Certification Details

- **CCIE Collaboration**

CCIE Collaboration is Cisco certification that relates to the expert level and addresses a solid expertise in collaboration solutions. Success in this path sets you apart as a distinguished professional who understands the ins and outs of collaboration technologies. Aside from passing the Cisco 350-801 exam, candidates must also pass one lab test to qualify for this certificate, which in this case is the Cisco CCIE Collaboration v3.0. While the vendor does not list any strict prerequisites for attaining this accreditation, the applicants are advised to have about 5 years of working experience in managing collaboration technologies.

- **CCNP Collaboration**

CCNP Collaboration, on the other hand, is a certificate that proves one's ability to work with collaboration solutions on an intermediate level. Achieving it puts you on course to attaining certification supremacy by acting as the second-best option

after the above-mentioned CCIE Collaboration.

Generally, learners must pass a two-exam combination to get certified. The core test, Cisco 350-801, and a concentration one from the options listed below:

- Cisco 300-810: Implementing Cisco Collaboration Applications (CLICA)
- Cisco 300-815: Implementing Cisco Advanced Call Control and Mobility Services (CLACCM)
- Cisco 300-820: Implementing Cisco Collaboration Cloud and Edge Solutions (CLCEI)
- Cisco 300-825: Implementing Cisco Collaboration Conferencing (CLCNF)
- Cisco 300-835: Implementing Automation for Cisco Collaboration Solutions (CLAUI)

Usually, CCNP Collaboration candidates are expected to have at least three years of proven experience working with collaboration services.

- **Cisco Certified Specialist – Collaboration Core**

Finally, Cisco Certified Specialist – Collaboration Core is a title that recognizes your accomplishments at the professional level. It serves as a validation of an individual's skills and ensures a base for further advancements in the industry.

Cisco 350-801 Exam is intended for professionals who have experience working with Cisco collaboration solutions and are looking to advance their career in this field. 350-801 exam is suitable for network engineers, system administrators, and other IT professionals who are responsible for managing and maintaining Cisco collaboration solutions in their organization. Candidates who successfully pass 350-801 exam will have the knowledge and skills necessary to implement and operate Cisco collaboration solutions in a variety of environments.

- Passing Score: 70%

Cisco Implementing and Operating Cisco Collaboration Core Technologies Sample Questions (Q348-Q353):

NEW QUESTION # 348

Refer to the exhibit. Given this "debug isdn q921" output, what is the problem with the PRI?

- A. Nothing, the PRI is sending keepalives.
- **B. Layer 2 is down on the controller.**
- C. Layer 1 is down on the controller.
- D. PRI does not have an IP address configured on the interface.

Answer: B

NEW QUESTION # 349

According to QoS guidelines, what is the packet loss for streaming video?

- A. Not more than 3%
- B. Not more than 8%
- C. Not more than 5%
- D. Not more than 1%

Answer: C

Explanation:

When addressing the QoS needs of Streaming-Video traffic, the following guidelines are recommended:

- Streaming-Video (whether unicast or multicast) should be marked to DSCP CS4, as designated by the QoS Baseline.
- Loss should be no more than 5 percent.

NEW QUESTION # 350

AN engineer is implementing toll fraud prevention for incoming calls cluster-wide on cisco UCM. What is the first step to configure this feature?

- A. Set service parameter 'Block OffNet To OffNet Transfer' to True
- B. Set service parameter 'System Remote Access Blocked Numbers' to True
- C. Configure blocking for inbound calls based on caller ID.
- D. Set service parameter 'Block OffNet to OffNet Transfer' to False

Answer: D

NEW QUESTION # 351

Which data security feature is included with the Pro Pack for Cisco Webex Control Hub?

- A. Hybrid Data Security
- B. encryption in transit
- C. end-to-end encryption of content
- D. end-to-end encryption for meetings

Answer: A

NEW QUESTION # 352

A presence redundancy group is deployed, and an engineer with ID012345678 initiates a Manager fallback. Which statement about Cisco server Recovery Manager is true?

- A. disconnects all users that had been failed over, and the users must log in again
- B. disconnects all users that had been failed over
- C. restarts critical services on the secondary node
- D. restart the Cisco Presence Engine

Answer: A

Explanation:

Manual fallback - When you initiate a manual fallback, the Cisco Server Recovery Manager restarts critical services on the primary node and disconnects all users that had been failed over.

Those users must then re-login to their assigned node.
