Hundreds of professionals worldwide examine and test every Salesforce AP-222 Practice Exam regularly. These practice tools are developed by professionals who work in fields impacting Salesforce Public Sector Solutions Accredited Professional, giving them a foundation of knowledge and actual competence. Our Salesforce AP-222 exam questions are created and curated by industry specialists.

## Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q99-Q104):

### NEW QUESTION # 99

A public sector agency has implemented Public Sector Solutions for Licenses & Permits. After the intake of the Permit application, an applicant needs to pay permit fees. This step requires checking permit fees associated with the type of permit in an external system and, at the same time, applying an applicable discount on fees based on the site/ address (this data resides in a custom object).

What feature of Public Sector Solutions can be leveraged to meet this requirement?

- A. FlexCard
- B. DataRaptor
- C. **OmniScript**
- D. Integration Procedure

**Answer: C**

Explanation:

OmniScript is a feature of OmniStudio, which is part of the Public Sector Solutions package. OmniScript allows the public sector agency to create guided digital forms that can integrate with external systems and custom objects. OmniScript can be used to check permit fees from an external system and apply discounts based on site/address data from a custom object. **NEW QUESTION # 100**

An inspector at a large public sector agency is planning to make a visit to inspect restaurants in the city for compliance purposes. Which three built-in Lightning Components can they use to conduct efficient visits?

- A. Inspection Dynamic Dashboards
- B. Inspection Calendar
- C. Inspection Tab Container
- D. Inspection Action
- E. Inspection Details

**Answer: C,D,E**

Explanation:

Inspection Tab Container, Inspection Details, and Inspection Action are three built-in Lightning Components that can be used to conduct efficient visits. Inspection Tab Container is a component that can display a tabbed interface for viewing and editing inspection records. Inspection Details is a component that can display the details of an inspection record, such as the inspection type, status, date, and time. Inspection Action is a component that can display the actions that can be performed on an inspection record, such as completing, canceling, or rescheduling the inspection. Reference: [https://help.salesforce.com/s/articleView?id=psc\\_admin\\_setup\\_inspection\\_components.htm&type=5&language=en\\_US](https://help.salesforce.com/s/articleView?id=psc_admin_setup_inspection_components.htm&type=5&language=en_US)

**NEW QUESTION # 101**

The City of Bobahaven is setting up Employee Experience Management and needs to ensure that sensitive HR data is protected. What configuration should the Technical Consultant perform to assist with meeting this requirement?

- A. Disable all approval processes on the Case object
- B. Set the Organization-Wide Defaults (OWD) for the Case object to private
- C. Disable the Grant Access Using Hierarchies setting on the Case object
- D. Mirror the Org Chart into The Role Hierarchy

**Answer: B**

Explanation:

Setting the Organization-Wide Defaults (OWD) for the Case object to private is a configuration that can help to protect sensitive HR data in Employee Experience Management. Employee Experience Management is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to manage employee programs and benefits, such as leave requests or wellness surveys. The Case object is a standard object that can be used to track employee requests or issues in Employee Experience Management. Setting the OWD for the Case object to private means that only the owner of the case and users above them in the role hierarchy can access the case record by default. This can prevent unauthorized access to sensitive HR data by other users. Reference: [https://help.salesforce.com/s/articleView?id=psc\\_admin\\_setup\\_employee\\_experience.htm&type=5&language=en\\_US](https://help.salesforce.com/s/articleView?id=psc_admin_setup_employee_experience.htm&type=5&language=en_US)

**NEW QUESTION # 102**

A government agency is implementing Public Sector Solutions and their intake officer is looking to create a document checklist and review business license applications only. The agency is looking to create a document type for business license applications using the Intelligent Document Automation (IDA) and restrict the record access to the intake officer only. What are the three steps a technical consultant should configure to satisfy the agency's use case?

- A. Turn on Document Checklist
- B. Assign permissions and permission sets for application forms

- C. Enable Intelligent Document Automation
- D. Create a Document Type
- E. Create a document type under Notes and Attachment

**Answer: A,C,D**

Explanation:

To create a document checklist for business license applications with restricted access to an intake officer, the following steps are crucial: Firstly, enabling Intelligent Document Automation (IDA) in Salesforce allows for the automation and management of document processes. Secondly, turning on the Document Checklist feature enables the creation of checklists associated with specific processes, such as business license applications.

Lastly, creating a Document Type specific to business license applications allows for the categorization and management of documents within this process. These steps ensure that only the necessary documents are reviewed by the designated intake officer, enhancing the efficiency and security of the document review process.

#### **NEW QUESTION # 103**

A government agency is planning a Public Sector Solutions implementation. What are three main constraints that government agencies often have in project implementation?

- A. Scope, Tools and Cost
- B. Workshops, Schedule and Cost
- C. Scope, Schedule and Cost
- D. Scope, Resources and Cost

**Answer: C**

Explanation:

Scope, schedule and cost are the three main constraints that government agencies often have in project implementation. Scope defines the goals, deliverables, and requirements of the project. Schedule defines the timeline, milestones, and dependencies of the project. Cost defines the budget, resources, and risks of the project. These three constraints are also known as the project management triangle or the triple constraint.
