Latest Dumps Book

In cyber age, it's essential to pass the ISO-IEC-27001-Foundation exam to prove ability especially for lots of office workers. Passing the ISO-IEC-27001-Foundation exam is not only for obtaining a paper certification, but also for a proof of your ability. Most people regard APMG-International certification as a threshold in this industry, therefore, for your convenience, we are fully equipped with a professional team with specialized experts to study and design the most applicable ISO-IEC-27001-Foundation Exam prepare.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which action is a required response to an identified residual risk?

- A. The organization shall change practices to avoid the risk occurring
- B. By default, it shall be controlled by information security awareness and training
- C. Top management shall delegate its treatment to risk owners
- **D. It shall be reviewed by the risk owner to consider acceptance**

Answer: D

Explanation:

Clause 6.1.3 (e) specifies:

"The organization shall obtain risk owners' approval of the information security risk treatment plan and acceptance of the residual information security risks." This confirms that residual risks - those remaining after risk treatment - must be reviewed and formally accepted by the designated risk owner. Option A is incorrect; awareness training is not a default control for all residual risks. Option B misrepresents leadership responsibility; top management ensures processes exist, but risk owners formally approve residual risk. Option D (avoiding risk) is a treatment option, not the mandated requirement for residual risks. Thus, the required response is C: Review and acceptance by the risk owner.

NEW QUESTION # 23

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Communicating feedback from interested parties to the organization
- **B. Ensuring information security objectives are established**
- C. Producing a risk assessment report
- D. Implementing the actions from internal audits

Answer: B

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 24

Which information is required to be included in the Statement of Applicability?

- A. The scope and boundaries of the ISMS
- B. The criteria against which risk will be evaluated
- C. The risk assessment approach of the organization

- **D. The justification for including each information security control**

Answer: D

Explanation:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

NEW QUESTION # 25

What is the definition of the term 'integrity' according to ISO/IEC 27000?

- A. The property of availability and confidentiality
- B. The property of being accessible and usable
- **C. The property of accuracy and completeness**
- D. The property that information is NOT made available inappropriately

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.35:

"Integrity is the property of accuracy and completeness."

This is one of the three core principles of information security (CIA triad):

* Confidentiality: ensuring information is not made available to unauthorized persons (related to option B).

* Integrity: ensuring data is accurate, complete, and unaltered except by authorized means.

* Availability: ensuring information is accessible and usable when required (related to option A).

Option D incorrectly mixes availability and confidentiality. The precise ISO definition is accuracy and completeness, which matches option C.

Thus, the correct verified answer is C.

NEW QUESTION # 26

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The regular activities necessary to maintain and improve the ISMS
- B. The level of quality to which the ISMS must adhere
- C. The lessons learned from the information security experiences of other organizations
- **D. The dependencies between activities performed by the organization**

Answer: D

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

NEW QUESTION # 27

.....

Our ISO-IEC-27001-Foundation study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our ISO-IEC-27001-Foundation study materials

passed their exam and got their certificate successfully, it is no doubt that it means our ISO-IEC-27001-Foundation Study Materials have a 99% pass rate. So our product will be a very good choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our ISO-IEC-27001-Foundation study materials as your study tool, our product will lend you a good helping hand.
