DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q63-Q68):

NEW QUESTION # 63

What is the maximum compensation that can be imposed on an organization for negligence in implementing reasonable security practices as defined in Section 43A of ITAA, 2008?

- A. 5 lakhs
- B. Uncapped compensation
- C. 15 crores or 4% of the global turnover
- D. 5 crores

Answer: C

NEW QUESTION # 64

The entire assessment process, from commencement to submission of final report to DSCI must be completed within 2 weeks.

- A. True
- B. False

Answer: A

Explanation:

According to the DSCI Assessment Framework for Privacy (DAF#P), the total duration for completing the assessment, from the initial kickoff to the final report submission to DSCI, must be concluded within a two- week period. This timeline ensures the assessment stays current and reflects the organization's real-time privacy status during certification.

NEW QUESTION # 65

FILL BLANK

RCI and PCM

Given its global operations, the company is exposed to multiple regulations (privacy related) across the globe and needs to comply mostly through contracts for client relationships and directly for business functions. The corporate legal team is responsible for managing the contracts and understanding, interpreting and translating the legal requirements. There is no formal tracking of regulations done. The knowledge about regulations mainly comes through interaction with the client team. In most of the contracts, the clients have simply referred to the applicable legislations without going any further in terms of their applicability and impact on the company. Since business expansion is the priority, the contracts have been signed by the company without fully understanding their applicability and impact. Incidentally, when the privacy initiatives were being rolled out, a major data breach occurred at one of the healthcare clients located in the US. The US state data protection legislation required the client to notify the data breach. During investigations, it emerged that the data breach happened because of some vulnerability in the system owned by the client but managed by the company and the breach actually happened 5 months back and came to notice now. The system was used to maintain medical records of the patients. This vulnerability had been earlier identified by a third party vulnerability assessment of the system and the closure of vulnerability was assigned to the company. The company had made the requisite changes and informed the client. The client, however, was of the view that the changes were actually not made by the company and they therefore violated the terms of contract which stated that - "the company shall deploy appropriate organizational and technology measures for protection of personal information in compliance with the XX state data protection legislation." The company could not produce necessary evidences to prove that the configuration changes were actually made by it (including when these were made).

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and

NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance & Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

Why do you think the company failed to defend itself against client accusations? (250 to 500 words)

Answer:

Explanation:

The company failed to defend itself against accusations by its clients most likely due to the fact that it did not have enough expertise in privacy and data protection. The company's privacy program was designed and implemented by an internal consulting arm which had limited expertise in the domain, causing the program to be inadequate for the purpose of defending itself against accusations. Moreover, since the project was driven by CIO's office, there may have been a lack of coordination between different functions like Corporate Information Security and Legal functions which could also have contributed to the failure.

It is possible that there were gaps in the organizational measures deployed by XYZ as well as gaps in technology measures. For example, it is possible that although appropriate organizational measures were put in place, the technology measures were inadequate for protecting the sensitive data of its clients. In addition, it is possible that the company did not rigorously monitor compliance with these organizational and technological measures, thereby making it vulnerable to accusations by its clients.

It is also likely that XYZ was unable to fully comply with applicable privacy laws and regulations in the EU due to lack of awareness about their requirements as well as insufficient resources allocated for adapting to them. The EU GDPR requires companies to implement appropriate technical and organizational measures for the protection of personal data which could have been a challenge for XYZ given its limited expertise in this domain. Furthermore, even though it may have had some understanding of the legal requirements, there may have been difficulty in properly implementing them, which could have led to the accusations by its clients. Finally, it is possible that XYZ failed to defend itself against client accusations because of a lack of communication between its different departments and functions. The company may not have had a clear understanding of the requirements and risks associated with data protection and privacy compliance which could have caused miscommunication among various stakeholders leading to inadequate responses when it was challenged by its clients.

Overall this case study demonstrates the importance of properly designing and implementing an effective privacy program in order to protect sensitive data from unauthorized access or misuse. Companies should ensure that they have adequate expertise in data protection as well as sufficient resources for adapting to changing regulatory requirements in order to avoid potential legal issues arising from client accusations.

Effective communication and coordination across different departments and functions is also essential for successful data protection compliance.

It is recommended that companies invest in an ongoing training program to ensure that employees understand the importance of privacy, have an awareness of the legal requirements, and are able to properly implement security measures to protect sensitive data. Organizations should also consider implementing automated tools and technologies such as encryption, access control systems, identity management solutions, etc., which can help them better defend themselves against potential client accusations.

NEW QUESTION # 66

Which of the following activities form part of an organization's Visibility over Personal Information (VPI) initiative, according to DSCI Privacy Framework (DPF)?

- A. 'Data processing environment' analysis of the organization and associated third parties
- B. 'Data processing environment' analysis of the organization only
- C. 'Data processing environment' analysis of the country
- D. 'Data processing environment' analysis of industry peers

Answer: A

Explanation:

The VPI practice area in the DPF emphasizes the importance of identifying personal data, understanding its flow, and assessing risks not only within the organization but also across third parties with whom data is shared or processed.

Therefore, analyzing the data processing environment of both the organization and associated third parties is critical to achieving visibility over personal information.

NEW QUESTION # 67

It's mandatory for the assessee to provide the pre-requisites to the assessor organization before commencement of the first phase of assessment.

- A. True
- B. False

Answer: A

Explanation:

According to the DAF#P, the assessment process begins only after the assessee provides required pre- requisites. These may include:

- * Completed self-assessment checklist
- * Documentation on privacy policy, data flows, training records, etc.

This ensures the assessor can effectively plan the assessment and identify areas for further investigation.

NEW QUESTION # 68

.....

In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of DCPLA. Our study tool can meet your needs.
