

Free AIP-210 Exam Dumps & AIP-210 Valid Exam Testking

What's more, part of that Actual4Exams AIP-210 dumps now are free: https://drive.google.com/open?id=1roop81XiVYt_TiBsmjYTqmCDkBqD_NkX

Actual4Exams provides CertNexus Certified Artificial Intelligence Practitioner (CAIP) (AIP-210) practice tests (desktop and web-based) to its valuable customers so they get the awareness of the AIP-210 certification exam format. Likewise, CertNexus Certified Artificial Intelligence Practitioner (CAIP) (AIP-210) exam preparation materials for AIP-210 exam can be downloaded instantly after you make your purchase.

The more you can clear your doubts, the more easily you can pass the CertNexus Certified Artificial Intelligence Practitioner (CAIP) (AIP-210) exam. Actual4Exams AIP-210 practice test works amazingly to help you understand the AIP-210 exam pattern and how you can attempt the real CertNexus Exam Questions. It is just like the final AIP-210 exam pattern and you can change its settings. When you take Actual4Exams CertNexus AIP-210 Practice Exams, you can know whether you are ready for the finals or not. It shows you the real picture of your hard work and how easy it will be to clear the AIP-210 exam if you are ready for it.

AIP-210 Valid Exam Testking, AIP-210 Exam Simulator Fee

Our AIP-210 training quiz will be your best teacher who helps you to find the key and difficulty of the exam, so that you no longer feel confused when review. Our AIP-210 study materials will be your best learning partner and will accompany you through every day of the review. Our AIP-210 Exam Quiz will help you to deal with all the difficulties you have encountered in the learning process and make you walk more easily and happily on the road of studying.

CertNexus AIP-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Identify potential ethical concerns• Analyze machine learning system use cases

Topic 2	<ul style="list-style-type: none"> • Recognize relative impact of data quality and size to algorithms • Engineering Features for Machine Learning
Topic 3	<ul style="list-style-type: none"> • Understanding the Artificial Intelligence Problem • Analyze the use cases of ML algorithms to rank them by their success probability

CertNexus Certified Artificial Intelligence Practitioner (CAIP) Sample Questions (Q76-Q81):

NEW QUESTION # 76

An organization sells house security cameras and has asked their data scientists to implement a model to detect human feces, as distinguished from animals, so they can alert th customers only when a human gets close to their house.

Which of the following algorithms is an appropriate option with a correct reason?

- A. Neural network model, because this is a classification problem with a large number of features.
- B. k-means, because this is a clustering problem with a small number of features.
- C. Logistic regression, because this is a classification problem and our data is linearly separable.
- D. A decision tree algorithm, because the problem is a classification problem with a small number of features.

Answer: A

Explanation:

Neural network models are suitable for classification problems with a large number of features, because they can learn complex and non-linear patterns from high-dimensional data. They can also handle image data, which is likely to be the input for the human face detection problem. Neural networks can also be trained using transfer learning, which can leverage pre-trained models on similar tasks and improve the accuracy and efficiency of the model. References: [Neural network - Wikipedia], [Transfer Learning - Machine Learning's Next Frontier]

NEW QUESTION # 77

A data scientist is tasked to extract business intelligence from primary data captured from the public. Which of the following is the most important aspect that the scientist cannot forget to include?

- A. Data privacy
- B. Cybersecurity
- C. Cyberprotection
- D. Data security

Answer: A

Explanation:

Data privacy is the right of individuals to control how their personal data is collected, used, shared, and protected. It also involves complying with relevant laws and regulations that govern the handling of personal data. Data privacy is especially important when extracting business intelligence from primary data captured from the public, as it may contain sensitive or confidential information that could harm the individuals if misused or breached .

NEW QUESTION # 78

Below are three tables: Employees, Departments, and Directors.

Employee_Table

ID	Firstname	Lastname	Age	Salary	Dept
1256	Jake	Burton	33	\$ 68,230	IT
3489	Zoe	Clark	22	\$ 65,000	IT
4577	Ciara	Ortiz	47	\$ 75,625	Analyst
8900	Josh	Green	28	\$ 43,670	HR

Department_Table

ID	Name	Director ID
1	Accountants	4566
2	HR	1230
3	Analyst	9077
4	IT	1346
5	Legal	2088

Director_Table

ID
 Firstname
 Lastname
 Age

Which SQL query provides the Directors' Firstname, Lastname, the name of their departments, and the average employee's salary?

