The Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) PDF dumps provide you with everything that you must need in 1Z0-1055-25 exam preparation and enable you to crack the final 1Z0-1055-25 exam quickly. The Oracle 1Z0-1055-25 Exam Questions are being updated on a regular basis. As you know the 1Z0-1055-25 exam syllabus is being updated on a regular basis.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.

Topic 2	<ul style="list-style-type: none"> • Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 3	<ul style="list-style-type: none"> • Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.
Topic 4	<ul style="list-style-type: none"> • Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.
Topic 5	<ul style="list-style-type: none"> • Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.

Pass Guaranteed Quiz 1Z0-1055-25 - Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Latest Accurate Study Material

In order to help customers, who are willing to buy our 1Z0-1055-25 test torrent, make good use of time and accumulate the knowledge, Our company have been trying our best to reform and update our 1Z0-1055-25 exam tool. "Quality First, Credibility First, and Service First" is our company's purpose, we deeply hope our 1Z0-1055-25 Study Materials can bring benefits and profits for our customers. So we have been persisting in updating our 1Z0-1055-25 test torrent and trying our best to provide customers with the latest 1Z0-1055-25 study materials to help you pass the 1Z0-1055-25 exam and obtain the certification.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q26-Q31):

NEW QUESTION # 26

During an expense audit, the auditor marks an expense item, which is missing a receipt, to be Short Paid. The auditor chooses to complete the audit and warn the user.

Given that the Expense Report Audit Approval is set to After Manager Approval, what are the two valid results of the auditor's action?

- A. A new expense report containing disallowed expense items is not created until the manager approves the short payment.
- B. The approved part of the expense report is not eligible for expense reimbursement.
- **C. A new expense report containing disallowed expense items is immediately created.**
- **D. The approved part of the expense report is eligible for expense reimbursement.**

Answer: C,D

NEW QUESTION # 27

Which three options are available to filter data when you submit the Prepare Payables to Ledger Reconciliation Report?

- A. Balancing Segment Value
- B. Accounting Period
- C. Business Unit
- D. Natural Account
- E. Supplier
- F. Primary Ledger

Answer: A,B,C

Explanation:

Comprehensive and Detailed In-Depth

The Prepare Payables to General Ledger Reconciliation process in Oracle Financials Cloud is essential for ensuring that your payables and general ledger data are aligned. When submitting this process, you have several parameters available to filter and select the specific data you need for reconciliation. The key parameters include:

Business Unit (Option A):

Purpose: Allows you to reconcile data for a specific business unit within your organization. This is particularly useful if your enterprise structure includes multiple business units and you need to focus on one at a time.

Reference:

Accounting Period (Option B):

Purpose: Enables you to select the accounting period (either open or closed) for which you want to prepare the reconciliation data. This ensures that the report focuses on the transactions relevant to the specified time frame.

Balancing Segment Value (Option C):

Purpose: Allows you to filter the data by specific balancing segment values, which correspond to entities like companies or divisions within your chart of accounts. This is useful for reconciling data at a more granular level.

While options D (Supplier), E (Primary Ledger), and F (Natural Account) are important attributes within the payables and general ledger modules, they are not listed as direct filter parameters for the Prepare Payables to General Ledger Reconciliation process. Therefore, the correct answers are A. Business Unit, B. Accounting Period, and C. Balancing Segment Value.

NEW QUESTION # 28

You are testing the Payables to General Ledger Reconciliation report at the ledger level for your UK Ledger. You have run and selected the extract for the report but the request returned the message: "No data to display".

What is the reason for this?

- A. You did not specify the range of liability accounts to include in the extract.
- B. You did not select the business units associated to the UK Ledger.
- C. The reconciliation flag has not been enabled for your liability accounts.
- D. The financial category of Accounts Payable is not assigned to the liability accounts.

Answer: D

NEW QUESTION # 29

You participated as a functional consultant in the implementation of Oracle Procurement as well as Payables for customer ABC Consulting. A Payables Analyst has logged a ticket stating that the "Create Supplier" task is not showing up in the Supplier work area. You checked the related settings and found that the Payables Analyst user account has been defined as a Procurement Agent. Why was the Payables Analyst NOT able to see the "Create Supplier" task in the Supplier work area?

- A. The analyst was not given the Supplier Manager role.
- B. The analyst was not given the Procurement Administrator role.
- C. The analyst was not given the Procurement Requester role.
- D. The analyst was not given the Supplier Administrator role.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Fusion Applications, access to specific tasks and functionalities is governed by the roles assigned to a user. The "Create Supplier" task within the Supplier work area is a critical function that allows authorized users to add new suppliers to the system. To access this task, a user must possess the appropriate roles that grant the necessary permissions.

