allows for the advertisement of multiple paths for the same prefix, providing path diversity and redundancy.

NEW QUESTION # 121

Refer to the exhibit:

Which statement about the status of the neighbor relationship between R1 and R2 is true?

- A. The neighbor relationship is up because R2 is level 1 and level 2 router.
- B. The neighbor relationship is down because the two routers are configured with different area types
- **C. The neighbor relationship is down because the two routers are in the same subnet.**
- D. The neighbor relationship is down because R2 is operating as a Level 1 router and the two routers are in different area

Answer: C

NEW QUESTION # 122

.....

It is not hard to know that 350-501 study materials not only have better quality than any other study materials, but also have better quality. On the one hand, we can guarantee that you will pass the 350-501 exam easily if you learn our 350-501 Study Materials; on the other hand, you will learn a lot of useful knowledge from our 350-501 learning braindump. Are you ready? You can free download the demo of our 350-501 study materials on the web first.

New 350-501 Exam Questions: <https://www.passtesting.com/Cisco/350-501-practice-exam-dumps.html>

Get start your 350-501 online exam preparation materials in a new way with the new latest 350-501 from PassTestking exam engine and the superb latest PassTestking's 350-501 Cisco classroom and 350-501 from PassTestking online practice questions, Cisco 350-501 Standard Answers We are always available for you, We will help you solve problems together, and we treat all matters about the 350-501 exam prep material as assets instead of annoying troubles.
