NEW QUESTION # 294

A retail company is migrating its IT infrastructure applications from on premises to the AWS Cloud. Which costs will the company eliminate with this migration? (Select TWO.)

- A. Cost of network management
- B. Cost of application licensing
- C. Cost of physical server hardware
- D. Cost of data center operations
- E. Cost of marketing campaigns

Answer: C,D

Explanation:

The costs that the company will eliminate with this migration are the cost of application licensing and the cost of physical server hardware. The cost of application licensing is the fee that the company has to pay to use the software applications on its on-premises servers. The cost of physical server hardware is the expense that the company has to incur to purchase, maintain, and upgrade the servers and related equipment. By migrating to the AWS Cloud, the company can avoid these costs by using the AWS services and resources that are already licensed and managed by AWS. For more information, see [Cloud Economics] and [AWS Total Cost of Ownership (TCO) Calculator].

NEW QUESTION # 295

Which AWS service keeps track of SSUTLS certificates, creates new certificates, and processes renewals?

- A. AWS Config

- Answer: B**
