## High Pass-Rate Valid HPE0-J68 Study Notes - Win Your HP Certificate with Top Score

HPE0-J68 materials trends are not always easy to forecast, but they have predictable pattern for them by ten-year experience who often accurately predict points of knowledge occurring in next HPE0-J68 preparation materials. Our professional experts can give you the latest and the most accurate HPE0-J68 Training Material for that they have been in this filed for so many years and know every aspect of the change of HPE0-J68 practice questions. You can trust in our HPE0-J68 learning braindump for sure.

HP HPE0-J68 certification exam is designed for professionals who want to demonstrate their skills in implementing and managing HPE storage solutions. HPE0-J68 exam is one of the most sought-after certifications in the IT industry, as it validates the candidate's expertise in designing, configuring, and troubleshooting HPE storage solutions. The HPE0-J68 Exam is intended for storage administrators, system engineers, and other IT professionals who are responsible for managing storage solutions in their organization.

## HPE Storage Solutions Sample Questions (Q87-Q92):

### NEW QUESTION # 87

Which product can you recommend as a SAN component for refreshing an iSCSI-based SAN that supports wire speed Ethernet, comes in a 1U fabric form with two independent switches, and supports 100GbE.

- A. HPE B-series SN6500B
- B. HPE M-series SN2010M
- C. HPE B-series SN6700B
- D. HPE M-series SN3700cM

**Answer: D**

Explanation:

The HPE M-series SN3700cM is a suitable SAN component for refreshing an iSCSI-based SAN. It supports wire-speed Ethernet, is available in a 1U form factor, and includes two independent switches. Additionally, it supports 100GbE, making it a robust choice for high-performance, scalable SAN environments that require efficient connectivity and high throughput.

### NEW QUESTION # 88

Which storage sizing tool, designed for HPE 3PAR StoreServ, can be used to determine whether customers qualify for the Get Thin Guarantee Program?

- A. NinjaProtected
- B. NinjaStars
- C. NinjaCrawler
- D. StoreVista

**Answer: A**

Explanation:

By performing a free NinjaProtected backup assessment, HPE and its partners can demonstrate how customers can reduce the amount of backup data they need to store by 95%-guaranteed (HPE StoreOnce Get Protected Guarantee Program)

### NEW QUESTION # 89

Your customer has very low deduplication ratio of their Linux VMs farm which is hosted on a HPE Alletra 9000 Which filesystem type could cause this?

- A. EXT3
- B. EXT4
- C. Btrfs
- D. XFS

**Answer: D**

Explanation:

A very low deduplication ratio in a Linux VM farm hosted on an HPE Alletra 9000 could be caused by the use of the XFS filesystem. XFS is known for its performance and scalability but is less effective in environments where deduplication is critical because of its data layout and file handling characteristics. This can lead to reduced deduplication efficiency compared to other filesystems like EXT4 or Btrfs.

For more information, refer to:

HPE Alletra 9000 Documentation

### NEW QUESTION # 90

Your customer currently uses a VMwa re-based Veeam backup proxy. They would like to perform a direct backup from their FC-connected Alletra 9000 array.

What could be the reason for the backup falling back to network mode?

- A. Direct backup from an HPE Alletra 9000 array requires an Advanced Backup LTU
- B. HPE Alletra 9000 storage array WS API connection timeout value must be increased
- C. VM-based backup proxy has not enough RAM and more must be assigned in VM properties
- **D. Direct backup from a FC-connected array is only available on physical server-based backup proxy**

**Answer: D**

### NEW QUESTION # 91

A customer purchased a StoreOnce 3620 earlier in the year and has decided to add a 10GBase-# adapter to it, which the customer sourced elsewhere and installed themselves. They complain that the new adapter is not configurable.

What is the most likely reason for this issue?

- A. Secure boot must be enabled in the BIOS to securely enable HBAs
- B. The StoreOnce needs to connect to InfoSight to validate the adapter authenticity
- C. The StoreOnce software requires updating
- **D. The customer failed to install a License to Use (LTU) for it**

**Answer: D**

Explanation:

The most likely reason the 10GBase-T adapter installed in the StoreOnce 3620 is not configurable is that the customer failed to install a License to Use (LTU) for it (Option C). HPE StoreOnce systems require an LTU for certain hardware components and features. Without the appropriate license, the system will not recognize or allow configuration of the newly installed hardware. Ensuring that the LTU is correctly installed would likely resolve the issue and allow the adapter to be fully operational.
