HCL-HWA-ADM-102 Dump - New HCL-HWA-ADM-102 Test Materials

TrainingQuiz also provides easy to use HCL-HWA-ADM-102 practice test brain dump preparation software for HCL-HWA-ADM-102. Moreover, after the date of purchase of the HCL-HWA-ADM-102 testing engine, you will receive free updates for 90 days. The HCL-HWA-ADM-102 dumps practice test software is easy to install and has a simple interface. The practice test software for HCL-HWA-ADM-102 Exam provides a real feel of an exam and allows you to test your skills for the exam. The HCL-HWA-ADM-102 software comes with multiple features including the self-assessment feature. You will get free updates for 90 days after the purchase date that will allow you to get latest and well-curated questions for the HCL-HWA-ADM-102 exam.

HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q770-Q775):

NEW QUESTION # 770

Scenario: HWA 10.2 installation on SLES15 with separate TWA_HOME=/hwa and TWS_DATA_DIR=/data_hwa spanning two LVM volumes. twsinst -new fails:

"TWS_DATA_DIR must be subdirectory of TWA_HOME". Which installation path override resolves this?

- A. Use -unified_install true parameter
- B. -data_dir /hwa/data; symlink /data_hwa to /hwa/data
- C. Set TWS_DATA_DIR=\$TWA_HOME/data_hwa in response file
- D. TWS_DATA_DIR=/hwa/data_hwa absolute path only

Answer: B

Explanation:

HWA 10.2 enforces TWS_DATA_DIR as subdirectory of TWA_HOME for relative path resolution in config files. Create /hwa/data, mount /dev/vg_data/lv_data_hwa to it via mount -o bind, update /etc/fstab for persistence. Rerun twsinst -data_dir /hwa/data verifies unified paths.

NEW QUESTION # 771

HCL HWA 10.2 message file internationalization testing: msgcat -test de_DE fails MISSING_TRANSLATION 200 errors. English fallback required. What command generates German catalog with English defaults?

- A. msgcat -merge enu+de_DE -priority enu
- B. msgcat -generate de_DE -fallback enu -missing=english_default
- C. msgcat -copy enu de_DE; msgcat -translate auto
- D. optman mod _MSG_FALLBACK=enu

Answer: B

Explanation:

Fallback generation handles incomplete translations. msgcat -generate de_DE -fallback enu creates German catalog displaying English for 200 untranslated messages. Users see consistent messaging during localization completion.

NEW QUESTION # 772

In a high-availability setup with a backup master domain manager, the primary database password is updated. Which components require updates to the connection parameters to avoid plan switch failures? (Select All that Apply)

- A. Backup master domain manager Windows services
- B. Primary master domain manager application server datasource
- C. All dynamic agents in the network
- D. Dynamic Workload Console engine connections

Answer: A,B,D

Explanation:

Changing the database password requires updating the datasource file on the primary master domain manager and restarting its application server, updating Windows services on the backup master if applicable, and refreshing engine connection parameters in the Dynamic Workload Console to allow monitoring and management. Dynamic agents do not directly connect to the database, so no changes are needed there.

NEW QUESTION # 773

Which global setting in Dynamic Workload Console controls the maximum concurrent monitoring tasks to prevent resource exhaustion?

- A. Engine polling interval
- B. Concurrent task limit
- C. Session timeout
- D. Query timeout value

Answer: B

Explanation:

The concurrent task limit restricts how many simultaneous monitor or query operations a single user can run, preventing individual users from consuming excessive resources on the console server.

NEW QUESTION # 774

HCL HWA 10.2 DWC high availability installation across 2 WebSphere Liberty nodes fails session affinity: users logged out after Liberty node1 -> node2 failover. http_session properties misconfigured. Correct server.xml memstore setting?

- A. `<httpSession idLength="56" useExternalFormOfSessionId="true" cloneIdFrom="URI"/>`
- B. sessionManager sticky sessions via load balancer cookie JSESSIONID
- C. `<httpSession reuseSessionID="true" enable="true" httpsOnlyCookies="true" cookiesConfiguredSecure="true" maxInMemorySessions="25000"/>`
- D. memstore-1.0 feature with `<memStore id="defaultMemstore" maxInMemorySessions="100000"/>`

Answer: C

Explanation:

HA DWC requires session ID reuse across Liberty nodes. server.xml httpSession reuseSessionID="true" enables session stickiness preservation during failover. Combined with httpsOnlyCookies="true" for TLS ensures session continuity. Test: login node1, failover to node2, session persists.

NEW QUESTION # 775
