Latest Study Plat-Admn-202 Questions, Plat-Admn-202 Test Questions Vce

If you search for exam materials for your coming exam, you will find that there are so many websites to choose from. And our website is the most reliable one. You can just compare the quality and precision of the Plat-Admn-202 exam questions with ours. Then you will find that our Plat-Admn-202 Study Materials are the best among all the study sources available to you. And we have become a famous brand in this career. You won't regret for your choice.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 2	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 3	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 4	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 5	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Salesforce Certified Platform App Builder Sample Questions (Q84-Q89):

NEW QUESTION # 84
Cloud Kicks works on an annual subscription model. When a sales rep marks an opportunity as closed won, a new opportunity should automatically be created for the renewal. The contracts team works outside of Salesforce but also needs to be notified about closed deals in order to initiate the contract process with the customer.
Which automation solution would meet these requirements?

- A. Approval Process
- B. Workflow Rule
- C. Validation Rule
- D. Process Builder

Answer: D

Explanation:
The automation solution that would meet these requirements is Process Builder. Process Builder is a tool that can create and update records, send email alerts, submit records for approval, invoke flows, call Apex classes, and post to Chatter based on certain criteria and actions. The app builder can use Process Builder to create a process that starts when an opportunity is marked as closed won, creates a new opportunity record for the renewal with pre-populated fields, and sends an email alert to the contracts team. Option A is incorrect because an approval process is not suitable for this requirement, as approval processes are used to define the steps and criteria for approving records. Option B is incorrect because a validation rule is not suitable for this requirement, as validation rules are used to enforce data quality and prevent users from saving invalid records. Option D is incorrect because a workflow rule is not suitable for this requirement, as workflow rules are considered legacy tools and have limitations compared to Process Builder.

NEW QUESTION # 85
Universal Containers is expecting impacts to operations due to increased demand. The executive team will be reaching out to current customers and want to see the number of open cases for the account and parent account.
Which two tools could an app builder combine to display the number of open cases on the account page?
Choose 2 answers

- A. Workflow
- B. Approval Process
- C. Flow
- D. Process Builder

Answer: C,D

Explanation:
The two tools that an app builder could combine to display the number of open cases on the account page are Flow and Process Builder. Flow is a tool that allows the app builder to create a declarative automation that can query, manipulate, and display data from multiple objects. Process Builder is a tool that allows the app builder to create a trigger-based automation that can invoke a Flow when a record is created or updated. By using these two tools, the app builder can create a solution that can query the number of open cases for the account and parent account and display them on the account page using a screen element. Workflow is not a suitable tool, as it cannot query or display data from multiple objects. It can only perform actions such as field updates, email alerts, tasks, or outbound messages. Approval Process is not a suitable tool, as it is used to automate the approval of records based on certain criteria and predefined steps. It cannot query or display data from multiple objects.

NEW QUESTION # 86
Cloud Kicks wants to display the number of opportunities that are Closed Won with a Close Date within the last year on the Account detail page.
Which tool should an app builder use to implement this?

- A. Roll-Up Summary Field
- B. Workflow Rule
- C. Activity Timeline
- D. Process Builder

Answer: A

Explanation:
A roll-up summary field is a field that calculates values from related records. A roll-up summary field can be used to display the number of opportunities that are closed won with a close date within the last year on the account detail page by using a filter criteria on the field.

NEW QUESTION # 87

Universal Containers wants some enhancements on its Opportunity page layout to improve efficiency and collaboration.
Which two solutions should an app builder suggest to help meet these requirements?
Choose 2 answers

- A. Set up an approval process requiring manager consent at each stage of the Opportunity.
- B. Use two Tabs components to separate record information from activities.
- C. Add a Path component with fields and instructions aligning to stages on the Opportunity.
- D. Mark stage dependent fields as required on the Opportunity page layout.

Answer: C,D

Explanation:
Marking stage dependent fields as required on the Opportunity page layout is a good solution to improve efficiency and data quality, as it ensures that users enter the necessary information for each stage of the sales process. Adding a Path component with fields and instructions aligning to stages on the Opportunity is another good solution to improve efficiency and collaboration, as it provides guidance and best practices for users to move the Opportunity along the sales cycle. Using two Tabs components to separate record information from activities may not be an optimal solution, as it may reduce the visibility and accessibility of important data. Setting up an approval process requiring manager consent at each stage of the Opportunity may not be a feasible solution, as it may introduce unnecessary delays and complexity in the sales process

NEW QUESTION # 88

Northern Trail Outfitters uses a custom object to track travel requests. Rangers want to have automatic posts on a record whenever a travel request has been approved.
Which feature should be used to accomplish this?

- A. Feed quick action
- B. Feed tracking
- C. Workflow rule
- D. Auto-response rule

Answer: B

Explanation:
To have automatic posts on a record whenever a travel request has been approved, feed tracking should be used. Feed tracking enables field updates to be displayed in the Chatter feed of a record or a user profile. Users can follow records or users to see updates in their own feed. Feed tracking can be enabled for standard or custom objects and selected fields.

NEW QUESTION # 89

......

In compliance with syllabus of the exam, our Plat-Admn-202 practice materials are determinant factors giving you assurance of smooth exam. Our Plat-Admn-202 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So, they are specified as one of the most successful Plat-Admn-202 practice materials in the line. They can renew your knowledge with high utility with Favorable prices. So, they are reliably rewarding Plat-Admn-202 practice materials with high utility value.
