Customizable SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) practice exams allow you to adjust the time and SAP C-ACDET-2506 questions numbers according to your practice needs. Scenarios of our C-ACDET-2506 Practice Tests are similar to the actual C-ACDET-2506 exam. You feel like sitting in the real C-ACDET-2506 exam while taking these C-ACDET-2506 practice exams.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 2	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

2026 C-ACDET-2506: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Newest Study Reference

With C-ACDET-2506 study tool, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to C-ACDET-2506 Exam Torrent based on constantly changing syllabus and industry development breakthroughs. We also hire dedicated staff to continuously update our question bank daily, so no matter when you buy C-ACDET-2506 guide torrent, what you learn is the most advanced.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q13-Q18):

NEW QUESTION # 13
Which of the following applies to Suite Integration?

- A. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.
- B. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution
- C. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated
- D. Suite Integration represents the out of the box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud

Answer: C

NEW QUESTION # 14
In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. User with Partner Administrator can configure translation.
- B. Contact an SAP Deployment lead for customization help.
- C. Translations are included in migrations and are listed as AMLStringResource in the migration UI.
- D. Create a package to migrate translations by ICM.

Answer: C

Explanation:
In Greenfield deployments, translations for custom field labels, help tips, and validation/error messages are migrated as part of the configuration migration package and are represented in the migration UI as AMLStringResource entries. This structured approach

ensures all language-specific content is consistently moved alongside configuration settings.
While administrators and deployment leads may support translation tasks, the migration of translation strings is managed automatically via this AML-based mechanism, not through manual reconfiguration or separate ICM packages.
This ensures a seamless multilingual user experience immediately upon go-live without requiring additional manual translation imports.

NEW QUESTION # 15

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Enable Required
- B. Configure a validity condition
- C. Enable Require value before publish
- D. Configure a visibility condition

Answer: C

Explanation:
SAP Ariba provides a specific property in the Advanced tab called"Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 16

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Onboard Resource Center
- B. Partner Statement of Work
- C. Inline Help
- D. Deployment Description

Answer: D

Explanation:
TheDeployment Descriptiondocument formally defines the scope, roles, and responsibilities of the SAP Deployment Lead within a specific SAP Ariba project. It provides clarity on tasks such as migration coordination, technical issue resolution, and stakeholder communication. Other documents like the Onboard Resource Center provide logistical support, the Partner Statement of Work focuses on partner deliverables, and Inline Help offers in-application guidance-not role definitions. The Deployment Description is the authoritative reference for deployment lead responsibilities.

NEW QUESTION # 17

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- B. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- C. To advise the customer and partner in solution configurations
- D. To test and validate the solution prior to go-live

Answer: B

Explanation:
TheSAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

NEW QUESTION # 18

......

We offer free demos of the C-ACDET-2506 exam braindumps for your reference before you pay for them, for there are three versions of the C-ACDET-2506 practice engine so that we also have three versions of the free demos.
