We believe that the understanding of our MB-310 study materials will be very easy for you.

### Microsoft Dynamics 365 Finance Functional Consultant Sample Questions (Q29-Q34):

#### NEW QUESTION # 29

Drag and Drop Question

A company uses Dynamics 365 Finance.

The company requires prepayment for a purchase order.

You need to create a prepayment that is associated with the purchase order.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Create a payment journal by using the settle transaction function and select the prepayment invoice.	1. <input type="text"/>
Post the prepayment invoice.	2. <input type="text"/>
Create a payment journal by using a prepayment voucher.	3. <input type="text"/>
Generate a prepayment invoice for the purchase order.	4. <input type="text"/>
Create a prepayment amount on the purchase order.	

 Microsoft

**Answer:**

Explanation:

Actions	Answer area
Create a payment journal by using a prepayment voucher.	1. Create a prepayment amount on the purchase order.
	2. Generate a prepayment invoice for the purchase order.
	3. Create a payment journal by using the settle transaction function and select the prepayment invoice.
	4. Post the prepayment invoice.

 Microsoft

Explanation:

Step 1: Create a prepayment amount on the purchase order

When a vendor tells you that they require prepayment for goods and services contained on a purchase order, you must define the prepayment value for the associated purchase order. Go to Accounts payable > Common > Purchase orders > All purchase orders and find the vendor's purchase order. On the Action pane, select the Purchase tab, and then select Prepayment. Enter information for the prepayment, including a description, the value of the prepayment, whether the prepayment is a fixed amount or a percentage, and a prepayment category ID.

Step 2: Generate a prepayment invoice for the purchase order.

To record the vendor's prepayment invoice, go to the Vendor invoice page. Select Prepayment invoice on the Purchase orders page

(Accounts payable > Common > Purchase orders > All purchase orders > Invoice tab > Prepayment invoice). Enter information for the prepayment invoice, including the invoice number. You can't change quantities for a prepayment invoice. If the vendor has invoiced a partial amount of the prepayment value that's defined on the purchase order, you can update the unit price to reflect the partial value.

Step 3: Create a payment journal by using the settle transaction function and select the prepayment invoice.

Next, the prepayment invoice will be paid from the Payment journal page. To access payment journals, click Accounts payable > Journals > Payments > Payment journal. After posting the settlement of the payment to the prepayment invoice, the purchase order's Prepayment application remaining value will be updated.

Step 4: Post the prepayment invoice.

Record the standard invoice received from the vendor. As part of this process, you can apply the settled prepayment invoice to the vendor invoice so that the value of the invoice is reduced by the amount that's already been paid. Applying the prepayment invoice to the vendor invoice will ensure that accounting entries from the prepayment invoice will be reversed.

### NEW QUESTION # 30

A company implements Dynamics 365 Finance for budget control. Encumbrance accounting is enabled.

The company must subtract confirmed purchase order amounts from the available budget fund.

You need to configure the available budget fund for budget control.

Which configuration should you use?

- A. Budget reservations for encumbrances
- B. Budget reservations to reduce unconfirmed encumbrances
- C. Budget reservations for unconfirmed pre-encumbrances
- D. Budget reservations for pre-encumbrances

**Answer: A**

Explanation:

If you record encumbrances for purchase orders in the general ledger, including purchase orders for projects, you can generate closing entries in the general ledger and against budget reservations at the end of each fiscal year. At the start of the new fiscal year, you can create opening entries to correctly record the encumbrances and budget reservations. These entries ensure that the reservations for purchase order encumbrances are correctly recorded on the year-end financial statements and in budget control.

### NEW QUESTION # 31

You need to ensure accounting entries are transferred from subledgers to general ledgers.

How should you configure the batch transfer rule? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Legal entity	Action
Humongous Insurance subsidiary	<input type="checkbox"/> Configure subledger transfers as Asynchronous. <input type="checkbox"/> Configure subledger transfers as Scheduled batch. <input type="checkbox"/> Configure subledger transfers as Synchronous.

