We are pass guarantee and money back guarantee, and if you fail to pass the exam, we will return your money.

Cohesity COH-285 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"> • Configure NetBackup: This section of the exam measures the skills of system administrators and focuses on the configuration tasks required to set up and manage a NetBackup environment. It covers the setup of primary, media, and client settings along with essential host properties, including the use of security certificates. The section explains how to configure disk storage, cloud storage, and storage unit groups to support stable backup operations. It also includes the configuration of standard and advanced backup policies and protection plans. Candidates are expected to understand specialized backup solutions such as synthetic backups, True Image Restore, multiple data streams, checkpoint restart, and different duplication methods that involve storage lifecycle policies, disk staging, and replication features. |

| | |
|---------|--|
| Topic 2 | <ul style="list-style-type: none"> • Tune NetBackup: This section of the exam measures skills of system engineers and focuses on analyzing performance related factors in a NetBackup environment. It introduces performance assessment and optimization practices to help candidates identify bottlenecks and improve overall efficiency. Tuning NetBackup includes making adjustments that lead to more stable and faster backup and recovery operations. |
| Topic 3 | <ul style="list-style-type: none"> • Monitor and Maintain NetBackup: This section of the exam measures skills of operations personnel and focuses on the monitoring and maintenance tasks necessary to keep a NetBackup environment healthy. The topics include the core concepts of image management and the use of the NetBackup Administration Console to verify images, expire them, import backup data, and perform manual duplication. The section explains how to manage both disk and cloud storage within NetBackup and highlights the use of reports for verification and monitoring. It also covers administrative controls for running, cancelling, suspending, resuming, and prioritizing backup or duplication jobs. Candidates learn how to initiate and monitor restore operations and understand the security management features such as role based access control and host ID certificates. |
| Topic 4 | <ul style="list-style-type: none"> • Troubleshoot NetBackup: This section of the exam measures skills of NetBackup administrators and focuses on resolving issues that occur during backup and recovery operations. It covers the interpretation of status codes and job details to diagnose failed jobs. The section also explains how to troubleshoot devices and media and how to validate connectivity between primary servers, media servers, and client systems. Candidates learn to address common problems in disaster recovery situations, including tasks related to recovering the NetBackup catalog. |

Answer: C

NEW QUESTION # 240

Which storage unit group selection causes NetBackup to choose the least recently selected storage unit in the list as each new job is started?

- A. Prioritized
- **B. Round Robin**
- C. Media Server Load Balancing
- D. Failover

Answer: B

NEW QUESTION # 241

A backup job is showing the following error message:

Dec 5, 2018 4:11:02 PM - Info nbjm (pid=40455) starting backup job (jobid=369) for client WINTN3QANTSQ1B.vrtslab.br, policy Oracle_SO_Dedup, schedule FULL Dec 5, 2018 4:11:02 PM - Info nbjm (pid=40455) requesting STANDARD_RESOURCE resources from RB for backup job (jobid=369, request id:{201EBB46-F8B9-11E8-B5BA-A118CF05FA8E}) Dec 5, 2018 4:11:02 PM - requesting resource __ANY__ Dec 5, 2018 4:11:02 PM - requesting resource nbunasterapp.vrtslab.br.NBU_CLIENT.MAXJOBS.

WINTN3QANTSQ1B.vrtslab.br

Dec 5, 2018 4:11:02 PM -

Error nbjm (pid=40455) NBU status: 2111, EMM status: All storage units are configured with On Demand Only and are not eligible for jobs requesting ANY storage unit All storage units are configured with On Demand Only and are not eligible for jobs requesting ANY storage unit (2111) Which two actions can an administrator perform to ensure the backup completes successfully? (Select two.)

- **A. assign a specific Storage Unit for that policy**
- B. increase the "Limit I/O streams" parameter on the disk volume
- **C. ensure at least one storage unit is without the On Demand Only option selected**
- D. increase the Multiplexing value on the storage unit
- E. increase the "Maximum concurrent jobs" parameter on the storage unit

Answer: A,C

NEW QUESTION # 242

What is the purpose of the checkpoint restart feature in NetBackup?

- A. It allows NetBackup to split a large backup job into smaller chunks that are marked by checkpoints.
- B. It allows NetBackup to perform incremental backups by tracking the changes since the last checkpoint.
- **C. It allows NetBackup to resume a backup job from the last checkpoint if the job fails or is interrupted.**
- D. It allows NetBackup to verify the integrity of a backup image by comparing it with a checkpoint file.

Answer: C

NEW QUESTION # 243

.....

Customer first, service first is our principle of service. If you buy our COH-285 study guide, you will find our after sale service is so considerate for you. We are glad to meet your all demands and answer your all question about our COH-285 Training Materials. So do not hesitate and buy our COH-285 study guide, we believe you will find surprise from our products. you should have the right to enjoy the perfect after sale service and the high quality products!
