

# Cisco 300-710 Securing Networks with Cisco Firepower PDF Dumps - The Fastest Way To Prepare For Exam

What's more, part of that Exams-boost 300-710 dumps now are free: <https://drive.google.com/open?id=1WBjgdolCmK8wS68Vvr-QN4olg5Lnezx>

After paying our 300-710 exam torrent successfully, buyers will receive the mails sent by our system in 5-10 minutes. Then candidates can open the links to log in and use our 300-710 test torrent to learn immediately. Because the time is of paramount importance to the examinee, everyone hope they can learn efficiently. So candidates can use our 300-710 guide questions immediately after their purchase is the great advantage of our product. The language is easy to be understood makes any learners have no obstacles. The 300-710 Test Torrent is suitable for anybody no matter he or she is in-service staff or the student, the novice or the experience people who have worked for years. The software boosts varied self-learning and self-assessment functions to check the results of the learning.

Cisco 300-710 certification exam is a valuable credential for IT professionals who want to demonstrate their expertise in securing networks with Cisco Firepower. 300-710 exam covers a range of topics related to network security, including network access control, intrusion prevention and detection, and advanced malware protection. 300-710 Exam is available in English and Japanese and can be taken at any Pearson VUE testing center worldwide.

## 300-710 Exam Reference & Reliable 300-710 Exam Dumps

Each of the Exams-boost Cisco 300-710 exam dumps formats excels in its way and carries actual Securing Networks with Cisco Firepower (300-710) exam questions for optimal preparation. All of these Securing Networks with Cisco Firepower (300-710)

practice question formats are easy to use and extremely convenient such that even newbies find them simple.

Cisco 300-710 Exam is targeted at network security engineers, network administrators, and security analysts who are responsible for protecting their organization's networks against cyber attacks. 300-710 exam covers a range of topics, including Firepower Management Center (FMC), Firepower Threat Defense (FTD), and Advanced Malware Protection (AMP). Candidates are also expected to have a good understanding of network security concepts, such as intrusion detection and prevention systems (IDS/IPS), firewall technologies, and VPNs.

## **Cisco Securing Networks with Cisco Firepower Sample Questions (Q94-Q99):**

### **NEW QUESTION # 94**

Which Cisco Firepower rule action displays an HTTP warning page?

- A. Allow with Warning
- B. Monitor
- C. Block
- D. **Interactive Block**

**Answer: D**

### **NEW QUESTION # 95**

A network administrator must create an EtherChannel Interface on a new Cisco Firepower 9300 appliance registered with an FMC for high availability. Where must the administrator create the EtherChannel interface?

- A. **FXOS CLI**
- B. FTD CLI
- C. FMC GUI
- D. FMC CLI

**Answer: A**

Explanation:

An EtherChannel interface is a logical interface that consists of a bundle of individual Ethernet links that act as a single network link. An EtherChannel interface can increase the bandwidth and reliability of a network connection<sup>5</sup>.

On a Cisco Firepower 9300 appliance registered with an FMC for high availability, the network administrator must create the EtherChannel interface on the FXOS CLI. The FXOS is the operating system that runs on the Firepower 9300 chassis and provides hardware management functions such as interface configuration, power supply status, fan speed control, and so on<sup>6</sup>.

To create an EtherChannel interface on the FXOS CLI, the network administrator can follow these steps<sup>5</sup>:

- \* Connect to the FXOS CLI using SSH or console.
- \* Enter scope eth-uplink command to enter Ethernet uplink mode.
- \* Enter create port-channel command to create an EtherChannel interface.
- \* Enter a port-channel ID (1-48) and a mode (on or active) for the EtherChannel interface.
- \* Enter add interface command to add physical interfaces to the EtherChannel interface.
- \* Enter one or more interface IDs (for example, 1/1) for the physical interfaces.
- \* Enter commit-buffer command to save the changes.

The other options are incorrect because:

- \* The FMC CLI does not provide any commands to create an EtherChannel interface on a Firepower 9300 appliance. The FMC CLI is mainly used for managing FMC settings such as backup, restore, upgrade, troubleshoot, and so on<sup>7</sup>.
- \* The FTD CLI does not provide any commands to create an EtherChannel interface on a Firepower 9300 appliance. The FTD CLI is mainly used for managing FTD settings such as routing, NAT, VPN, access control, and so on<sup>8</sup>.
- \* The FMC GUI does not provide any options to create an EtherChannel interface on a Firepower 9300 appliance. The FMC GUI is mainly used for managing FTD policies such as access control, intrusion, file, malware, and so on<sup>9</sup>.

### **NEW QUESTION # 96**

Refer to the exhibit.

## II. ASSESSMENT RESULTS

### AUTOMATING THE TUNING EFFORT

During the assessment period, the following changes to your network were observed.

NETWORK CHANGE TYPE	NUMBER OF CHANGES
A new operating system was found	310
A new host was added to the network	366
A device started using a new transport protocol	381
A device started using a new network protocol	373

An engineer is analyzing the Attacks Risk Report and finds that there are over 300 instances of new operating systems being seen on the network. How is the Firepower configuration updated to protect these new operating systems?

- A. Cisco Firepower automatically updates the policies.
- B. The administrator requests a Remediation Recommendation Report from Cisco Firepower.
- C. The administrator manually updates the policies.
- D. Cisco Firepower gives recommendations to update the policies.**

**Answer: D**