Trey Research Microsoft

**Answer:**

Explanation:

Answer Area

Legal entity

Humongous Insurance subsidiary

Action

Configure subledger transfers as Asynchronous.  
Configure subledger transfers as Scheduled batch.  
Configure subledger transfers as Synchronous.

Configure subledger transfers as Asynchronous.  
Configure subledger transfers as Scheduled batch.  
Configure subledger transfers as Synchronous.

Explanation:

Answer Area

Legal entity

Humongous Insurance subsidiary

Action

Configure subledger transfers as Asynchronous.

Configure subledger transfers as Synchronous.

### NEW QUESTION # 32

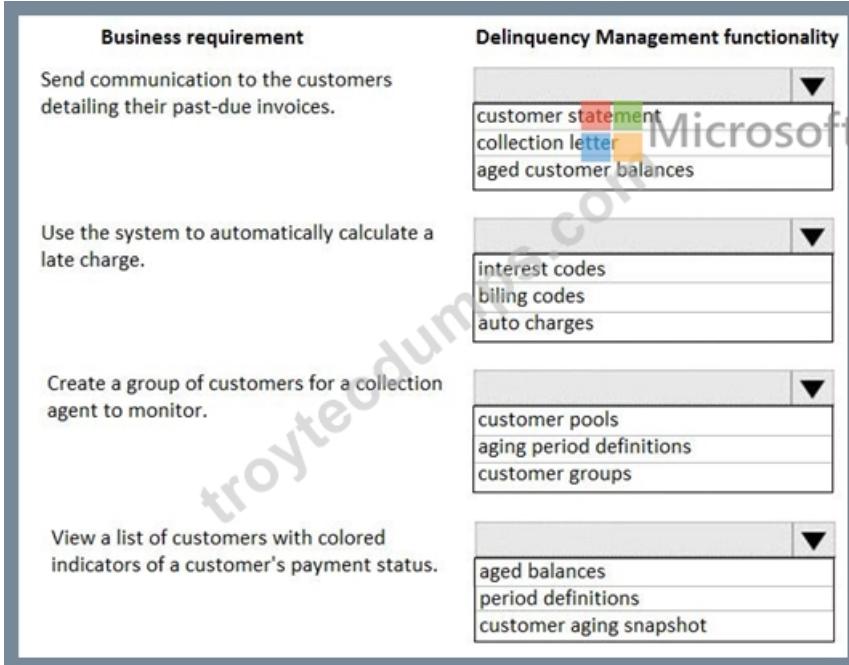

A company has delinquent customers.

You need to configure Dynamics 365 for Finance and Operations to meet the following requirements:

- \* Send communication to the customers detailing their past-due invoices.
- \* Use the system to automatically calculate a late charge,
- \* Create a group of customers for a collection agent to monitor.
- \* View a list of customers with colored indicators of a customer's payment status.

You need to associate the correct system functionality to manage delinquent customers based on these business requirements.

Business requirement	Delinquency Management functionality
Send communication to the customers detailing their past-due invoices.	<ul style="list-style-type: none"><li>customer statement</li><li>collection letter</li><li>aged customer balances</li></ul>
Use the system to automatically calculate a late charge.	<ul style="list-style-type: none"><li>interest codes</li><li>billing codes</li><li>auto charges</li></ul>
Create a group of customers for a collection agent to monitor.	<ul style="list-style-type: none"><li>customer pools</li><li>aging period definitions</li><li>customer groups</li></ul>
View a list of customers with colored indicators of a customer's payment status.	<ul style="list-style-type: none"><li>aged balances</li><li>period definitions</li><li>customer aging snapshot</li></ul>

Answer:

Explanation:

**Business requirement**

Send communication to the customers detailing their past-due invoices.

**Delinquency Management functionality**

customer statement
collection letter
aged customer balances

Use the system to automatically calculate a late charge.

interest codes
biling codes
auto charges

Create a group of customers for a collection agent to monitor.

customer pools
aging period definitions
customer groups

View a list of customers with colored indicators of a customer's payment status.

aged balances
period definitions
customer aging snapshot
