

Professional-Cloud-Database-Engineer Reliable Learning Materials & Free PDF Google Realistic Google Cloud Certified - Professional Cloud Database Engineer Reliable Dumps Questions

What's more, part of that PracticeVCE Professional-Cloud-Database-Engineer dumps now are free: https://drive.google.com/open?id=10Ydkh_GAc-7wpcS3G7jUpzGTQJ6EBg9y

We want to provide our customers with different versions of Professional-Cloud-Database-Engineer test guides to suit their needs in order to learn more efficiently. Our Professional-Cloud-Database-Engineer qualification test can help you make full use of the time and resources to absorb knowledge and information. If you are accustomed to using the printed version of the material, we have a PDF version of the Professional-Cloud-Database-Engineer study tool for you to download and print, so that you can view the learning materials as long as you have free time. If you choose to study online, we have an assessment system that will make an assessment based on your learning of the Professional-Cloud-Database-Engineer qualification test to help you identify weaknesses so that you can understand your own defects of knowledge and develop a dedicated learning plan. Moreover our Professional-Cloud-Database-Engineer test guides provide customers with supplement service-mock test, which can totally inspire them to study hard and check for defects during their learning process. Our commitment is not frank, as long as you choose our Professional-Cloud-Database-Engineer study tool you will truly appreciate the benefits of our products.

Our company has dedicated ourselves to develop the Professional-Cloud-Database-Engineer latest practice materials for all candidates to pass the exam easier, also has made great achievement after more than ten years' development. As the certification has been of great value, a right Professional-Cloud-Database-Engineer exam guide can be your strong forward momentum to help you pass the Professional-Cloud-Database-Engineer Exam like a hot knife through butter. And our Professional-Cloud-Database-Engineer exam questions are exactly the right one for you as our high quality of Professional-Cloud-Database-Engineer learning guide is proved by the high pass rate of more than 98%.

Professional-Cloud-Database-Engineer Reliable Dumps Questions - Valid Test Professional-Cloud-Database-Engineer Tips

With the development of the times, the pace of the society is getting faster and faster. If we don't try to improve our value, we're likely to be eliminated by society. Under the circumstances, we must find ways to prove our abilities. For example, getting the Professional-Cloud-Database-Engineer Certification is a good way. If we had it, the chances of getting a good job would be greatly improved. And our Professional-Cloud-Database-Engineer exam braindumps are the tool to help you get the Professional-Cloud-Database-Engineer certification.

Achieving the Google Professional-Cloud-Database-Engineer Certification demonstrates to employers and clients that you have the knowledge and skills needed to design, develop, and manage cloud-based database solutions using Google Cloud. It can also open up new career opportunities and increase earning potential.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q43-Q48):

NEW QUESTION # 43

Your organization has a ticketing system that needs an online marketing analytics and reporting application. You need to select a relational database that can manage hundreds of terabytes of data to support this new application. Which database should you use?

- A. Cloud SQL
- B. Cloud Spanner
- C. Bigtable
- **D. BigQuery**

Answer: D

NEW QUESTION # 44

You are choosing a new database backend for an existing application. The current database is running PostgreSQL on an on-premises VM and is managed by a database administrator and operations team. The application data is relational and has light traffic. You want to minimize costs and the migration effort for this application. What should you do?

- A. Migrate the existing database to Cloud Spanner.
- B. Migrate the existing database to Firestore.
- C. Migrate the existing database to PostgreSQL running on Compute Engine.
- **D. Migrate the existing database to Cloud SQL for PostgreSQL.**

Answer: D

Explanation:

You could migrate to Spanner leveraging the PostgreSQL dialect, but costs need to be minimized so that wouldn't be the cheapest option. Especially since the load doesn't justify Spanner. Again, you could migrate like-for-like to a GCE VM, but that defeats minimizing the migration effort. The cheapest and easiest way to migrate would be Database Migration Service to Cloud SQL for PostgreSQL.

NEW QUESTION # 45

Your organization stores marketing data such as customer preferences and purchase history on Bigtable. The consumers of this database are predominantly data analysts and operations users. You receive a service ticket from the database operations department citing poor database performance between 9 AM-10 AM every day. The application team has confirmed no latency from their logs. A new cohort of pilot users that is testing a dataset loaded from a third-party data provider is experiencing poor database performance. Other users are not affected. You need to troubleshoot the issue. What should you do?

- A. Check the Cloud Monitoring table/bytes_used metric from Bigtable.
- B. Isolate the data analysts and operations user groups to use different Bigtable instances.
- **C. Use Key Visualizer for Bigtable.**
- D. Add more nodes to the Bigtable cluster.

Answer: C

Explanation:

<https://cloud.google.com/bigtable/docs/performance#troubleshooting>

NEW QUESTION # 46

You are troubleshooting a connection issue with a newly deployed Cloud SQL instance on Google Cloud. While investigating the Cloud SQL Proxy logs, you see the message Error 403: Access Not Configured. What should you do?

- A. Enable the Cloud SQL Admin API.
- B. Check whether your service account has `cloudsql.instances.connect` permission.
- C. Check the `app.yaml` value `cloud_sql_instances` for a misspelled or incorrect instance connection name.
- D. Ensure that you are using an external (public) IP address interface.

Answer: A

Explanation:

<https://cloud.google.com/sql/docs/mysql/connect-auth-proxy#troubleshooting> C because in docs it says "Make sure to enable the Cloud SQL Admin API. If it is not, you see output like Error 403: Access Not Configured in your Cloud SQL

NEW QUESTION # 47

You are evaluating Cloud SQL for PostgreSQL as a possible destination for your on-premises PostgreSQL instances. Geography is becoming increasingly relevant to customer privacy worldwide. Your solution must support data residency requirements and include a strategy to:

configure where data is stored

control where the encryption keys are stored

govern the access to data

What should you do?

- A. Use features like customer-managed encryption keys (CMEK), VPC Service Controls, and Identity and Access Management (IAM) policies.
- B. Create a Cloud SQL for PostgreSQL instance on Google Cloud for the data that does not need to adhere to data residency requirements. Keep the data that must adhere to data residency requirements on-premises. Make application changes to support both databases.
- C. Allow application access to data only if the users are in the same region as the Google Cloud region for the Cloud SQL for PostgreSQL database.
- D. Replicate Cloud SQL databases across different zones.

Answer: C

NEW QUESTION # 48

.....

Pass rate is 98.45% for Professional-Cloud-Database-Engineer learning materials, which helps us gain plenty of customers. You can pass the exam and obtain the certification successfully if you choose us. Professional-Cloud-Database-Engineer exam braindumps contain both questions and answers, and it's convenient for you to check the answers after practicing. You can try free demo before buying Professional-Cloud-Database-Engineer Exam Materials, so that you can know what the complete version is like. We provide you with free update for 365 days after purchasing, and the update version for Professional-Cloud-Database-Engineer exam dumps will be sent to you automatically. You just need to check your email and change your learning ways according to new changes.
