What's more, part of that PracticeDump FCSS\_SASE\_AD-25 dumps now are free: [https://drive.google.com/open?id=1W38bw2BTBM7nLtlGe36gEVSSrqt4jMJ\\_](https://drive.google.com/open?id=1W38bw2BTBM7nLtlGe36gEVSSrqt4jMJ_)

The beauty of life may be that we don't know what will happen in the future, but even so, we are willing to pursue a bright future. Happiness for us may be the life we want to live, and our FCSS\_SASE\_AD-25 Study Materials can provide a good foundation for you to achieve this goal. A good job requires good skills, and the most intuitive way to measure your ability is how many qualifications you have passed and how many qualifications you have.

Now you need not be worried, if you are run short of time for FCSS\_SASE\_AD-25 exam preparation or your tough work schedule doesn't allow you spare time for studying preparatory guides. Relying on PracticeDump FCSS\_SASE\_AD-25 Dumps will award an easy course to get through the exam and obtain a credential such as FCSS\_SASE\_AD-25 you ever desired.

## **100% Pass Fortinet - FCSS\_SASE\_AD-25 –High Pass-Rate Reliable Exam Book**

As you know, it is not easy to be famous among a lot of the similar companies. Fortunately, we have survived and developed well. So our company has been regarded as the most excellent seller of the FCSS\_SASE\_AD-25 learning materials. We positively

assume the social responsibility and manufacture the high quality FCSS\_SASE\_AD-25 study braindumps for our customers. And with the best FCSS\_SASE\_AD-25 training guide and the best services, we will never be proud to do better in this career.

## Fortinet FCSS\_SASE\_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.</li></ul>

## Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q49-Q54):

### NEW QUESTION # 49

What are two advantages of using zero-trust tags? (Choose two.)

- A. Zero-trust tags can be used to allow or deny access to network resources.
- B. Zero-trust tags can help monitor endpoint system resource usage.
- C. Zero-trust tags can be assigned to endpoint profiles based on user groups.
- D. Zero-trust tags can determine the security posture of an endpoint.

**Answer: A,D**

Explanation:

Zero-trust tags assess endpoint compliance based on defined posture rules and are used in access policies to control whether a device is permitted or denied access to specific network resources.

### NEW QUESTION # 50

Refer to the exhibits.

Exhibit 1

Jumpbox and Windows-AD are endpoints from the same remote location. Jumpbox can access the internet through FortiSASE, while Windows-AD can no longer access the internet.

Based on the information in the exhibits, which reason explains the outage on Windows-AD?

- A. The remote VPN user on Windows-AD no longer matches any VPN policy.

- B. The device posture for Windows-AD has changed.
- C. Windows-AD is excluded from FortiSASE management.
- D. The FortiClient version installed on Windows AD does not match the expected version on FortiSASE.

**Answer: B**

Explanation:

The Windows-AD endpoint now has both "FortiSASE-Compliant" and "FortiSASE-Non-Compliant" tags due to failing the antivirus software check. As a result, the Secure Internet Access Policy matches the "Non-Compliant" rule, which is set to Deny, causing the device to lose internet access.

### NEW QUESTION # 51

Which statement best describes the Digital Experience Monitor (DEM) feature on FortiSASE?

- A. It can help IT and security teams ensure consistent security monitoring for remote users.
- B. It provides end-to-end network visibility from all the FortiSASE security PoPs to a specific SaaS application.
- C. It can be used to request a detailed analysis of the endpoint from the FortiGuard team.
- D. It requires a separate DEM agent to be downloaded from the FortiSASE portal and installed on the endpoint.

**Answer: B**

Explanation:

The Digital Experience Monitor (DEM) feature in FortiSASE is designed to provide end-to-end network visibility by monitoring the performance and health of connections between FortiSASE security Points of Presence (PoPs) and specific SaaS applications. This ensures that administrators can identify and troubleshoot issues related to latency, jitter, packet loss, and other network performance metrics that could impact user experience when accessing cloud-based services.

Here's why the other options are incorrect:

B. It can be used to request a detailed analysis of the endpoint from the FortiGuard team: This is incorrect because DEM focuses on network performance monitoring, not endpoint analysis. Endpoint analysis would typically involve tools like FortiClient or FortiEDR, not DEM.

C. It requires a separate DEM agent to be downloaded from the FortiSASE portal and installed on the endpoint: This is incorrect because DEM operates at the network level and does not require an additional agent to be installed on endpoints.

D. It can help IT and security teams ensure consistent security monitoring for remote users: While DEM indirectly supports security by ensuring optimal network performance, its primary purpose is to monitor and improve the digital experience rather than enforce security policies.

Fortinet FCSS FortiSASE Documentation - Digital Experience Monitoring Overview FortiSASE Administration Guide - Configuring DEM

### NEW QUESTION # 52

Refer to the exhibits.

A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub. The tunnel is up to the FortiGate hub. However, the administrator is not able to ping the webserver hosted behind the FortiGate hub. Based on the output, what is the reason for the ping failures?

- A. The Secure Private Access (SPA) policy needs to allow PING service.
- B. The BGP route is not received.
- C. Quick mode selectors are restricting the subnet.
- D. Network address translation (NAT) is not enabled on the spoke-to-hub policy.

**Answer: B**

### NEW QUESTION # 53

Your organization is currently using FortiSASE for its cybersecurity. They have recently hired a contractor who will work from the HQ office and who needs temporary internet access in order to set up a web-based point of sale (POS) system.

What is the recommended way to provide internet access to the contractor?

- A. Use a tunnel policy with a contractors user group as the source on FortiSASE to provide internet access.

- Answer: C**

The self-registration portal is the recommended method for granting temporary internet access to contractors or guests. It provides a simple and secure way for the contractor to authenticate and access the internet without requiring full endpoint management or policy configuration.
