SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition 認定 C-S4CPB-2508 試験問題 (Q44-Q49):

質問 # 44

Which of the following is SAP's recommended Human Capital Management system (HCCM)?

- A. SAP SuccessFactors
- B. SAP Ariba
- C. SAP Fieldglass
- D. SAP Concur

正解: A

質問 # 45

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Guidance and simulation of the migration process
- B. Combining the local and remote schema approaches into one migration project
- C. Extensibility using the Legacy System Migration Workbench
- D. Mapping source values to SAP S/4HANA target values

正解: A、D

解説:

The SAP S/4HANA Migration Cockpit is a tool that facilitates the transfer of business data from a source system to SAP S/4HANA. It uses migration objects to identify and transfer the relevant data for a specific business object. The SAP S/4HANA Migration Cockpit has the following characteristics 1:

* It allows mapping source values to SAP S/4HANA target values, as well as converting values that are migrated from source fields to target fields. This ensures data consistency and quality in the target system.

* It provides guidance and simulation of the migration process, as well as error handling and monitoring.

This helps to reduce the complexity and risk of data migration, and to ensure a smooth and successful data transfer.

* It does not support extensibility using the Legacy System Migration Workbench (LSMW), which is a tool for data migration from legacy systems to SAP systems. The SAP S/4HANA Migration Cockpit has its own extensibility framework, the SAP S/4HANA Migration Object Modeler, which allows creating and enhancing migration objects 2.

* It does not combine the local and remote schema approaches into one migration project. The SAP S

/4HANA Migration Cockpit offers three options for transferring data to SAP S/4HANA: using files, using staging tables, or using direct transfer from an SAP system 1. Each option requires a separate migration project and has its own advantages and limitations 3.

質問 # 46

If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. SAP HANA Cloud
- B. SAP Cloud Portal Service
- C. SAP Business Application Studio
- D. SAP Build

正解: C、D

質問 # 47

In the Organizational Structure app in SAP Central Business Configuration, which of the following entities can be added under the Company root node? Note: There are 2 correct answers to this question.

- A. Purchasing Organization
- B. Plant
- C. Sales Organization
- D. Division

正解: A、C

解説:

In the Organizational Structure app within SAP Central Business Configuration, the structure of an organization is defined by specifying various entities that reflect the business's operational and functional areas. Under the Company root node, entities such as Sales Organization and Purchasing Organization can be added:

* Sales Organization: This entity is responsible for the distribution and sale of goods and services. It defines the scope of sales activities, including customer negotiations, sales orders, and distribution.

Adding a Sales Organization under the Company root node allows for the management and configuration of sales-related processes within SAP S/4HANA Cloud Public Edition.

* Purchasing Organization: This entity manages procurement activities, including the negotiation of purchasing conditions, ordering, and the receipt of goods. By adding a Purchasing Organization under the Company root node, the system can handle procurement processes, vendor relationships, and purchasing analytics.

These entities are crucial for defining how the organization operates within the SAP S/4HANA Cloud Public Edition environment, facilitating the alignment of the software's functionality with the company's business processes.

質問 # 48

Which of the following actions does the lead configuration expert carry out during content deployment in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Create one workspace
- B. Confirm primary logistics settings
- C. Confirm primary finance settings
- D. Define the scope
- E. Create two workspaces

正解: C、D、E

質問 # 49
