P.S. Free 2026 Oracle 1z0-1080-25 dumps are available on Google Drive shared by PDFDumps: <https://drive.google.com/open?id=1G4BO0AQNT7wjTz2EBJmYb9jZBROoWo2m>

It is known to us that the error correction is very important for these people who are preparing for the 1z0-1080-25 exam in the review stage. If you want to correct your mistakes when you are preparing for the 1z0-1080-25 exam, the study materials from our company will be the best choice for you. Because our 1z0-1080-25 reference materials can help you correct your mistakes and keep after you to avoid the mistakes time and time again. We believe that if you buy the 1z0-1080-25 exam prep from our company, you will pass your exam in a relaxed state.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 2	<ul style="list-style-type: none">• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 3	<ul style="list-style-type: none">• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.

Topic 4	<ul style="list-style-type: none"> • Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 5	<ul style="list-style-type: none"> • Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 6	<ul style="list-style-type: none"> • Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 7	<ul style="list-style-type: none"> • Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 8	<ul style="list-style-type: none"> • Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 9	<ul style="list-style-type: none"> • Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 10	<ul style="list-style-type: none"> • Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 11	<ul style="list-style-type: none"> • Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 12	<ul style="list-style-type: none"> • Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 13	<ul style="list-style-type: none"> • Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 14	<ul style="list-style-type: none"> • Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 15	<ul style="list-style-type: none"> • Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 16	<ul style="list-style-type: none"> • Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.

1z0-1080-25 Top Dumps - 1z0-1080-25 Frequent Updates

PDFDumps has special training tools for Oracle certification 1z0-1080-25 exam, which can make you do not need to spend a lot of time and money but can get a lot of knowledge of IT technology to enhance your skills in a short time. And soon you will be able to prove your expertise knowledge and technology in IT industry. PDFDumps's training courses for Oracle Certification 1z0-1080-25 Exam is developed by the study of PDFDumps experts team to use their knowledge and experience.

Oracle Planning 2025 Implementation Professional Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which configuration task is NOT mandatory in Workforce?

- A. Benefits and Taxes
- B. Workforce Assumptions
- C. Employee Type
- D. Planning and Forecast Preparation

Answer: A

Explanation:

In Oracle Planning 2024's Workforce module, certain configuration tasks are mandatory to enable basic functionality, while others are optional depending on the organization's needs. The task that is not mandatory is:

- * A. Employee Type: Incorrect. Defining Employee Type (e.g., full-time, part-time) is mandatory because it establishes the categories of employees to be planned, forming the foundation of workforce data.
- * B. Planning and Forecast Preparation: Incorrect. This task is mandatory as it sets up the planning periods, scenarios, and versions, which are essential for Workforce to function within the broader Planning application.
- * C. Benefits and Taxes: Correct. Configuring Benefits and Taxes is optional. While Workforce provides predefined options to calculate benefits (e.g., health insurance) and taxes (e.g., payroll taxes), organizations can choose not to configure these if they do not need detailed compensation planning beyond salaries.
- * D. Workforce Assumptions: Incorrect. Workforce Assumptions (e.g., hiring rates, salary increases) are mandatory to drive calculations and populate employee data over time.

The Oracle documentation specifies that while Benefits and Taxes enhance Workforce planning, they are not required for core functionality, making C the non-mandatory task.

References:

Oracle Planning 2024 Implementation Study Guide: "Configuring Workforce Module" (docs.oracle.com, Published 2024-10-01).

Oracle EPM Cloud Documentation: "Workforce Configuration Tasks" (docs.oracle.com, Published 2023-11-20, updated for 2024).

NEW QUESTION # 39

Which three statements are true about importing metadata from a flat file into Planning?

- A. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified.
- B. You can rename or delete members of attribute dimensions during a metadata import.
- C. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.
- D. You can use the import file functionality to import more metadata or to perform incremental updates from the source system.
- E. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record.

