## ISTQB CTAL-TM-001 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>Managing the Team: This section of the exam measures the skills of a Test Lead and addresses the human side of test management. Candidates must demonstrate how to identify the skills required for each project, assess and develop team competence, and apply motivating leadership practices. The syllabus also covers stakeholder relationship management, understanding interests and influence, articulating the business case for testing, and balancing cost?of?quality considerations to ensure testing is properly resourced, communicated, and valued within the wider project.</li></ul>
主題 2	<ul style="list-style-type: none"><li>Managing the Test Activities: This section of the exam measures the skills of a Test Manager and covers the end?to?end coordination of testing work. Candidates must demonstrate how to plan testing—defining objectives, scope, resources, schedule, and risk treatments—then how to monitor progress against those plans, control deviations through corrective actions, and conclude testing with completion reports, archival of testware, and lessons?learned sessions. The syllabus also explores tailoring test activities to project context, applying risk?based testing to focus effort where it matters most, shaping a coherent project test strategy, leading process?improvement initiatives, and selecting and managing test tools throughout their lifecycle.</li></ul>
主題 3	<ul style="list-style-type: none"><li>Managing the Product: This section of the exam measures the skills of a Test Analyst and focuses on the artefacts under test and the metrics that describe them. Examinees show how to define and collect test metrics to monitor quality and progress, estimate effort and resources for different test scopes, and organize defect management workflows that fit sequential, iterative, or hybrid lifecycles. The aim is to ensure test outcomes align with objectives and inform stakeholders through clear reporting, while using estimation techniques and defect data to guide ongoing test and process improvements.</li></ul>

### 最新的 ISTQB Test Manager Advanced CTAL-TM-001 免費考試真題 (Q169-Q174):

#### 問題 #169

Your company just won a contract to create a new sales application and has committed to a very aggressive delivery timeline. Due to the quick turnaround your primary stakeholder wants to be heavily involved in the design and is very anxious to see the outcome. Because of this, your company has decided to use a spiral development approach. You have a defined test policy and typically use an analytical approach to testing, however, this approach will not work with the development approach. What test strategy should be utilized? [3]

- A. Methodical
- B. Model-based
- **C. Reactive**
- D. Standard-compliant

答案： C

#### 解題說明：

A reactive test strategy is a test strategy that uses the actual behavior and results of the software under test to design and execute tests, without prior knowledge or documentation of the software1. A reactive test strategy should be utilized for a project that uses a spiral development approach, which is a type of iterative

/incremental approach that adds risk analysis and prototyping activities to each iteration2. A reactive test strategy is suitable for a spiral development approach because it allows for flexibility, adaptability, and creativity in the testing process, as well as for early feedback, risk reduction, and continuous improvement in the software development process3. Therefore, option D is the correct answer. Option A is incorrect because a model-based test strategy is a test strategy that uses models to represent the desired behavior and structure of the software under test, and to derive test cases, test data, test procedures, and test oracles. A model-based test strategy may not work well with a spiral development approach, as it requires the availability and stability of the models, which may not be the case in a spiral development approach that involves frequent changes and refinements of the software under test. Option B is incorrect because a methodical test strategy is a test strategy that uses predefined test methods, techniques, and procedures to design and execute tests, such as equivalence partitioning, boundary value analysis, or decision table testing. A methodical test strategy may not work well with a spiral development approach, as it requires the availability and stability of the test basis, such as the requirements, specifications, or design documents, which may not be the case in a spiral development approach that involves frequent changes and refinements of the software under test. Option C is incorrect because a standard-compliant test strategy is a test strategy that follows a predefined set of standards, guidelines, or regulations to design and execute tests, such as ISO, IEEE, or CMMI. A standard-compliant test strategy may not work well with a spiral development approach, as it requires the compliance and consistency of the testing process, which may not be the case in a spiral development approach that involves frequent changes and refinements of the software under test. #### 問題 #170

When closing out a defect report, which of the following developer commentaries is most likely to motivate a tester? [1]

- A. Fixed - minor usability issue, wasn't worth the time to fix it
- **B. Fixed - error in build caused compatibility issues**
- C. Rejected - would take too long to fix
- D. Rejected - system is functioning as designed

答案： B

#### 解題說明：

This developer commentary is most likely to motivate a tester because it acknowledges the tester's contribution in finding a defect that affected the product's functionality and compatibility. It also shows that the developer took the defect seriously and fixed it promptly. This commentary demonstrates respect and appreciation for the tester's work and fosters a collaborative relationship between the developer and the tester. 21 inspirational quotes about software testing

#### 問題 #171

Which two items are MOST important for inclusion in your tool selection plan for batch-only performance testing?

- A. A cost-benefit analysis that includes the costs of evaluating and selecting the correct tool
- B. Mitigation of the risk that the vendor's support may become less satisfactory over time
- C. A cost-benefit analysis that includes the costs of recurring licensing and support charges
- D. Estimation of the time that will be needed for each performance test run with the tool
- E. Mitigation of the risk that the tool will not integrate well with the existing tool landscape

答案: A,E

解題說明:

The ISTQB syllabus specifies key principles for tool selection:

\* Compatibility and integration with the current infrastructure are critical for tool success

\* Evaluation and selection costs are a necessary part of cost-benefit analysis Here, B addresses integration risks, which are vital given the existing environment, and E addresses cost considerations related to selection and evaluation, especially crucial when budgets are constrained and open-source tools are considered.

#### 問題 #172

A number of options have been suggested for the level of independence to be employed for the testing on the next project, and are shown below.

- External test specialists perform non-functional testing.
- Testing is outsourced.
- Testing is carried out by the developer.
- 

A separate test team carries out the testing.

v. Testing is performed by the business.

vi. Testing is performed by a different developer.

Which of the following orders the above in a correct order of independence? 1 credit

- A. ii, v, i, iii
- B. i, ii, iv, vi
- C. i, iv, v, vi
- D. ii, i, v, vi

答案: D

#### 問題 #173

IEEE 1028 also defines "management review" as a type of review. What is the main purpose of a management review? 1 credit

- A. Provide independent evaluation of compliance to processes, regulations, standards etc.
- B. To monitor progress, assess the status of a project, and make decisions about future actions
- C. Align technical concepts during the design phase
- D. Establish a common understanding of requirements

答案: B
