## COF-C03 test braindumps: SnowPro® Core Certification (COF-C03) & COF-C03 exam dumps materials

If you want to participate in the IT industry's important Snowflake COF-C03 examination, it is necessary to select VCETorrent Snowflake COF-C03 exam training database. Through Snowflake COF-C03 examination certification, you will be get a better guarantee. In your career, at least in the IT industry, your skills and knowledge will get international recognition and acceptance. This is one of the reasons that why lot of people choose Snowflake COF-C03 certification exam. So this exam is increasingly being taken seriously. So this exam is increasingly being taken seriously. VCETorrent Snowflake COF-C03 Exam Training materials can help you achieve your aspirations. VCETorrent Snowflake COF-C03 exam training materials are produced by the experienced IT experts, it is a combination of questions and answers, and no other training materials can be compared. You do not need to attend the expensive training courses. The Snowflake COF-C03 exam training materials of VCETorrent add to your shopping cart please. It is enough to help you to easily pass the exam.

## Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q478-Q483):

### NEW QUESTION # 478

What is a characteristic of a tag associated with a masking policy?

- A. A tag can be dropped after a masking policy is assigned
- **B. A tag can have only one masking policy for each data type.**
- C. A tag can have multiple masking policies with varying data types
- D. A tag can have multiple masking policies for each data type.

**Answer: B**

Explanation:

In Snowflake, a tag can be associated with only one masking policy for each data type. This means that for a given data type, you can define a single masking policy to be applied when a tag is used. Tags and masking policies are part of Snowflake's data classification and governance features, allowing for data masking based on the context defined by the tags.

Snowflake Documentation: Tag-Based Masking Policies

#### NEW QUESTION # 479

What optional properties can a Snowflake user set when creating a virtual warehouse? (Select TWO).

- A. Cache size
- B. Storage size
- C. Resource monitor
- D. Auto-suspend
- E. Default role

**Answer: C,D**

Explanation:

When creating a virtual warehouse in Snowflake, users have the option to set several properties to manage its behavior and resource usage. Two of these optional properties are Auto-suspend and Resource monitor.

Auto-suspend: This property defines the period of inactivity after which the warehouse will automatically suspend. This helps in managing costs by stopping the warehouse when it is not in use.

```
CREATE WAREHOUSE my_warehouse  
WITH WAREHOUSE_SIZE = 'XSMALL'
```

```
AUTO_SUSPEND = 300; -- Auto-suspend after 5 minutes of inactivity
```

Resource monitor: Users can assign a resource monitor to a warehouse to control and limit the amount of credit usage. Resource monitors help in setting quotas and alerts for warehouse usage.

```
CREATE WAREHOUSE my_warehouse  
WITH WAREHOUSE_SIZE = 'XSMALL'  
RESOURCE_MONITOR = 'my_resource_monitor';
```

#### NEW QUESTION # 480

What technique does Snowflake use to limit the number of micro-partitions scanned by each query?

- A. Pruning
- B. Indexing
- C. Map reduce
- D. B-tree

**Answer: A**

Explanation:

Snowflake uses a technique called pruning to limit the number of micro-partitions scanned by each query. Pruning effectively filters out unnecessary micro-partitions based on the query's filter conditions, which can significantly improve query performance by reducing the amount of data scanned.

#### NEW QUESTION # 481

What is the relationship between a Query Profile and a virtual warehouse?

- A. A Query Profile can help users right-size virtual warehouses.
- B. A Query Profile automatically scales the virtual warehouse based on the query complexity.
- C. A Query Profile can help determine the number of virtual warehouses available.
- D. A Query Profile defines the hardware specifications of the virtual warehouse.

**Answer: A**

Explanation:

A Query Profile provides detailed execution information for a query, which can be used to analyze the performance and behavior of queries. This information can help users optimize and right-size their virtual warehouses for better efficiency. References: [COF-C02] SnowPro Core Certification Exam Study Guide

**NEW QUESTION # 482**

Authorization to execute CREATE <object> statements comes only from which role?

- A. Secondary role
- **B. Primary role**
- C. Application role
- D. Database role

**Answer: B**

Explanation:

In Snowflake, the authorization to execute CREATE <object> statements, such as creating tables, views, databases, etc., is determined by the role currently set as the user's primary role. The primary role of a user or session specifies the set of privileges (including creation privileges) that the user has. While users can have multiple roles, only the primary role is used to determine what objects the user can create unless explicitly specified in the session.

**NEW QUESTION # 483**
