CDPSE: Certified Data Privacy Solutions Engineer torrent & Testking CDPSE guide

Many users report to us that they are very fond of writing their own notes while they are learning. This will enhance their memory and make it easier to review. Our CDPSE exam questions have created a PDF version of the CDPSE practice material to meet the needs of this group of users. You can print the PDF version of the CDPSE learning guide so that you can carry it with you. As long as you have time, you can take it out to read and write your own experience.

ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which of the following is the BEST method of data sanitization when there is a need to balance the destruction of data and the ability to recycle IT assets?

- A. Degaussing
- B. Data deletion
- C. Cryptographic erasure
- D. Factory reset

Answer: C

Explanation:

Cryptographic erasure is a data sanitization method that uses encryption to render data unreadable and unrecoverable. It is the best method when there is a need to balance the destruction of data and the ability to recycle IT assets, because it does not damage the storage media and allows it to be reused or sold. It is also faster and more environmentally friendly than physical destruction methods.

NEW QUESTION # 16

Which of the following is the BEST approach for a local office of a global organization faced with multiple privacy-related compliance requirements?

- A. Focus on local standards before meeting global compliance.
- **B. Focus on requirements with the highest organizational impact.**
- C. Focus on global compliance before meeting local requirements.
- D. Focus on developing a risk action plan based on audit reports.

Answer: B

Explanation:

Explanation

The best approach for a local office of a global organization faced with multiple privacy-related compliance requirements is to focus on the requirements with the highest organizational impact, because this will help prioritize the most critical and urgent privacy issues and risks that may affect the organization's reputation, operations, or legal obligations. Focusing on the highest impact requirements will also help allocate the resources and efforts more efficiently and effectively, as well as align the local office's privacy practices with the global organization's objectives and strategies¹².

NEW QUESTION # 17

Which of the following BEST ensures an organization's data retention requirements will be met in the public cloud environment?

- A. Service level agreements (SLAs)
- B. Automated data deletion schedules
- C. Data classification schemes
- **D. Cloud vendor agreements**

Answer: D

Explanation:

Explanation

Cloud vendor agreements are the best way to ensure an organization's data retention requirements will be met in the public cloud environment because they define the roles, responsibilities and obligations of both parties regarding the collection, storage, processing and disposal of data in the cloud. They also specify the terms and conditions for data protection, security, privacy, compliance and auditability¹². Data classification schemes, automated data deletion schedules and service level agreements (SLAs) are useful tools to manage and monitor data retention, but they do not guarantee that the cloud vendor will adhere to the organization's data retention requirements or that they will be enforceable in case of disputes.

Participate in the management and evaluation of contracts, service levels and practices of vendors and other external parties 2: CDPSE Certified Data Privacy Solutions Engineer All-in-One Exam Guide, Chapter 2:

Privacy Governance, Section: Vendor Management

NEW QUESTION # 18

Which of the following BEST mitigates the privacy risk associated with setting cookies on a website?

- A. Ensuring nonrepudiation

- B. Obtaining user consent
- C. Implementing impersonation
- D. Applying data masking

Answer: B

Explanation:

Explanation

Obtaining user consent is the best way to mitigate the privacy risk associated with setting cookies on a website. This means that the website should inform the users about the purpose, type, and duration of the cookies, and ask for their permission before storing or accessing any cookies on their browsers. This way, the users can exercise their right to control their personal data and opt-in or opt-out of cookies as they wish.

According to the General Data Protection Regulation (GDPR), consent must be freely given, specific, informed, and unambiguous.

The website should provide clear and easy-to-understand information about the cookies and their implications for the users' privacy, and offer a simple and effective way for the users to indicate their consent or refusal. The website should also respect the users' choice and allow them to withdraw their consent at any time.

Implementing impersonation, ensuring nonrepudiation, and applying data masking are not relevant or effective methods to mitigate the privacy risk associated with setting cookies on a website. Impersonation means accessing or using data on behalf of another user, which could violate their privacy and security.

Nonrepudiation means providing proof of the origin, authenticity, and integrity of data, which does not address the issue of user consent or preference. Data masking means hiding or replacing sensitive data with fake or modified data, which does not prevent the storage or access of cookies on the user's browser.

NEW QUESTION # 19

Which of the following solutions would BEST enable a privacy practitioner to support control over data processing activities related to personal information?

- A. Data loss prevention (DLP)
- B. Enterprise resource planning (ERP)
- C. Consent management platform
- D. SIEM

Answer: C

Explanation:

A consent management platform (CMP) directly supports control over personal data processing by tracking and enforcing individuals' consent preferences across systems. SIEM (A) monitors security events, ERP (C) supports operations, and DLP (D) protects against data leakage but does not manage lawful basis for processing.

"Consent management tools ensure personal data is processed only in line with valid consent or lawful basis."

NEW QUESTION # 20

.....

The ISACA Questions PDF format can be printed which means you can do a paper study. You can also use the ISACA CDPSE PDF questions format via smartphones, tablets, and laptops.
