## TDA-C01 Pass Test | TDA-C01 Valid Exam Objectives

If you are a beginner, start with the TDA-C01 learning guide of practice materials and our TDA-C01 exam questions will correct your learning problems with the help of the test engine. All contents of TDA-C01 training prep are made by elites in this area rather than being fudged by laymen. Let along the reasonable prices which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our TDA-C01 Quiz guide.

The TDA-C01 exam consists of 36 multiple-choice questions that must be completed within 120 minutes. TDA-C01 exam covers various topics such as data connection, data preparation, data analysis, and data visualization. Tableau Certified Data Analyst certification exam assesses the candidate's ability to use Tableau Desktop to create and publish interactive visualizations, perform calculations, and solve real-world data problems. The Tableau TDA-C01 Certification is a valuable credential for data analysts who want to advance their career by demonstrating their proficiency in Tableau data analysis and visualization.

## Tableau Certified Data Analyst Sample Questions (Q147-Q152):

### NEW QUESTION # 147

You have the following dashboard that contains two sheets.

You want to minimize the whitespace between the sheets.

What should you configure?

- A. The size

- B. The position
- **C. The padding**
- D. The background
- E. The border

**Answer: C**

Explanation:

To minimize the whitespace between the sheets, you should configure the padding of the sheets and the dashboard. Padding is the amount of space between the edge of a sheet or dashboard and its content. You can adjust the padding by using the Layout tab in the Format pane. You can reduce the padding for each sheet by selecting the sheet and changing the values for the inner and outer padding. You can also reduce the padding for the dashboard by selecting the dashboard and changing the values for the outer padding. Reducing the padding will make the sheets and the dashboard more compact and eliminate unnecessary whitespace.

### NEW QUESTION # 148

You have the following dataset in Microsoft Excel.

- You are using Data interpreter to cleans the dataset. Data interpreter provides the following results.
- How many rows of data will be ingested into Tableau as values?

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

Data interpreter is a feature that helps you clean and structure your data in Excel before importing it into Tableau. It detects and removes any headers, footers, subtotals, or other elements that are not part of the actual data. It also splits any merged cells and fills in any missing values. In this case, data interpreter provides the following results:

It removes the first three rows and the last two rows that contain headers and footers.

It splits the merged cells in column A and fills in the missing values with "Fiction" or "Non-Fiction".

It does not remove or change any other rows or cells.

Therefore, the number of rows of data that will be ingested into Tableau as values is 17, which is the number of rows left after removing the headers and footers. References:

[https://help.tableau.com/current/pro/desktop/en-us/importing\\_cleaning\\_up\\_data.htm](https://help.tableau.com/current/pro/desktop/en-us/importing_cleaning_up_data.htm)

[https://help.tableau.com/current/pro/desktop/en-us/importing\\_data\\_interpreter.htm](https://help.tableau.com/current/pro/desktop/en-us/importing_data_interpreter.htm) Based on the Data Interpreter's results and the provided Excel dataset screenshot, the number of rows of data that will be ingested into Tableau as values is 17. The Data Interpreter has identified and excluded headers and footers, and the rows with actual data are considered for analysis.

### NEW QUESTION # 149

You have a dashboard that contains confidential information about patients health. The data needs to always be up to date for a team of healthcare workers How should you share me dashboard with the healthcare workers?

- A. Export the dashboard as a .twbx
- B. Publish aw dashboard to Tableau Server
- **C. Print the dashboard to PDF**
- D. Publish the dashboard to Tableau Public

**Answer: C**

### NEW QUESTION # 150

You are developing a data source in Tableau Prep.

You have two tables named Orders and Employees.

The Orders table was created in 2019 and contains the following columns.

The Employees table contains all the employee information for the various sales teams in the sales department and contains the following columns

You want to prepare the data so that you can analyze sales trends over time for every sales team.

Which three actions should you perform in order? (Place the three correct options in order. Use the arrows to move Options to Answer Area. Use Answer Area arrows to re-order the options.)

**Answer:**

Explanation:

- 1 - Join the tables.
- 2 - Aggregate the data by Sales Team.
- 3 - Add the following filter to the Employees table: Sale Team - Team Alpha.

**NEW QUESTION # 151**

Open the link to Book1 found on the desktop. Open Disciplines worksheet.

Filter the table to show the Top 10 NOC based on the number of medals won.

**Answer:**

Explanation:

check the steps below in explanation

Explanation:

To filter the table to show the Top 10 NOC based on the number of medals won, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Disciplines worksheet. Click on the Disciplines tab at the bottom of the workbook to open the worksheet. You will see a table that shows the NOC, discipline, and medals for each country.

Drag Medals from the Measures pane to the Filters shelf. This will open a dialog box that allows you to filter by different criteria.

Select Top from the dialog box. This will show you options to filter by the top or bottom values of a field.

Enter 10 in the text box next to By field. This will filter by the top 10 values of Medals.

Select NOC from the drop-down list next to By field. This will filter by the top 10 values of NOC based on Medals.

Click OK to apply the filter. You will see that the table now shows only 10 rows, one for each NOC with the highest number of medals.
