

# Fantastic F5 F5CAB3: BIG-IP Administration Data Plane Configuration Free Download Pdf - Useful DumpTorrent Study F5CAB3 Materials

P.S. Free & New F5CAB3 dumps are available on Google Drive shared by DumpTorrent: <https://drive.google.com/open?id=1wg5vS3BEe944V-Ujz6Cw-qr1eoD5vAsC>

The F5 F5CAB3 desktop-based practice exam is compatible with Windows-based computers and only requires an internet connection for the first-time license validation. The web-based BIG-IP Administration Data Plane Configuration (F5CAB3) practice test is accessible on any browser without needing to install any separate software. Finally, the BIG-IP Administration Data Plane Configuration (F5CAB3) dumps pdf is easily portable and can be used on smart devices or printed out.

As is known to all, for the candidates who will attend the exam, knowing the latest version is quite significant. Our F5CAB3 training materials are free update for 365 days after purchasing. And the updated version will be sent to your email address automatically by our system. Besides, our F5CAB3 Training Materials are verified by the skilled professionals, and the accuracy and the quality can be guaranteed. By using the F5CAB3 exam dumps of us, you can also improve your efficiency, since it also has knowledge points.

## Study F5CAB3 Materials & F5CAB3 Reliable Study Notes

To ensure your 100% satisfaction, F5CAB3 free demo are available for the certification exam you're going to take before you purchased. All our F5CAB3 dumps collection is quite effectively by millions of people that passed F5CAB3 Real Exam and become professionals in IT filed. You will never regret choosing our F5CAB3 test answers as your practice materials because we will show you the most authoritative study guide.

## F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q11-Q16):

### NEW QUESTION # 11

During a high-demand event, the BIG-IP Administrator needs to limit the number of new connections per second to a Virtual Server. What should be applied?

- **A. Connection Rate Limit**
- B. HTTP Compression profile
- C. OneConnect profile
- D. Connection Limit

**Answer: A**

Explanation:

Connection rate limits restrict how many new connections are accepted per second, protecting application resources.

### NEW QUESTION # 12

A BIG-IP Administrator needs to apply a health monitor for a pool of database servers named DB\_Pool that uses TCP port 1521.

Where should the BIG-IP Administrator apply this monitor?

- A. Local Traffic > Nodes > Default Monitor
- **B. Local Traffic > Pools > DB.Pool > Properties**
- C. Local Traffic > Profiles > Protocol > TCP
- D. Local Traffic > Pools > DB.Pool > Members

**Answer: B**

Explanation:

In BIG-IP configuration, health monitors can be applied at three distinct levels: the node, the pool, or the individual pool member. To ensure that a specific application service—in this case, a database service on port

1521—is functioning correctly for the entire pool, the administrator should apply the monitor at the pool level. Navigating to Local Traffic > Pools > DB.Pool > Properties allows the administrator to select one or more monitors from the "Available" list and move them to the "Active" list.

Applying a monitor at the pool property level ensures that the BIG-IP checks the health of every member assigned to that pool using the same logic. If a database-specific monitor (such as a TCP handshake or an Oracle/SQL check) fails for a specific member, the BIG-IP marks that member as "offline" for that specific pool, preventing new connections from being sent to it. While monitors can be applied to Pool Members (Option D) to give different members unique monitoring logic, it is more administratively efficient to apply it to the pool properties when all servers are expected to behave identically. Applying it to Nodes (Option C) would only verify that the IP address is up (typically via ICMP), which does not guarantee that the database service on port 1521 is actually responding. Finally, Profiles (Option A) are used to define how traffic is handled once it is accepted by a Virtual Server, not for the proactive health checking of backend resources.

Therefore, the pool properties page is the standard location for configuring service-specific availability requirements.

#### NEW QUESTION # 13

A BIG-IP Administrator configures a Virtual Server to load balance traffic between 50 web servers for an e-commerce website. Traffic is being load balanced using the Least Connections (node) method. The web server administrators report that customers are losing the contents from their shopping carts and are unable to complete their orders. What should the BIG-IP Administrator do to resolve the issue?

