200 MCQ सामान्य ज्ञान (भूगोल, इतिहास एवं विज्ञान)

Q.191 इलेक्ट्रॉन की खोज किसने की?

(a) थॉमसन
(b) रदरफोर्ड
(c) चाडविक
(d) बोस

उत्तर: [a] थॉमसन

Q.193 विश्व में सबसे बड़ा सागर कौन-सा है?

(a) फिलीपीन सागर
(b) दक्षिण चीन सागर
(c) बेरिंग सागर
(d) अरब सागर

उत्तर: [b] दक्षिण चीन सागर

Q.195 सबसे प्राचीन वेद ऋग्वेद है, इसकी रचना कब हुई मानी जाती है?

(a) वैदिक काल
(b) उपनिषद् काल
(c) महाभारत काल
(d) गुप्त काल

उत्तर: [a] वैदिक काल

Q.197 राज्यसभा के सदस्यों की अवधि 6 वर्ष क्यों है?

(a) लोकसभा जैसी
(b) स्थायी सदन होने से
(c) चुनाव सुविधा
(d) परंपरा

उत्तर: [b] स्थायी सदन होने से

Q.199 ओलंपिक में हॉकी 1928 में शामिल हुई, भारत ने पहला स्वर्ण कब जीता?

(a) 1928
(b) 1932
(c) 1936
(d) 1948

उत्तर: [a] 1928

Q.192 प्रोटॉन की खोज किसने की?

(a) गोल्डस्टीन
(b) रदरफोर्ड
(c) थॉमसन
(d) चाडविक

उत्तर: [b] रदरफोर्ड

Q.194 मीठे पानी की सबसे बड़ी झील कौन-सी है?

(a) बैकल
(b) सुपीरियर
(c) विक्टोरिया
(d) टिटिकाका

उत्तर: [b] सुपीरियर

Q.196 हिंदी दिवस 14 सितंबर को क्यों मनाया जाता है?

(a) गांधी जयंती
(b) संविधान लागू होने पर
(c) हिंदी को राजभाषा बनाने पर
(d) स्वतंत्रता दिवस

उत्तर: [c] हिंदी को राजभाषा बनाने पर

Q.198 भारत रत्न सबसे बड़ा सम्मान क्यों है?

(a) सैनिक
(b) नागरिक
(c) खेल
(d) कला

उत्तर: [b] नागरिक

Q.200 मनुष्य के शरीर में हड्डियां 206 कब होती हैं?

(a) जन्म से
(b) बचस्क में
(c) बच्चे में अधिक
(d) बूढ़े में कम

उत्तर: [b] बचस्क में

As the talent team grows, every fighter must own an extra technical skill to stand out from the crowd. To become more powerful and struggle for a new self, getting a professional GH-200 certification is the first step beyond all questions. We suggest you choose our GH-200 test prep ----an exam braindump leader in the field. Since we release the first set of the GH-200 Quiz guide, we have won good response from our customers and until now---a decade later, our products have become more mature and win more

recognition. Therefore, for expressing our gratitude towards the masses of candidates' trust, our GH-200 exam torrent will also be sold at a discount and many preferential activities are waiting for you.

Microsoft GH-200 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Author and Maintain Actions: This domain evaluates the abilities of Action Developers and Automation Engineers to select and create suitable types of GitHub Actions, such as JavaScript, Docker containers, or run steps. It emphasizes troubleshooting action code, understanding the components and file structures of actions, and using workflow commands within actions to communicate with runners, including exit code management.
Topic 2	<ul style="list-style-type: none">• Author and Maintain Workflows: This section of the exam measures skills of DevOps Engineers and Automation Specialists and covers building and managing workflows triggered by events such as pushes, scheduled times, manual triggers, and webhooks. It includes understanding workflow components like jobs, steps, actions, and runners, syntax correctness, environment variables, secrets management, and dependencies between jobs. Candidates will also demonstrate practical abilities to create workflows for various purposes, including publishing packages, using service containers, routing jobs, and deploying releases to cloud providers.
Topic 3	<ul style="list-style-type: none">• Manage GitHub Actions in the Enterprise: This section measures the expertise of Enterprise Administrators and Platform Engineers in distributing and managing GitHub Actions and workflows at the organizational level. It includes reuse and sharing of templates, strategies for managing reusable components via repositories and naming conventions, controlling access to actions, setting organization-wide usage policies, and planning maintenance to ensure efficient enterprise-wide deployment of GitHub Actions.
Topic 4	<ul style="list-style-type: none">• Consume Workflows: This domain targets Software Developers and Quality Assurance Engineers and focuses on interpreting workflow runs and their outcomes. It covers identifying triggering events, reading workflow configurations, troubleshooting failures by analyzing logs, enabling debug logging, managing environment variables, caching dependencies, and passing data between jobs. Candidates also manage workflow runs, artifacts, approvals, and status badges, as well as locating workflows within repositories and leveraging organizational templated workflows.