- A. `SELECT m.Firstname, m.Lastname, d.Name, AVG(e.Salary) as Dept_avg_Salary FROM Employee_Table as e RIGHT JOIN Department_Table as d on e.Dept = d.Name INNER JOIN Directorjable as m on d.ID = m.DeptID GROUP BY e.Salary`
- **B. `SELECT m.Firstname, m.Lastname, d.Name, AVG(e.Salary) as Dept_avg_Salary FROM Employee_Table as e RIGHT JOIN Department_Table as d on e.Dept = d.Name INNER JOIN Directorjable as m on d.ID = m.DeptID GROUP BY m.Firstname, m.Lastname, d.Name`**
- C. `SELECT m.Firstname, m.Lastname, d.Name, AVG(e.Salary) as Dept_avg_Salary FROM Employee_Table as e RIGHT JOIN Departmentjable as d on e.Dept = d.Name INNER JOIN Directorjable as m on d.ID = m.DeptID GROUP BY d.Name`
- D. `SELECT m.Firstname, m.Lastname, d.Name, AVG(e.Saiary) as Dept_avg_Saiary FROM Employee_Table as e LEFT JOIN Department_Table as d on e.Dept = d.Name LEFT JOIN Directorjable as m on d.ID = m.DeptID GROUP BY m.Firstname, m.Lastname, d.Name`

Answer: B

Explanation:

This SQL query provides the Directors' Firstname, Lastname, the name of their departments, and the average employee's salary by joining the three tables using the appropriate join types and conditions. The RIGHT JOIN between Employee_Table and Department_Table ensures that all departments are included in the result, even if they have no employees. The INNER JOIN between Department_Table and Directorjable ensures that only departments with directors are included in the result. The GROUP BY clause groups the result by the directors' names and departments' names, and calculates the average salary for each group using the AVG function. References: SQL Joins - W3Schools, SQL GROUP BY Statement - W3Schools

NEW QUESTION # 79

Which two of the following statements about the beta value in an A/B test are accurate? (Select two.)

- A. The Beta in an Alpha/Beta test represents one of the two variants of the A/B test.
- B. The statistical power of a test is the inverse of the Beta value, or $1 - \text{Beta}$.
- **C. The Beta value is the rate of type II errors for the test.**
- D. The Beta value is the rate of type I errors for the test.

Answer: C

Explanation:

The Beta value in an A/B test is the probability of making a type II error, which is failing to reject the null hypothesis when it is false. The statistical power of a test is the probability of correctly rejecting the null hypothesis when it is false, which is equal to $1 - \text{Beta}$. References: Formulas for Bayesian A/B Testing - Evan Miller, The Practical Guide To AB testing statistics | Convertize

NEW QUESTION # 80

Which two of the following decrease technical debt in ML systems? (Select two.)

- A. Design anti-patterns
- **B. Documentation readability**
- **C. Refactoring**
- D. Boundary erosion
- E. Model complexity

Answer: B,C

Explanation:

Technical debt is a metaphor that describes the implied cost of additional work or rework caused by choosing an easy or quick solution over a better but more complex solution. Technical debt can accumulate in ML systems due to various factors, such as changing requirements, outdated code, poor documentation, or lack of testing. Some of the ways to decrease technical debt in ML

systems are:

* **Documentation readability:** Documentation readability refers to how easy it is to understand and use the documentation of an ML system. Documentation readability can help reduce technical debt by providing clear and consistent information about the system's design, functionality, performance, and maintenance. Documentation readability can also facilitate communication and collaboration among different stakeholders, such as developers, testers, users, and managers.

* **Refactoring:** Refactoring is the process of improving the structure and quality of code without changing its functionality. Refactoring can help reduce technical debt by eliminating code smells, such as duplication, complexity, or inconsistency. Refactoring can also enhance the readability, maintainability, and extensibility of code.

NEW QUESTION # 81

.....

Generally speaking, a satisfactory AIP-210 study material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our AIP-210 Practice Questions contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our AIP-210 exam materials.