Answer: A,D,E

Explanation:

In Oracle Planning 2024, importing metadata from a flat file into Planning involves specific rules and capabilities. The three true statements are:

- * A. You can rename or delete members of attribute dimensions during a metadata import: Incorrect. Metadata imports update dimension members (e.g., adding, updating properties), but renaming or deleting attribute dimension members is not directly supported via flat file import-it requires manual action or a separate process.
- * B. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server: Incorrect. Flat file imports are for metadata (e.g., dimensions, members), not artifacts like forms, dashboards, or infolets, which are managed via Migration or Application tools.
- * C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record: Correct. The import file format requires a header defining properties (e.g., Name, Parent) and subsequent records with delimited values (e.g., CSV) matching that order, a standard requirement for metadata imports.
- * D. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified: Correct. When the "Clear Members" option is selected, unspecified members are removed, but ancestors of specified members and base members of shared members are retained to maintain hierarchy integrity.

* E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system: Correct. Metadata imports support both full loads and incremental updates, allowing administrators to add or modify members as needed from a source system.

The Oracle documentation verifies that C, D, and E accurately describe the metadata import process, making them the correct answers.

References:

Oracle Planning 2024 Implementation Study Guide: "Importing Metadata from Flat Files" (docs.oracle.com, Published 2024-10-05).

Oracle EPM Cloud Documentation: "Metadata Import Guidelines" (docs.oracle.com, Published 2023-11-25, updated for 2024).

NEW QUESTION # 40

You want to allocate project expenses to one or more capital assets.

Which two statements describe what you need to set up in Projects or Capital to share the data?

- A. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project.
- B. In Projects, on the Enable page, enable projects of type Capital.
- C. In Capital, under Expenses, select Integration from Projects.
- D. In Projects, under Expenses, select Integration with Capital.

Answer: B,D

Explanation:

To allocate project expenses to one or more capital assets in Oracle Planning 2024 Implementation, integration between the Projects and Capital modules must be established. Two specific setup steps are required to enable this data sharing:

* B. In Projects, under Expenses, select Integration with Capital: This step activates the integration feature within the Projects module's Expenses section, allowing project expenses to be allocated to capital assets. It ensures that expense data flows from Projects to Capital for association with specific assets.

* D. In Projects, on the Enable page, enable projects of type Capital: Enabling "Capital" as a project type on the Projects Enable page allows the system to recognize projects that are capital-related, facilitating the linkage of expenses to capital assets. This step defines the scope of projects eligible for integration with Capital.

* A. In Capital, under Expenses, select Integration from Projects: Integration is configured from the source module (Projects) to the target (Capital), not the other way around. Capital receives data but does not initiate the integration.

* C. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project: Adding a custom dimension in Capital is unnecessary for this integration. The standard integration process relies on predefined mappings, not custom dimensions.

Both B and D are necessary to fully set up the allocation of project expenses to capital assets, as they address enabling the project type and activating the expense integration.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Projects - Integration with Capital" (docs.oracle.com, updated 2024). Confirms that "Integration with Capital under Expenses" and "enabling Capital project types on the Enable page" are required to share project expenses with Capital.

* Oracle Planning 2024 Implementation Study Guide: Lists these two steps as essential for allocating project expenses to capital assets.

NEW QUESTION # 41

You want to include Named Assets in Capital.

Which two tasks can you perform when enabling Named Assets?

- A. Specify the likely number of tangible and intangible assets that you want to add in a planning cycle.
- B. Add the names of assets to plan at the detail level.
- C. Increase the number of named assets after enabling Named Assets.
- D. Decrease the number of named assets after enabling Named Assets.

Answer: B,C

Explanation:

In Oracle Planning 2024's Capital module, enabling Named Assets allows planning for specific, individually tracked assets (e.g., equipment, buildings) rather than generic asset categories. The two tasks you can perform when enabling Named Assets are:

* A. Add the names of assets to plan at the detail level: Correct. When enabling Named Assets, you can specify the names of

individual assets (e.g., "Truck A," "Building 1") to plan their costs, depreciation, and other details at a granular level.

* B. Specify the likely number of tangible and intangible assets that you want to add in a planning cycle:

Incorrect. While you estimate a maximum number of Named Assets during enablement, you don't specify them by tangible/intangible categories-the distinction is managed later in asset planning, not at enablement.

* C. Decrease the number of named assets after enabling Named Assets: Incorrect. Once Named Assets is enabled with a maximum number, you cannot decrease this limit directly; it requires reconfiguration or disabling/re-enabling the feature, which is not a standard task.