- A. Change Load Balancing method to Ratio (node)
- **B. Change Default Persistence Profile setting to cookie**
- C. Change Default Persistence Profile setting to sip\_info
- D. Change Load Balancing method to Ratio (member)

**Answer: B**

Explanation:

The issue of "lost shopping carts" in an e-commerce environment is a classic symptom of a missing or improperly configured Persistence Profile. In modern web applications, session data—such as items added to a cart—is often stored locally on the specific web server that initially handled the user's request. If the BIG-IP system load balances a user's subsequent request (like clicking "Checkout") to a different server among the 50 web servers, the new server will not have the session data, and the user will appear to have an empty cart.

While Least Connections (node) is an efficient load balancing algorithm, it makes a new decision for every connection unless persistence is enabled. To resolve this, the administrator must implement a persistence mechanism. HTTP Cookie Persistence (Option A) is the industry standard for web applications. By assigning a cookie persistence profile to the Virtual Server, the BIG-IP inserts a unique cookie into the HTTP response.

When the user's browser returns that cookie in future requests, the BIG-IP identifies the specific server that handled the first request and consistently directs the user back to that same server for the duration of their session.

Sip\_info (Option B) is a persistence method for VOIP traffic and is not applicable to web traffic. Ratio load balancing (Options C and D) merely changes the distribution frequency but still does not guarantee that a specific user will stay on the same server across multiple requests. Therefore, adding a cookie persistence profile is the direct procedural fix to maintain session state and ensure e-commerce functionality.

#### NEW QUESTION # 14

A Standard Virtual Server is configured with SNAT Automap. Backend servers must see the original client IP. What should be configured?

- **A. HTTP profile with X-Forwarded-For**
- B. Performance (HTTP) VS
- C. HTTP Transparent profile
- D. SNAT pool with client IP

**Answer: A**

Explanation:

X-Forwarded-For inserts the original client IP into HTTP headers, preserving client identity while SNAT is enabled.

#### **NEW QUESTION # 15**

Which type of Virtual Server requires the use of a FastL4 profile?

- A. Stateless
- B. Standard
- C. Performance (HTTP)
- **D. Performance (Layer 4)**

**Answer: D**

Explanation:

Performance (Layer 4) virtual servers rely on FastL4 profiles to provide high-speed L4 processing without full proxy overhead.

Below is BATCH 2 (next 10 questions) extracted only from your uploaded document that are clearly related to BIG-IP

Administration: Data Plane Configuration topics.

As requested, I have strictly excluded questions related to:

Licensing

HA / Device Trust / Sync-only

Logging destinations

User roles

Hardware, EUD, support processes

System-only administration

#### **NEW QUESTION # 16**

.....

We are engaging in this line to provide efficient reliable F5CAB3 practice materials which is to help you candidates who are headache for their F5CAB3 exams. They spend a lot of time and spirits on this exam but waste too much exam cost. Our F5CAB3 quiz question torrent can help you half work with double results. Sometimes choice is more important than choice. After purchasing our exam F5CAB3 Training Materials, you will have right ways to master the key knowledge soon and prepare for F5CAB3 exam easily, you will find clearing F5CAB3 exam seems a really easily thing.

**Study F5CAB3 Materials:** <https://www.dumptorrent.com/F5CAB3-braindumps-torrent.html>

F5CAB3 actual exam PDF will be the great helper for your certification, This means you can F5CAB3 practice engine anytime and anyplace for the convenience these three versions bring, These formats are F5 F5CAB3 PDF questions file, desktop practice test software, and web-based practice test software, We believe you can have a good experience with our demos of the F5CAB3 learning guide.

On this tenth anniversary of the Agile Manifesto, we offer this interview F5CAB3 Free Download Pdf with Ward, This book provides you with the knowledge needed to install, configure, and maintain a Cisco IP telephony solution.

## **How to Prepare For F5CAB3 BIG-IP Administration Data Plane Configuration?**

F5CAB3 actual exam PDF will be the great helper for your certification, This means you can F5CAB3 Practice Engine anytime and anyplace for the convenience these three versions bring.

These formats are F5 F5CAB3 PDF questions file, desktop practice test software, and web-based practice test software, We

believe you can have a good experience with our demos of the F5CAB3 learning guide.

Our F5CAB3 study questions in every year are summarized based on the test purpose, every answer is a template, there are subjective and objective exams of two parts, F5CAB3 we have in the corresponding modules for different topic of deliberate practice.
