H19-308_V4.0 Valid Exam Sims - H19-308_V4.0 Valid Exam Answers

As one of the most professional dealer of practice materials, we have connection with all academic institutions in this line with proficient researchers of the knowledge related with the H19-308_V4.0 Practice Exam to meet your tastes and needs, please feel free to choose. We want to specify all details of various versions. You can decide which one you prefer, when you made your decision and we believe your flaws will be amended and bring you favorable results even create chances with exact and accurate content.

Huawei H19-308_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	• OceanStor Dorado: OceanStor Dorado is Huawei's all-flash storage solution for mission-critical applications demanding ultra-low latency. This platform leverages NVMe technology and intelligent management to accelerate digital transformation.

Topic 2	• Object Storage Basis: Object storage manages data as discrete units with metadata and unique identifiers for efficient retrieval. This scalable architecture suits unstructured data, cloud applications, and big data analytics requiring massive capacity.
Topic 3	• OceanStor Pacific: OceanStor Pacific is Huawei's distributed storage for massive-scale data management and cloud-native applications. It provides scalability, resilience, and performance for big data, AI workloads, and large-scale storage.
Topic 4	• OceanStor New Hybrid Flash Storage: OceanStor Hybrid Flash combines flash and disk storage to balance performance and cost-effectiveness. This architecture optimizes resources by placing performance-sensitive data on flash and capacity-oriented data on disk.
Topic 5	• Data Storage Basis: Data storage is the foundation of IT infrastructure, enabling efficient storage, management, and retrieval of digital information. Understanding storage fundamentals is essential for selecting solutions that meet business performance, capacity, and reliability requirements.
Topic 6	• OceanProtect Backup Storage: OceanProtect offers comprehensive data protection with efficient backup, recovery, and retention features. This solution ensures security through encryption and deduplication while reducing storage costs.
Topic 7	• Backup and Disaster Recovery: Backup and disaster recovery strategies protect organizations from data loss through redundant copies of critical information. Comprehensive backup solutions ensure business continuity and enable rapid recovery to minimize downtime.

Start Huawei H19-308_V4.0 Exam Preparation Today And Get Success

Our H19-308_V4.0 study materials are regarded as the most excellent practice materials by authority. Our company is dedicated to researching, manufacturing, selling and service of the H19-308_V4.0 study materials. Also, we have our own research center and experts team. So our products can quickly meet the new demands of customers. That is why our H19-308_V4.0 Study Materials are popular among candidates. We really take their requirements into account. Perhaps you know nothing about our H19-308_V4.0 study materials. Our free demo will help you know our study materials comprehensively.

Huawei HCSA-Presales-Storage V4.0 Sample Questions (Q147-Q152):

NEW QUESTION # 147
Which statements about OceanStor Dorado reliability are correct?

- A. Disk enclosure failure can be tolerated through redundancy protection.
- B. SAN and NAS HyperMetro solutions are provided.
- C. RAID-TP tolerates the failure of three SSDs. The full-mesh architecture tolerates the failure of seven out of eight controllers.
- D. Global wear leveling and anti-wear leveling are used for SSDs.

Answer: A,B,C,D

Explanation:
OceanStor Dorado provides full-stack reliability, including disk enclosure redundancy, SAN/NAS HyperMetro, advanced SSD protection with global and anti-wear leveling, and high fault tolerance through RAID-TP and the SmartMatrix full-mesh architecture (tolerating three disk failures and seven out of eight controller failures).

NEW QUESTION # 148
Which of the following topologies are supported by Huawei 3DC (Three-Data-Center) DR solution? (Select all that apply)

- A. Cascading network
- B. Parallel network
- C. DR Star network

Answer: A,B,C

Explanation:
Huawei's 3DC (Three-Data-Center) solution is designed for high-level business continuity, typically involving a local HA site and a remote DR site. The documentation supports three main topological configurations to meet different reliability and performance needs:
Cascading Network (Option B): Site A (Production) replicates to Site B (Local DR), and Site B then replicates to Site C (Remote DR). This reduces the pressure on the production site (Site A) as it only manages one replication link.
Parallel Network (Option C): Site A replicates directly to both Site B and Site C simultaneously. This provides better protection for the data at Site C, but increases the load and bandwidth requirements on Site A.
DR Star Network (Option A): This is a specific variant of the multi-site protection architecture used in Huawei's HyperMetro + Remote Replication scenarios. It typically combines an active-active setup between Site A and B with an asynchronous link to Site C, ensuring that even if two sites fail, the third contains a survivable copy of the data.

NEW QUESTION # 149
According to IDC, the global data volume is expected to reach 180 ZB in 2025, 80% of which is unstructured data.

- A. TRUE
- B. FALSE

Answer: A

Explanation:
IDC projects that the global data volume will reach 180 zettabytes (ZB) by 2025, with 80% of this data being unstructured. This reflects the rapid growth of unstructured data generated from sources such as multimedia, social media, IoT devices, and other non-traditional data types.

NEW QUESTION # 150
2200 V3/2600 V3 supports 2 U 2.5-inch disk enclosure, 4 U 3.5-inch disk enclosure, and 4 U high- density disk enclosure.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 151
Which of the following statements about RAID 5 are correct? (Choose all that apply.)

- A. RAID 5 writes data by stripes.
- B. RAID 5 has fixed parity disks.
- C. RAID 5 tolerates the failure of a maximum of two member disks without losing data.
- D. RAID 5 uses the XOR algorithm for parity.

Answer: A,D

NEW QUESTION # 152
......

The H19-308_V4.0 learning materials are of high quality, mainly reflected in the adoption rate. As for our H19-308_V4.0 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our H19-308_V4.0 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our H19-308_V4.0 Quiz guide has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our H19-

308_V4.0 exam question is 99%. So our product is a good choice for you. Choose our H19-308_V4.0 learning materials, you will gain a lot and lay a solid foundation for success.
