

Pass Guaranteed 2026 VMware 3V0-24.25 Perfect Real Question

One of the most effective strategies to prepare for the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) exam successfully is to prepare with actual VMware 3V0-24.25 exam questions. It would be difficult for the candidates to pass the 3V0-24.25 exam on the first try if the 3V0-24.25 study materials they use are not updated. Studying with invalid 3V0-24.25 practice material results in a waste of time and money. Therefore, updated 3V0-24.25 practice questions are essential for the preparation of the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) exam.

The price of VMware 3V0-24.25 updated exam dumps is affordable. You can try the free demo version of any VMware 3V0-24.25 exam dumps format before buying. For your satisfaction, TestSimulate gives you a free demo download facility. You can test the features and then place an order. So, these real and updated Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service 3V0-24.25 Dumps are essential to pass the 3V0-24.25 exam.

>> 3V0-24.25 Real Question <<

Free PDF High Hit-Rate 3V0-24.25 - Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Real Question

The study material is available in three formats, i.e. PDF format, web-based practice exam, and desktop practice test software. The PDF format is easy for those who always have their smart devices and love to study from them. Users can also make notes of printed PDF VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service certification exam so they can study them anywhere to pass VMware 3V0-24.25 Certification test with a good score.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q39-Q44):

NEW QUESTION # 39

A Platform Engineer is configuring Kubernetes Admin Credentials for a break-glass scenario. The requirement is to enable the built-in admin user for a specific TKG cluster prod-cluster, bypassing vCenter SSO in case of an SSO outage. Which sequence of commands/actions correctly retrieves this kubeconfig? (Choose 2.)

- A. Inspect the TanzuKubernetesCluster resource status fields for the adminKubeconfig data.
- B. The system does not generate a static admin kubeconfig for TKG clusters; all access must be via SSO.
- C. Run kubectl get secret prod-cluster-kubeconfig -n -o jsonpath='{.data.value}' | base64 -d > admin.kubeconfig
- D. SSH into the Supervisor Control Plane VM and copy /etc/kubernetes/admin.conf to the local machine.
- E. Use the kubectl vsphere login command with the --tanzu-kubernetes-cluster-name and --kubeconfig flags, referencing the SSO administrator credentials.

Answer: A,C

NEW QUESTION # 40

A Platform Engineer needs to provision a new VKS cluster using the vcf-cli tool (or kubectl with the VKS plugin). The requirement is to deploy a cluster named dev-cluster-1 into the namespace dev-ns, utilizing a specific Virtual Machine Class guaranteed-large for all nodes to ensure performance.

Which of the following represents a valid configuration approach for defining the node pools in the YAML manifest? (Select all that apply.)

- A. Use the command kubectl create cluster dev-cluster-1 --class guaranteed-large directly (imperative).
- B. **Specify the vmClass explicitly in the TanzuKubernetesCluster spec to ensure the Supervisor schedules VMs with the correct CPU and Memory reservations backed by the guaranteed-large definition in vCenter.**
- C. Define a topology section in the YAML where vmClass is set to guaranteed-large for both controlPlane and workers.
- D. Leave the vmClass field empty to allow the Supervisor to automatically select the largest available class.
- E. **Map the guaranteed-large class to the dev-ns namespace in the vSphere Client before applying the YAML, otherwise the admission controller will reject the request.**

Answer: B,C,E

NEW QUESTION # 41

A Cloud Architect is evaluating the resource consumption of the Harbor Supervisor Service.

The requirement is to support a High Availability deployment of Harbor.

What impact does enabling HA have on the Supervisor Cluster?

- A. It requires deploying 3 separate Supervisor Clusters.
- B. It has no impact; HA is a logical switch.
- C. **It increases the resource reservation requirement because the Harbor operator will deploy redundant replicas of the core components (Core, Jobservice, Portal) and a clustered database/Redis, consuming more CPU/Memory/Storage from the Supervisor's resource pool.**
- D. It requires an external database; the embedded one cannot be HA.

Answer: C

NEW QUESTION # 42

In the context of vSphere with Tanzu, what is a Supervisor Service (formerly known as a vSphere Pod Service or Embedded Service)?

- A. It is a hardware-accelerated function provided by a DPU (Data Processing Unit) to offload NSX routing.
- B. It is a dedicated Tanzu Kubernetes Grid cluster provisioned for the sole purpose of running the vCenter Server Appliance.
- C. **It is a certified Kubernetes operator or application (such as Harbor or Velero) that runs directly on the Supervisor Cluster to provide shared infrastructure services to tenant namespaces.**
- D. It is a standard Virtual Machine deployed by a user that runs a legacy application.

Answer: C

NEW QUESTION # 43

A Platform Engineer is optimizing the IP address consumption of the NSX Advanced Load Balancer (Avi) used by a Supervisor Cluster. The current "Essentials" edition deployment consumes a new Service Engine (SE) IP and a VIP for every LoadBalancer service, leading to IP exhaustion.

The engineer wants to switch to a design where multiple Kubernetes Services share the same Service Engine group and potentially consolidate VIPs where possible (using L7 Ingress), but the immediate concern is the backend SE scaling.

Review the current setting: Service Engine Group: Default-Group Max VS per SE: 10 What configuration change on the Avi Controller would optimize resource usage for this VKS deployment? (Select all that apply.)

- A. **Use AKO (Avi Kubernetes Operator) features to implement L7 Ingress (sharing a single VIP/VS for multiple apps) instead of creating a type: LoadBalancer (L4) for every app.**
- B. Switch the Supervisor configuration to use HAProxy, which is more efficient.
- C. Configure the IPAM Profile to use a larger subnet.
- D. Enable NSX-T Cloud mode in Avi instead of vCenter Cloud mode.

- E. Increase the Max Virtual Services per Service Engine limit in the Service Engine Group settings (e.g., to 50 or 100), allowing more services to be packed onto existing SEs before spawning new ones.

Answer: A,E

NEW QUESTION # 44

.....

The web-based Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) practice exam is accessible from any major OS. These VMware 3V0-24.25 exam questions are browser-based, so there's no need to install anything on your computer. Chrome, IE, Firefox, and Opera all support this Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) web-based practice exam. You can take this Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) practice exam without plugins and software installation.

3V0-24.25 Test Discount: <https://www.testsimulate.com/3V0-24.25-study-materials.html>

Our online test engine will improve your ability to solve the difficulty of 3V0-24.25 real questions and get used to the atmosphere of the formal test, First and foremost, the candidates can find deficiencies of their knowledge as well as their weakness in the VMware 3V0-24.25 simulated examination, so that they can enrich their knowledge and do more detail study plan before the real exam, But we all known that preparing for the 3V0-24.25 exam is not easy, some people tried several times still failed to pass through it.

Yvette is the managing editor for the Google 3V0-24.25 Channel on Brighthub.com, and she is a contributing editor for the Linux Channel on the same site, Few clients commission design Latest 3V0-24.25 Exam Topics so regularly that they fully understand what to expect from the design process.

Overcome Exam Challenges with 3V0-24.25 VMware 3V0-24.25 Exam Questions

Our online test engine will improve your ability to solve the difficulty of 3V0-24.25 Real Questions and get used to the atmosphere of the formal test, First and foremost, the candidates can find deficiencies of their knowledge as well as their weakness in the VMware 3V0-24.25 simulated examination, so that they can enrich their knowledge and do more detail study plan before the real exam.

But we all known that preparing for the 3V0-24.25 exam is not easy, some people tried several times still failed to pass through it, We can always get information Latest 3V0-24.25 Exam Topics from some special channel as we have been engaging in this line so many years.