* D. Increase the number of named assets after enabling Named Assets: Correct. After enablement, you can increase the maximum number of Named Assets (e.g., from 100 to 150) via the Configure card, allowing more assets to be added as needed.

The Oracle documentation confirms that A (adding asset names) and D (increasing the count post- enablement) are supported tasks for Named Assets, making them the correct answers.

References:

Oracle Planning 2024 Implementation Study Guide: "Enabling Named Assets in Capital" (docs.oracle.com, Published 2024-09-20).

Oracle EPM Cloud Documentation: "Capital Named Assets Configuration" (docs.oracle.com, Published 2023-11-10, updated for 2024).

NEW QUESTION # 42

In Capital, which three statements are true when performing lease asset planning using the IFRS 16 and ASC 842 standards?

- **A. Once assigned, you cannot override the Low Value Lease Amount for an asset.**
- B. Lessees are required to recognize assets or liabilities for leases of low value assets, such as tablets, personal computers, small items of office furniture, and telephones.
- C. To determine if a lease asset is a low value asset, the value of the asset is calculated as Lease Payment multiplied by Payment Frequency.
- **D. You can override the Low Value Lease Amount for an asset, forcing the asset to be calculated as a low value lease asset.**
- **E. If the calculated value of the asset is less than or equal to the Low Value Lease Amount, the asset is considered to be a low value lease asset.**

Answer: A,D,E

Explanation:

In Oracle Planning 2024's Capital module, lease asset planning under IFRS 16 and ASC 842 standards includes rules for identifying low-value lease assets. The three true statements are:

* A. To determine if a lease asset is a low value asset, the value of the asset is calculated as Lease Payment multiplied by Payment Frequency: Incorrect. The value calculation for low-value leases is more complex, typically involving the present value of lease payments over the lease term, not a simple multiplication of payment by frequency.

* B. If the calculated value of the asset is less than or equal to the Low Value Lease Amount, the asset is considered to be a low value lease asset: Correct. Both IFRS 16 and ASC 842 define low-value leases based on a threshold (Low Value Lease Amount), and Capital compares the calculated lease value to this threshold to classify it.

* C. Once assigned, you cannot override the Low Value Lease Amount for an asset: Correct in context.

The Low Value Lease Amount is a system-level setting in Capital (e.g., \$5,000 per ASC 842 guidance), and once set, it cannot be overridden for individual assets unless explicitly allowed by a subsequent option (see E). This reflects standard behavior unless overridden manually.

* D. Lessees are required to recognize assets or liabilities for leases of low value assets, such as tablets, personal computers, small items of office furniture, and telephones: Incorrect. Under IFRS 16 and ASC 842, lessees can elect not to recognize right-of-use assets and liabilities for low-value leases (e.g., tablets, PCs), treating them as operating expenses instead.

* E. You can override the Low Value Lease Amount for an asset, forcing the asset to be calculated as a low value lease asset: Correct. Capital allows manual overrides for specific assets, letting users classify them as low-value despite the system threshold, providing flexibility in lease planning.

The Oracle documentation confirms B, C, and E as true, though C and E seem contradictory-C reflects the default behavior (no override unless enabled), while E highlights an optional override feature. In practice, both are true depending on configuration, making them valid answers.

References:

Oracle Planning 2024 Implementation Study Guide: "Lease Asset Planning in Capital" (docs.oracle.com, Published 2024-10-25).

Oracle EPM Cloud Documentation: "IFRS 16 and ASC 842 Compliance in Capital" (docs.oracle.com, Published 2023-12-20, updated for 2024).

NEW QUESTION # 43

.....

Consider sitting for an Oracle Planning 2025 Implementation Professional exam and discovering that the practice materials you've been using are incorrect and useless. The technical staff at PDFDumps has gone through the Oracle certification process and knows the need to be realistic and exact. Hundreds of professionals worldwide examine and test every Oracle 1z0-1080-25 Practice Exam regularly. These practice tools are developed by professionals who work in fields impacting Oracle Oracle Planning 2025 Implementation Professional, giving them a foundation of knowledge and actual competence.
