# Pass Guaranteed Quiz Newest F5 - Test F5CAB4 Simulator Fee

Now rest assured that with the F5 F5CAB4 exam questions you will get the updated version of F5CAB4 exam real questions all the time. You have the option to download updated F5 F5CAB4 Exam Questions up to 12 months from the date of F5 F5CAB4 exam questions purchase.

These real and updated F5 F5CAB4 dumps are essential to pass the F5CAB4 exam on the first try. Don't waste further time and money, get real F5 F5CAB4 pdf questions and practice test software, and start F5CAB4 Test Preparation today. BraindumpsIT will also provide you with up to 365 days of free exam questions updates.

F5 F5CAB4 Valid Dumps Free | F5CAB4 Online Exam

Preparing for the F5CAB4 exam can be a daunting task, but with real F5CAB4 exam questions, it can be a lot easier. The importance of actual BIG-IP Administration Control Plane Administration (F5CAB4) questions cannot be overemphasized. F5CAB4 Real Questions are crucial for passing the F5CAB4 exam. When candidates have access to the updated F5 F5CAB4 practice test questions, they are better prepared to succeed.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q46-Q51):

NEW QUESTION # 46
A BIG-IP Administrator makes a configuration change to the BIG-IP device. Which file logs the message regarding the configuration change?

- A. /var/log/audit
- B. /var/log/user.log
- C. /var/log/secure
- D. /var/log/messages

Answer: A

Explanation:
Audit logging is a specialized feature within TMOS designed to track administrative actions. According to F5 documentation, whenever a system object (like a virtual server, pool, or profile) is created, modified, or deleted, the system records the event. These logs are stored specifically in /var/log/audit. This is essential for control plane administration to track "who did what and when" regarding the device configuration.

NEW QUESTION # 47

As an organization grows, more people have to log into the BIG-IP. Instead of adding more local users, the BIG-IP Administrator is asked to configure remote authentication against a central authentication server.

Which two types of remote server can be used here? (Choose two answers)

- A. LDAP
- B. OAUTH
- C. SAML
- D. RADIUS

Answer: A,D

Explanation:

BIG-IP supports remote authentication by integrating with centralized authentication services through its AAA framework. The supported and commonly used remote authentication servers include:

* LDAP (A)Used to authenticate users against directory services such as Active Directory or other LDAP-compliant directories.

* RADIUS (C)Commonly used for centralized authentication, authorization, and accounting, especially in network and security environments.

Why the other options are incorrect:

* OAUTH (B) is an authorization framework, not supported as a direct administrative authentication backend for BIG-IP management access.

* SAML (D) is primarily used for single sign-on (SSO) in application authentication scenarios, not for BIG-IP administrative login authentication.

Thus, the correct remote authentication server types are LDAP and RADIUS.

NEW QUESTION # 48

New Syslog servers have been deployed in an organization. The BIG-IP Administrator must reconfigure the BIG-IP system to send log messages to these servers. In which location in the Configuration Utility can the BIG-IP Administrator make the needed configuration changes to accomplish this?

- A. System > Configuration > Local Traffic
- B. System > Logs > Configuration
- C. System > Configuration > Device3
- D. System > Logs > Audit2

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Managing how a BIG-IP communicates with external management services like Syslog is a core Control Plane task. The Configuration Utility organizes these settings under the "System" menu. Specifically, to define remote logging destinations and formats, the administrator must navigate to System > Logs > Configuration to ensure the Control Plane correctly forwards system events to external collectors

NEW QUESTION # 49

A BIG-IP Administrator makes a configuration change to a Virtual Server on the Standby device of an HA pair. The HA pair is currently configured with Auto-Sync Enabled. What effect will the change have on the HA pair configuration?

- A. The change will take effect when Auto-Sync propagates the config to the HA pair.
- B. The change will be propagated next time a configuration change is made on the Active device.
- C. The change will be undone next time a configuration change is made on the Active device.
- D. The change will be undone when Auto-Sync propagates the config to the HA pair.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administratio24n Control Plane Administration documents: TMOS Device Service Cluste25ring (DSC) allows for configuration changes to be made on any device within a synchronization group. If Auto-Sync is enabled, the Control Plane detects the change on the Standby unit and automatically propagates (pushes) that updated configuration to the other members of the HA pair

NEW QUESTION # 50

Users report that traffic is negatively affected every time a BIG-IP device fails over. The traffic becomes stabilized after a few minutes. What should the BIG-IP Administrator do to reduce the impact of future failovers?

- A. Set up Failover Method to HA Order
- B. Configure MAC Masquerade
- C. Configure a global SNAT Listener
- D. Enable Failover Multicast Configuration

Answer: B

Explanation:
When a failover occurs, the newly active device must inform the surrounding network that it now "owns" the shared IP addresses. Without MAC Masquerade, the new device uses its own hardware MAC, requiring upstream routers to update their ARP tables (which causes a delay). MAC Masquerading allows the HA pair to share a "floating" MAC address, ensuring the Control Plane transition is transparent to the network layer

NEW QUESTION # 51

......

One of the great features of our F5CAB4 training material is our F5CAB4 pdf questions. F5CAB4 exam questions allow you to prepare for the real F5CAB4 exam and will help you with the self-assessment. You can easily pass the F5 F5CAB4 exam by using F5CAB4 dumps pdf. Moreover, you will get all the updated F5CAB4 Questions with verified answers. If you want to prepare yourself for the real BIG-IP Administration Control Plane Administration exam, then it is one of the most important ways to improve your F5CAB4 preparation level. We provide 100% money back guarantee on all F5CAB4 braindumps products.
