

# NCP-DB-6.10 Test Topics Pdf - Mock NCP-DB-6.10 Exams

Nutanix NCP-MCI-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage VM Deployment and Configuration • Analyze and Remediate Performance Issues
Topic 2	• Configure Cluster Networking and Network Security • Deploy and configure a monitoring
Topic 3	• Configure Nutanix Storage Optimization Features • Manage role operations in a Nutanix cluster
Topic 4	• Identify common Nutanix services • Determine steps to use reporting tools • Configure Nutanix alert policies
Topic 5	• Configure, Analyze, and Remediate Alerts and Events • Create a lockable, structured basic cluster alerting
Topic 6	• Develop a lockable, structured anomaly detection events • Configure Nutanix networking components
Topic 7	• Manage incoming infrastructure tools • Manage a tier rules and network tools
Topic 8	• Create, modify, and restore VMs and their components • Configure Nutanix Cloud Server settings

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) v6.5 exam Sample Questions (Q119-Q124):

**NEW QUESTION # 119**  
On a Nutanix cluster, what does Network Segmentation refer to?

- A. Isolating intra cluster traffic from guest VM traffic.
- B. A distributed firewall for security VMs VM traffic.
- C. Physically separating management traffic from guest VM traffic.
- D. Isolating management traffic from storage network traffic.

**Answers: D**

**NEW QUESTION # 120**  
An administrator needs to configure Prism to send encrypted messages to a set of recipients. Which setting is not to be applied?

- A. Install PKI certificates on Prism Central
- B. Set SMTP Security Mode to STARTTLS
- C. Use SMTP Port 25
- D. Configure Prism Central to use Cluster Loadbal

**Answers: B**  
Explanation

CertkingdomPDF is one of the leading best platforms that have been offering valid, verified, and updated Nutanix Exam Questions for many years. Over this long time period, countless NCP-DB-6.10 exam candidates have passed their NCP-DB-6.10 Exam. They all got help from real and valid CertkingdomPDF Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice questions and prepared well for the final Nutanix exam.

It is seen as a challenging task to pass the NCP-DB-6.10 exam. Tests like these demand profound knowledge. The Nutanix NCP-DB-6.10 certification is absolute proof of your talent and ticket to high-paying jobs in a renowned firm. Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 test every year to shortlist applicants who are eligible for the NCP-DB-6.10 exam certificate.

## Mock NCP-DB-6.10 Exams | Valid Study NCP-DB-6.10 Questions

The former customers who bought NCP-DB-6.10 training materials in our company all are impressed by the help as well as our after-sales services. That is true. We offer the most considerate after-sales services on our NCP-DB-6.10 exam questions for you 24/7 with the help of patient staff and employees. They are all professional and enthusiastic to offer help. All the actions on our NCP-DB-6.10 Study Guide aim to mitigate the loss of you and in contrast, help you get the desirable outcome.

## Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q140-Q145):

### NEW QUESTION # 140

An NDB administrator has asked a database administrator to provision a new MongoDB database using an existing software profile. The database administrator is unable to complete this action. What may be the cause?

- A. The software profile is undergoing a patching operation.
- B. The software profile was created by another user.
- C. A database clone operation is in progress.
- **D. The administrator lacks the proper permissions in Prism Element.**

**Answer: D**

Explanation:

If a database administrator is unable to provision a new MongoDB database using an existing software profile, the most likely cause is that the administrator lacks the proper permissions in Prism Element. NDB relies on Prism Element for cluster-level operations (e.g., storage and compute resource allocation). The database administrator needs appropriate Prism Element roles (e.g., Cluster Admin) to interact with the underlying infrastructure, even if the software profile is available in NDB. Without these permissions, the provisioning action will fail.

### NEW QUESTION # 141

What is the purpose of Data Access Management policies in NDB Multi-Cluster?

- A. To perform snapshot operations on a single Nutanix cluster
- B. To remove data accessibility of a time machine across all registered Nutanix clusters in NDB
- **C. To manage time machine data availability across all registered Nutanix clusters in NDB**
- D. To register multiple Nutanix clusters in NDB

**Answer: C**

Explanation:

Data Access Management (DAM) policies are a feature of NDB Multi-Cluster that allows you to control the access and availability of time machine data across different Nutanix clusters. You can use DAM policies to specify which clusters can access the time machine data of a source database, and which clusters can replicate the time machine data for backup or disaster recovery purposes. DAM policies help you to optimize the storage and network resources, as well as ensure the security and compliance of your database workloads. The purpose of DAM policies is not to register multiple Nutanix clusters in NDB, as this is done by using the Add Cluster option in the NDB settings page. The purpose of DAM policies is also not to perform snapshot operations on a single Nutanix cluster, as this is done by using the Time Machine feature in the NDB dashboard. The purpose of DAM policies is also not to remove data accessibility of a time machine across all registered Nutanix clusters in NDB, as this is done by using the Delete option in the Time Machine page.

