Certification 300-715 Exam Dumps - 300-715 Test Passing Score

In a knowledge-based job market, learning is your quickest pathway, your best investment. Knowledge is wealth. Modern society needs solid foundation, broad knowledge, and comprehensive quality of compound talents. It is our goal that you study for a short time but can study efficiently. At present, thousands of candidates have successfully passed the 300-715 Exam with less time input. In fact, there is no point in wasting much time on invalid input. As old saying goes, all work and no play makes jack a dull boy. Our 300-715 certification materials really deserve your choice. Contact us quickly. We are waiting for you.

Cisco ISE is a comprehensive security policy management platform that provides access control and policy enforcement for network devices, endpoints, and applications. Implementing and Configuring Cisco Identity Services Engine certification exam covers topics such as ISE deployment, configuration, and integration with other Cisco security technologies. Candidates will also learn about the ISE policy enforcement process, network access control, and identity management.

Cisco 300-715 exam is a certification exam that focuses on the implementation and configuration of the Cisco Identity Services Engine (ISE). 300-715 Exam is designed for network security engineers, network administrators, and system engineers who want to demonstrate their expertise in implementing and configuring Cisco ISE solutions.

Cisco 300-715 certification exam is a 90-minute exam that consists of 60-70 questions. 300-715 exam is available in English and Japanese and is administered by Pearson VUE. To pass the exam, candidates must achieve a score of at least 750 out of 1000. 300-715 exam fee is $300, and the certification is valid for three years.

300-715 Test Passing Score & Exam 300-715 Bootcamp

Preparing for the Cisco 300-715 certification exam can be time-consuming and expensive. That's why we guarantee that our customers will pass the Implementing and Configuring Cisco Identity Services Engine (300-715) exam on the first attempt by using our product. By providing this guarantee, we save our customers both time and money, making our 300-715 Practice material a wise investment in their career development.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q41-Q46):

NEW QUESTION # 41
An engineer is creating a new authorization policy to give the endpoints access to VLAN 310 upon successful authentication. The administrator tests the 802.1X authentication for the endpoint and sees that it is authenticating successfully. What must be done to ensure that the endpoint is placed into the correct VLAN?

- A. Configure the switchport access vlan 310 command on the switch port
- B. Ensure that the endpoint is using The correct policy set
- C. Ensure that the security group is not preventing the endpoint from being in VLAN 310
- D. Add VLAN 310 in the common tasks of the authorization profile

Answer: D

Explanation:
We don't need to manually configure the switchport to a certain VLAN, give the proper VLAN allocation from the Authz profile.
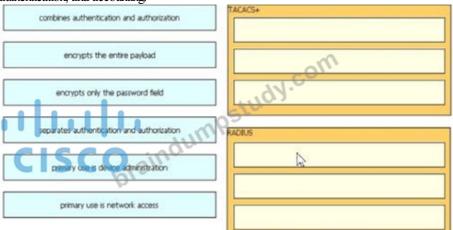

NEW QUESTION # 42
An engineer is deploying Cisco ISE to use 802.1X authentication for controlling access to the company's wired network. The request from company management is to minimize the impact on users during the rollout of 802.1X on the company switches. Which mode must be used first in a phased 802.1X deployment to fulfill this request?

- A. Closed
- B. Monitor
- C. Open
- D. Low-impact

Answer: B

NEW QUESTION # 43
Drag and drop the description from the left onto the protocol on the right that is used to carry out system authentication, authentication, and accounting.

Answer:

Explanation:

NEW QUESTION # 44

An engineer is enabling a newly configured wireless SSID for tablets and needs visibility into which other types of devices are connecting to it. What must be done on the Cisco WLC to provide this information to Cisco ISE9

- A. enable Fast Transition
- B. enable MAC filtering
- C. enable mDNS snooping
- D. enable IP Device Tracking

Answer: D

Explanation:
https://community.cisco.com/t5/security-knowledge-base/ise-secure-wired-access-prescriptive-deployment- guide/ta-p/3641515 IP Device Tracking (IPDT) is a feature that allows the Cisco WLC to track the IP addresses of devices that are connected to the wireless network. This information can then be provided to Cisco ISE, which can use it to identify the types of devices that are connecting to the network.

NEW QUESTION # 45
An engineer must use Cisco ISE to provide network access to endpoints that cannot support 802.1X. The endpoint MAC addresses must be allowlisted by configuring an endpoint identity group. These configurations were performed:
Configured an identity group named allowlist
Configured the endpoints to use the MAC address of incompatible 802.1X devices Added the endpoints to the allowlist identity group Configured an authentication policy for MAB users What must be configured?

- A. Authorization profile that has the PermitAccess permission and matches the allowlist identity group
- B. Authentication profile that has the PermitAccess permission and matches the allowlist identity group
- C. Logical profile that matches the allowlist identity group based on the configured policy
- D. Authorization policy that has the PermitAccess permission and matches the allowlist identity group

Answer: D

NEW QUESTION # 46
