These affordable CCFH-202b questions are available in three user-friendly formats, ensuring a smooth and efficient preparation experience for the CCFH-202b exam.

CrowdStrike CCFH-202b Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Reports and References: This domain covers using built-in Hunt and Visibility reports and leveraging Events Full Reference documentation for event information.
Topic 2	<ul style="list-style-type: none"> Event Search: This domain focuses on using CrowdStrike Query Language to build queries, format and filter event data, understand process relationships and event types, and create custom dashboards.

Topic 3	<ul style="list-style-type: none"> • Detection Analysis: This domain focuses on analyzing Host and Process Timelines in Falcon to understand events and detections, and pivoting to additional investigative tools.
Topic 4	<ul style="list-style-type: none"> • Search and Investigation Tools: This domain covers analyzing file and process metadata, using Investigate Module tools, performing various searches, and interpreting dashboard results.

CrowdStrike Certified Falcon Hunter Sample Questions (Q30-Q35):

NEW QUESTION # 30

You are reviewing a list of domains recently banned by your organization's acceptable use policy. In particular, you are looking for the number of hosts that have visited each domain. Which tool should you use in Falcon?

- A. Create a custom alert for each domain
- B. Bulk Domain Search
- C. IP Addresses Search
- D. Allowed Domain Summary Report

Answer: B

Explanation:

Bulk Domain Search is the tool that you should use in Falcon to review a list of domains recently banned by your organization's acceptable use policy and look for the number of hosts that have visited each domain. Bulk Domain Search is an Investigate tool that allows you to search for multiple domains at once and view their network connection events across all hosts in your environment. It shows information such as domain name, number of hosts visited, number of detections generated, etc. for each domain. Create a custom alert for each domain, Allowed Domain Summary Report, and IP Addresses Search are not tools that you should use for this purpose.

NEW QUESTION # 31

Which of the following is a way to create event searches that run automatically and recur on a schedule that you set?

- A. Event Search
- B. Scheduled Reports
- C. Workflows
- D. Scheduled Searches

Answer: D

Explanation:

Scheduled Searches are a way to create event searches that run automatically and recur on a schedule that you set. You can use Scheduled Searches to monitor your environment for specific conditions or patterns, generate reports or alerts, or enrich your data with additional fields or tags. Workflows, Event Search, and Scheduled Reports are not ways to create event searches that run automatically and recur on a schedule.

NEW QUESTION # 32

Lateral movement through a victim environment is an example of which stage of the Cyber Kill Chain?

- A. Command & Control
- B. Exploitation
- C. Actions on Objectives
- D. Delivery

Answer: A

Explanation:

Lateral movement through a victim environment is an example of the Command & Control stage of the Cyber Kill Chain. The Cyber Kill Chain is a model that describes the phases of a cyber attack, from reconnaissance to actions on objectives. The Command & Control stage is where the adversary establishes and maintains communication with the compromised systems and moves laterally to

expand their access and control.

NEW QUESTION # 33

What information is provided when using IP Search to look up an IP address?

- A. Both internal and external IPs
- B. Internal IPs only
- C. External IPs only
- D. Suspicious IP addresses

Answer: C

Explanation:

IP Search is an Investigate tool that allows you to look up information about external IPs only. It shows information such as geolocation, network connection events, detection history, etc. for each external IP address that has communicated with your hosts. It does not show information about internal IPs, suspicious IPs, or both internal and external IPs.

NEW QUESTION # 34

While you're reviewing Unresolved Detections in the Host Search page, you notice the User Name column contains "hostnameS ". What does this User Name indicate?

- A. The User Name is a System User
- B. There is no User Name associated with the event
- C. The Falcon sensor could not determine the User Name
- D. The User Name is not relevant for the dashboard

Answer: B

Explanation:

When you see "hostnameS" in the User Name column in the Host Search page, it means that there is no User Name associated with the event. This can happen when the event is related to a system process or service that does not have a user context. It does not mean that the User Name is a System User, that the User Name is not relevant for the dashboard, or that the Falcon sensor could not determine the User Name.

NEW QUESTION # 35

.....

By resorting to our CCFH-202b practice materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our CCFH-202b actual tests, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our CCFH-202b braindump materials. Moreover, there are a series of benefits for you. So the importance of CCFH-202b actual test is needless to say. If you place your order right now, we will send you the free renewals lasting for one year.