### NEW QUESTION # 142

Which statement describes what the Time Machine Heal function can be used for?

- A. Refreshes a database clone in Time Machine.
- B. Restores a Time Machine from snapshot in the event of malware.
- **C. Removes gaps in the Time Machine's restore capability.**
- D. Patches a Time Machine to the latest NDB levels.

**Answer: C**

Explanation:

The Time Machine Heal function in NDB is designed to address inconsistencies or gaps in the Time Machine's restore point chain, ensuring a continuous and reliable recovery history. It identifies and repairs missing log backups or snapshots that may have been skipped due to failures (e.g., network issues or agent errors), thereby removing gaps in the restore capability. This function does not patch software, refresh clones, or restore from malware but focuses on maintaining the integrity of the Time Machine's data protection timeline.

#### NEW QUESTION # 143

A clone needs to be created on an existing database server, but there are no Authorized database servers defined to support the cloned database.

In which two ways can Database Server VMs be authorized during a Clone Create operation?

(Choose two.)

- A. During the Clone creation process, click the plus icon to authorize one or more database server VMs.
- B. Within the Database Server VM Summary window, update the database sever to be authorized for supporting cloned databases.
- C. During the database server provisioning process, flag the database server to be authorized for supporting cloned databases.
- D. Within Time Machine, use the Actions menu and Authorize Database Server VMs to identify which database server VMs to authorize for clones.

**Answer: A,D**

Explanation:

When creating a clone on an existing database server but no Authorized database servers are defined to support the cloned database, the administrator must authorize the necessary Database Server VMs. Two valid methods exist within NDB: (1) Using the Time Machine interface, the administrator can navigate to the Actions menu and select "Authorize Database Server VMs" to designate specific VMs for clone support, providing a proactive authorization step. (2) During the Clone creation process, the wizard includes an option (e.g., a plus icon) to authorize one or more database server VMs on the fly, streamlining the process if authorization is needed mid- operation.

#### NEW QUESTION # 144

For which database engine does Era support rolling back a patch using CLI?

- A. Microsoft SQL Server
- B. PostgreSQL
- C. MongoDB
- D. Oracle

**Answer: D**

Explanation:

Nutanix Era supports a variety of database engines, including Oracle, PostgreSQL, MySQL, and Microsoft SQL Server. However, when it comes to rolling back a patch using the Command Line Interface (CLI), this feature is specifically supported for the Oracle database engine. This allows for efficient validation of critical database updates and simplifies database rollback. Please note that while Era does provide support for other database engines, the ability to rollback a patch using CLI is currently specific to Oracle.

#### NEW QUESTION # 145

.....

As the development of the science and technology is fast, so the information of the NCP-DB-6.10 exam materials changes fast accordingly. The updated version of the NCP-DB-6.10 study guide will be different from the old version. Some details will be perfected and the system will be updated. You will enjoy learning on our NCP-DB-6.10 Exam Questions for its wonderful and latest design with the latest technologies applied.

**Mock NCP-DB-6.10 Exams:** <https://www.certkingdompdf.com/NCP-DB-6.10-latest-certkingdom-dumps.html>

CertkingdomPDF Mock NCP-DB-6.10 Exams CertkingdomPDF Mock NCP-DB-6.10 Exams offer savings off the combined list price of various product combinations, including CertkingdomPDF Mock NCP-DB-6.10 Exams-Max practice exam products related to specific vendors, Nutanix NCP-DB-6.10 Test Topics Pdf Our professional team pays a great attention to the exam updates and they always upgrade the content accordingly, Nutanix NCP-DB-6.10 Test Topics Pdf Besides, you can do marks where possible, so as to review and remember next time.

Your success in NCP-DB-6.10 exam.dumps is our sole target and we develop all our braindumps NCP-DB-6.10 braindumps in a way that facilitates the attainment of this target.

After you have the CD, make sure that your NCP-DB-6.10 Actual Dump system is configured to boot from CD, CertkingdomPDF offer savings off the combined list price of various product combinations, **NCP-DB-6.10 Test Topics Pdf** including CertkingdomPDF-Max practice exam products related to specific vendors.

## Free PDF Quiz 2026 Nutanix NCP-DB-6.10: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Authoritative Test Topics Pdf

Our professional team pays a great attention to the exam updates and NCP-DB-6.10 they always upgrade the content accordingly, Besides, you can do marks where possible, so as to review and remember next time.

However, according to survey's results and former NCP-DB-6.10 Test Topics Pdf candidates, we realized the worries of them and difficulties of passing exam smoothly, The names of these formats are NCP-DB-6.10 PDF dumps file, desktop practice test software, and web-based practice test software.
