PMI Agile Certified Practitioner (PMI-ACP)® Sample Questions (Q326-Q331):

NEW QUESTION # 326

A globally distributed project team is using email and phone calls as the only way to share information. Delays in resolving issues often occur due to misinterpreted communications, leading to a lower team velocity. What steps should the project leader take to improve knowledge sharing?

- A. Inform the customer of the challenges and lower velocity of the project to accommodate for the slower delivery pace.

- B. Establish a live video feed between the dispersed teams to enable spontaneous engagement and collaboration on issues.
- C. Request that the customer co-locate the team to overcome the communication issues, as this is the only method to ensure agility.
- D. Meet individually with each team member to identify the issues and relay information to the remaining members through status reports.

Answer: B

NEW QUESTION # 327

How should the project manager introduce the team, communicate the importance of the team charter, and help develop a high-performing team?

A project charter has been completed and is ready for approval. The project's goal and approach have been clearly determined and a list of generalized specialists has been set.

How should the project manager introduce the team, communicate the importance of the team charter, and help develop a high-performing team?

- A. Have team members introduce one another and create a hierarchy that reflects responsibilities, roles, and decision-making.
- B. Analyze the list of all project participants and stakeholders, clarifying stakeholder roles and responsibilities.
- C. Determine roles and responsibilities among team members and promote hierarchy, responsibility, and ownership among team members.
- D. Promote consensus-driven decision-making and a shared vision for team commitments and decisions.

Answer: D

Explanation:

To create a high-performing team, the project manager should foster an environment where the team is aligned on a shared vision and empowered to make decisions collaboratively. Promoting consensus-driven decision-making helps team members feel involved and respected, and a shared vision ensures that everyone is working towards the same goal. This approach encourages teamwork, open communication, and collective ownership of the project's success, which is crucial for a high-performing team.

NEW QUESTION # 328

When estimating initial velocity, the team should most likely:

- A. Discuss with the customer their expectation for the velocity of producing the product.
- B. Use a Kanban workflow to identify steps and calculate velocity.
- C. Discuss among the team their expectations of how many story points they can address.
- D. Use velocity of past iterations or make a calculated guess.

Answer: D

NEW QUESTION # 329

The team is aware that they will need to integrate a new component to their solution in the next few weeks.

The team does not have any experience with this component.

What should the team do next?

- A. Ask for a team extension so that an engineer with the needed experience can be added to the team.
- B. Suggest that the product owner perform the initial investigation and present the outcome to the team.
- C. Propose alternative components with which the team has experience.
- D. Request that the product owner include a spike in the next iteration's backlog so they can perform an initial investigation.

Answer: C

NEW QUESTION # 330

A scrum master is observing the daily coordination meeting of an agile development team. The scrum master realizes that one of the developers is confused about a business rule for the solution they are building.

How should the scrum master address this issue?
