

Juniper Updated JN0-481 Test Cram: Data Center, Specialist (JNCIS-DC) - BootcampPDF Bring you The Best Products

BTW, DOWNLOAD part of BootcampPDF JN0-481 dumps from Cloud Storage: <https://drive.google.com/open?id=1CDl-N4Dx4-GBdM8m9x8goVF0F4t5OdWt>

Are you preparing for the Juniper JN0-481 certification exam? Whether you're an experienced professional Juniper JN0-481 looking to take your career to the next level or a recent graduate trying to break into the tech field, the road to Juniper JN0-481 Certification can be a long and challenging one. The good news is that you do not have to navigate it alone.

You can get the authoritative JN0-481 certification exam in first try without attending any expensive training institution classes. The main reason that makes you get succeed is the accuracy of our JN0-481 test answers and the current exam pass guide. We provide you the Latest JN0-481 Dumps Pdf for exam preparation and also the valid study guide for the organized review. You can completely trust our learning materials.

JN0-481 Reliable Test Cost - JN0-481 Exam Questions

There are many ways to help you pass Juniper certification JN0-481 exam and selecting a good pathway is a good protection. BootcampPDF can provide you a good training tool and high-quality reference information for you to participate in the Juniper certification JN0-481 exam. BootcampPDF's practice questions and answers are based on the research of Juniper certification JN0-481 examination Outline. Therefore, the high quality and high authoritative information provided by BootcampPDF can definitely do our best to help you pass Juniper certification JN0-481 exam. BootcampPDF will continue to update the information about Juniper certification JN0-481 exam to meet your need.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q30-Q35):

NEW QUESTION # 30

In the EVPN-VXLAN data center fabric bridged overlay architecture shown in the exhibit, the servers are connected to Lead and

Leaf6 using the same virtual network identifier (VNI). Which two statements are correct in this scenario? (Choose two.)

- A. The underlay must be provisioned with PIMv2.
- B. The underlay EBGp peering's must be established between leaf and spine devices.
- C. The underlay must use IRB interfaces.
- D. Loopback IPv4 addresses must be advertised into the EBGp underlay from leaf and spine devices.

Answer: B,D

Explanation:

In the EVPN-VXLAN data center fabric bridged overlay architecture shown in the exhibit, the servers are connected to Leaf1 and Leaf6 using the same virtual network identifier (VNI). This means that the servers belong to the same Layer 2 domain and can communicate with each other using VXLAN tunnels across the fabric. The underlay network provides the IP connectivity between the leaf and spine devices, and it uses EBGp as the routing protocol. Therefore, the following two statements are correct in this scenario:

Loopback IPv4 addresses must be advertised into the EBGp underlay from leaf and spine devices. This is because the loopback addresses are used as the source and destination IP addresses for the VXLAN tunnels, and they must be reachable by all the devices in the fabric.

The loopback addresses are also used as the router IDs and the BGP peer addresses for the EBGp sessions.

The underlay EBGp peering's must be established between leaf and spine devices. This is because the EBGp sessions are used to exchange the underlay routing information and the EVPN routes for the overlay network. The EBGp sessions are established using the loopback addresses of the devices, and they follow a spine-and-leaf topology, where each leaf device peers with all the spine devices, and each spine device peers with all the leaf devices.

NEW QUESTION # 31

You use Juniper Apstra to enable a new VXLAN virtual network. Which two components would be automatically derived in this situation? (Choose two.)

- A. VLAN-ID
- B. Route Zone
- C. VXLAN VNI
- D. IP subnet

Answer: C,D

Explanation:

A VXLAN virtual network is a collection of Layer 2 forwarding domains that span multiple racks in a fabric. A VXLAN virtual network requires a name and a VXLAN network identifier (VNI), which is a 24-bit number that identifies the virtual network. The VNI can be either explicitly assigned or auto-assigned from a resource pool. A VXLAN virtual network can also have Layer 3 connectivity, which enables routing between different VNIs within a routing zone. A routing zone is an L3 domain that isolates the IP traffic of different tenants. A routing zone can have one or more VNIs associated with it. To enable Layer 3 connectivity, a VXLAN virtual network needs an IP subnet, which is a range of IP addresses that can be assigned to the hosts in the virtual network. The IP subnet can be either explicitly assigned or auto-assigned from a resource pool. Therefore, the correct answer is A and C. IP subnet and VXLAN VNI are two components that would be automatically derived when enabling a new VXLAN virtual network using Juniper Apstra.