A. The analyst was not given the Procurement Administrator role.

The Procurement Administrator role encompasses a broad range of procurement-related activities, including configuration and oversight functions. However, the ability to create suppliers is not inherently included within this role's permissions. Therefore, assigning the Procurement Administrator role alone would not grant access to the "Create Supplier" task.

B . The analyst was not given the Supplier Manager role.

The Supplier Manager role is specifically designed to manage supplier-related activities, including the creation and maintenance of supplier records. Assigning this role to a user provides them with the necessary permissions to access the "Create Supplier" task within the Supplier work area. In the scenario described, the absence of the Supplier Manager role is the reason the Payables Analyst cannot see the "Create Supplier" task. This is corroborated by Oracle's documentation, which states that users require the Supplier Manager role to create suppliers.

support.oracle.com

C . The analyst was not given the Supplier Administrator role.

While the Supplier Administrator role grants access to certain supplier-related functions, it does not include the permissions necessary to create new suppliers. Users with only the Supplier Administrator role may have visibility into supplier information but lack the capability to add new supplier records. Therefore, the absence of this role is not the cause of the issue.

D . The analyst was not given the Procurement Requester role.

The Procurement Requester role is intended for users who initiate purchase requisitions and related procurement activities. This role does not encompass supplier creation capabilities. Assigning the Procurement Requester role would not grant access to the "Create Supplier" task, and its absence is not related to the issue at hand.

In summary, to enable the Payables Analyst to access the "Create Supplier" task, the Supplier Manager role must be assigned to their user account. This role provides the necessary permissions to create and manage supplier records within the Oracle Fusion Applications.

NEW QUESTION # 30

You have enabled Payment Approval for your Payment Process Requests (PPR). At what stage of the PPR is the payment approval process automatically triggered?

- A. Create Payment Files
- B. Build Payments
- C. Review Installments
- **D. Review Proposed Payments**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Payment Process Request (PPR) undergoes several stages, each with specific functions and potential user interventions. When Payment Approval is enabled, the system incorporates an approval workflow to ensure that payments are reviewed and authorized before disbursement.

Stages of Payment Process Request:

Installation Selection:

Description: The system selects invoice installments based on predefined criteria such as due dates, payment methods, and supplier information.

User Action: Optional review if the "Review Installments" option is selected.

Document Validation:

Description: Validates the selected installments for completeness and correctness, ensuring all necessary information is present.

User Action: Required if there are validation errors or missing information.

Build Payments:

Description: Groups validated installments into payments based on attributes like payment date, disbursement bank account, and payment method.

User Action: None, this is an automated process.

Review Proposed Payments:

Description: Allows users to review and, if necessary, modify the proposed payments before finalizing them.

User Action: Required if the "Review Proposed Payments" option is selected.

Payment Approval:

Description: If enabled, this stage involves routing the proposed payments to designated approvers for authorization before disbursement.

User Action: Approvers must review and approve or reject the payments.

Create Payment Files:

Description: Generates the necessary payment files for disbursement, such as electronic funds transfer (EFT) files or check print files.

User Action: None, unless issues arise during file creation.

Trigger Point for Payment Approval:

The Payment Approval process is automatically triggered at the Review Proposed Payments stage. At this point, the system pauses to allow approvers to review the proposed payments and make decisions regarding their authorization. This control mechanism ensures that all payments are vetted before funds are disbursed, aligning with organizational policies and financial controls.

According to Oracle's documentation:

"If enabled, the payment process stops at the Review Proposed Payments stage. Approvers can then optionally remove payments directly from a payment process request and approve it." docs.oracle.com Analysis of Options:

A . Review Proposed Payments: Correct. This is the stage where the payment approval process is triggered, allowing approvers to review and authorize payments.

B . Create Payment Files: Incorrect. This stage occurs after payment approval and involves generating the actual payment files for disbursement.

C . Review Installments: Incorrect. This is an earlier stage where selected installments are reviewed before payments are built, but it does not involve the payment approval workflow.

D . Build Payments: Incorrect. This stage involves grouping validated installments into payments and occurs before the Review Proposed Payments stage.

Conclusion:

Enabling Payment Approval in Oracle Financials Cloud introduces a critical control point at the Review Proposed Payments stage of the Payment Process Request. This setup ensures that all proposed payments undergo managerial review and authorization before the creation of payment files and the actual disbursement of funds. Implementing this approval process helps maintain robust financial oversight and compliance within the organization's payment workflows.
