ITIL-4-Specialist-High-velocity-IT Testantworten, ITIL-4-Specialist-High-velocity-IT Online Prüfung

ITZert ist eine Website, die Bedürfnisse der Kunden abdecken kann. Diejenigen, die unsere Simulationssoftware zur Peoplecert ITIL-4-Specialist-High-velocity-IT IT-Zertifizierungsprüfung benutzt und die Prüfung bestanden haben, sind unsere Stammgäste geworden. ITZert stellt Ihnen die fortschrittliche Ausbildungstechnik zur Verfügung, die Ihnen beim Bestehen der Peoplecert ITIL-4-Specialist-High-velocity-IT Zertifizierungsprüfung hilft.

Peoplecert ITIL 4 Specialist: High-velocity IT Exam ITIL-4-Specialist-High-velocity-IT Prüfungsfragen mit Lösungen (Q39-Q44):

39. Frage

An investment bank has outsourced its customer care helpline. It is keen to introduce experience metrics into its Service Level Agreements (SLAs) with the service provider for the helpline. It has asked for a re-negotiation of the existing SLA. Which is BEST example of an experience metric that can be included in the SLA?

Antwort:

Begründung:

Customer satisfaction with the helpline

40. Frage

An IT department is working with the organization's marketing team to introduce a new set of analysis tools. Having read articles in the media about these tools, the marketing team has high hopes. Because the tools are being introduced using a phased implementation approach, the representatives of the two teams are struggling to agree on service level targets. How can the 'collaborate and promote visibility' guiding principle be applied to this situation?

- A. By focusing only on technical performance indicators
- B. By being transparent about constraints and managing expectations
- C. By prioritizing the marketing team's expectations over all others
- D. By deferring implementation until all conflicts are resolved

Antwort: B

41. Frage

Which statement about high-velocity IT is CORRECT?

- A. The required velocity should be based on the nature of an organization
- B. Moving to a high-velocity way of working will reduce costs and risks
- C. Levels of utility or warranty might have to be sacrificed for higher velocity

- D. Organizations should assign a high priority to high-velocity transformations

Antwort: A

Begründung:

HVIT is not about moving fast for its own sake. The right velocity depends on context, including the organization's products, services, risk appetite, market demands, and operating model. That makes A the correct statement.

B is incorrect because HVIT does not assume utility or warranty should be sacrificed. In fact, it aims to achieve speed together with reliability and value. C is too absolute; not every organization should prioritize HVIT transformation in the same way. D is also too absolute because changing to high-velocity ways of working does not automatically reduce cost or risk.

So A best reflects the principle that velocity must be appropriate to the organization's context.

42. Frage

At which steps in the customer journey should the approach to authorizing and enabling the user to use service be defined?

Antwort:

Begründung:

Onboard and Co-create

43. Frage

An organization has recently made improvements to how users request new phones, track their arrival and get help setting the phone up.

Which practice has been most affected by these improvements?

Antwort:

Begründung:

Service request Management

44. Frage

.....