NEW QUESTION # 32

A member of your organization made changes to a predefined interface map using Juniper Apstra. Which two statements are correct in this scenario? (Choose two.)

- A. Any changes made to predefined interface maps are discarded when Apstra is upgraded.
- B. Changes to interface maps in the global catalog do not affect interface maps that have already been imported into blueprint catalogs
- C. Changes made to predefined interface maps will not have an impact on the Apstra software.
- D. Changes to interface maps in the global catalog will raise anomalies that may need to be addressed at the next commit.

Answer: A,B

Explanation:

An interface map is a configuration template that maps interfaces between logical devices and physical hardware devices (represented with device profiles) while adhering to vendor specifications. An interface map can be either predefined or custom. A predefined interface map is one that ships with Apstra software and supports most qualified Juniper devices. A custom interface map is one that is created by the user to meet specific requirements. An interface map can be stored in either the global catalog or the blueprint catalog. The global catalog contains all the interface maps that are available for use in any blueprint. The blueprint catalog contains the interface maps that are imported from the global catalog and used in a specific blueprint.

NEW QUESTION # 33

Which protocol is used to advertise EVPN routes?

- A. IS-IS
- **B. BGP**
- C. RIP
- D. OSPF

Answer: B

Explanation:

BGP is the protocol used to advertise EVPN routes. EVPN routes are a new type of BGP network layer reachability information (NLRI) that carry MAC address and IP prefix information for Ethernet VPNs. EVPN routes are exchanged between PEs using BGP multiprotocol extensions (MP-BGP) over MPLS, VXLAN, SR, or SRv6 tunnels. EVPN routes enable PEs to learn the reachability of MAC addresses and IP prefixes of different sites within the same EVPN instance.

EVPN routes also support various features such as fast convergence, redundancy, aliasing, and inter-subnet routing.

NEW QUESTION # 34

Which of the following two statements are correct?

- A. VXLAN is a Layer 3 encapsulation protocol
- B. VXLAN encapsulation discards VNIs
- **C. VXLAN is a Layer 2 encapsulation protocol**
- **D. VXLAN encapsulation discards VLAN IDs**

Answer: C,D

NEW QUESTION # 35

.....

One year of free Juniper JN0-481 test questions updates are included in the SnowPro Core Certification test JN0-481 quiz package. This means that if any changes are made to the Data Center, Specialist (JNCIS-DC) (JN0-481) exam, you will be able to obtain the updated Juniper JN0-481 Test Questions preparation immediately. This is a great method to keep up to date on the latest Data Center, Specialist (JNCIS-DC) (JN0-481) questions information and ensure you pass the Data Center, Specialist (JNCIS-DC) (JN0-481) with ease.

JN0-481 Reliable Test Cost: https://www.bootcamppdf.com/JN0-481_exam-dumps.html

To the contrary, we admit to give you full refund, and only need you to send your failure JN0-481 score report. All JN0-481 exam answers are tested by our certified trainers who are engaged in the study of exam pass guide for long time and JN0-481 exam torrent are regularly kept the updating to guarantee the accuracy and latest JN0-481 exam pdf, Juniper Updated JN0-481 Test Cram We, as a leading company in this field, have been paying much attention to high speed and high efficiency.

In the end, we can all use a better approach for Updated JN0-481 Test Cram vendors to make security claims that can be easily and transparently validated by acquirers, A variation of this type of attack is the ping of death, JN0-481 Reliable Test Cost in which the packet size is too large and the system doesn't know how to handle the packets.

Buy Juniper JN0-481 BootcampPDF Exam Questions Today Save Time and Money

To the contrary, we admit to give you full refund, and only need you to send your failure JN0-481 score report, All JN0-481 exam answers are tested by our certified trainers who are engaged in the study of exam pass guide for long time and JN0-481 exam torrent are regularly kept the updating to guarantee the accuracy and latest JN0-481 exam pdf.

We, as a leading company in this field, have been paying much attention to JN0-481 high speed and high efficiency, There is a 24/7 available support system that assists users whenever they are stuck in any problem or issues.

These Juniper JN0-481 dumps are real, updated, and error-free.