Microsoft GitHub Actions Sample Questions (Q53-Q58):

NEW QUESTION # 53

Which command can you include in your workflow file to set the output parameter for an action?

- A. `echo "::add-mask::$ACTION_COLOR"`
- B. `echo "action_color=purple" >> $GITHUB_ENV`
- C. `echo "action_color=purple" >> $GITHUB_OUTPUT`
- D. `echo "::debug:action_color=purple"`

Answer: C

Explanation:

Setting an output parameter

Sets a step's output parameter. Note that the step will need an id to be defined to later retrieve the output value. You can set multi-line output values with the same technique used in the Multiline strings section to define multi-line environment variables.

```
echo "{name}={value}" >> "$GITHUB_OUTPUT"
```

Example of setting an output parameter

This example demonstrates how to set the `SELECTED_COLOR` output parameter and later retrieve it:

- name: Set color

id: color-selector

```
run: echo "SELECTED_COLOR=green" >> "$GITHUB_OUTPUT"
```

- name: Get color

env:

```
SELECTED_COLOR: ${ steps.color-selector.outputs.SELECTED_COLOR }
```

run: echo "The selected color is \$SELECTED_COLOR"

Reference:

<https://docs.github.com/en/actions/reference/workflows-and-actions/workflow-commands>

NEW QUESTION # 54

Which workflow event is used to manually trigger a workflow run?

- A. create
- B. workflow_dispatch
- C. status
- D. workflow_run

Answer: B

Explanation:

The workflow_dispatch event is used to manually trigger a workflow run in GitHub Actions. You can specify this event in the workflow file to allow users to manually trigger the workflow from the GitHub UI, often with optional input parameters.

NEW QUESTION # 55

While awaiting approval, how many days can a workflow be in the "Waiting" state before it automatically fails?

- A. 14 days
- B. 30 days
- C. 60 days
- D. 7 days

Answer: B

Explanation:

Using required reviews in workflows

Jobs that reference an environment configured with required reviewers will wait for an approval before starting. While a job is awaiting approval, it has a status of "Waiting". If a job is not approved within 30 days, it will automatically fail.

Reference:

<https://docs.github.com/en/actions/how-to/deploy/configure-and-manage-deployments/control-deployments>

NEW QUESTION # 56

As a developer, you are using a Docker container action in your workflow. What is required for the action to run successfully?

- A. The job env must be set to a Linux environment.
- B. The referenced action must be hosted on Docker Hub.
- C. The job runs-on must specify a Linux machine with Docker installed.
- D. The action must be published to the GitHub Marketplace.

Answer: C

Explanation:

For a Docker container action to run in a GitHub Actions workflow, the runner must have Docker installed. The runs-on attribute of the job should specify an environment that supports Docker, typically a Linux environment (e.g., ubuntu-latest), since Docker is widely supported and commonly used in Linux-based environments.

NEW QUESTION # 57

An organization's policies specify only local actions are allowed. How should actions be distributed for this organization?

- A. via the GitHub Marketplace
- B. via a repository owned by a third party
- C. via the .github repository owned by the organization

- D. via repositories owned by the organization

Answer: D

Explanation:

Local GitHub Actions refer to two concepts: custom actions developed within your own repository and the process of running any GitHub Action locally on your machine for faster testing and debugging.

1. Local Actions (within your repository)

Definition:

These are custom actions that you define and store directly in your repository under the `.github/actions/` directory. They are not publicly shared, unlike actions from the GitHub Marketplace.

Purpose:

They are used for project-specific, repetitive tasks that you want to reuse within your workflows without publishing them globally.

How it works:

You can call these local actions in your workflow files as if they were standard published actions.

2. Running Actions Locally (on your development machine)

Note:

Pinned repositories

You can give users easy access to important or frequently used repositories, by choosing up to six repositories for public users and six repositories for members of the organization. Once you pin repositories to your organization profile, the "Pinned" section is shown above the

"Repositories" section of the profile page.
