220-1102 Study Guide: CompTIA A+ Certification Exam: Core 2 & 220-1102 Dumps Torrent & 220-1102 Latest Dumps

To fit in this amazing and highly accepted exam, you must prepare for it with high-rank practice materials like our 220-1102 study materials. They are the Best choice in terms of time and money. All contents of 220-1102 training prep are made by elites in this area rather than being fudged by laymen. Let along the reasonable prices which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our 220-1102 Quiz guide.

The CompTIA 220-1102 Exam is designed for IT professionals who have already earned the CompTIA 220-1001 certification or have equivalent knowledge and experience. It is recommended for individuals who want to pursue a career in IT support, help desk, or technical support roles. CompTIA A+ Certification Exam: Core 2 certification is recognized by major IT companies and can lead to better job opportunities and higher salaries.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q387-Q392):

NEW QUESTION # 387
A technician is setting up a newly built computer. Which of the following is the fastest way for the technician to install Windows 10?

- A. System Restore
- B. In-place upgrade
- C. Unattended installation
- D. Factory reset

Answer: C

Explanation:

Windows 10
The correct answer is D. Unattended installation. An unattended installation is a way of installing Windows 10 without requiring any user input or interaction. It uses a configuration file called answer file that contains the settings and preferences for the installation, such as the product key, language, partition, and network settings.An unattended installation can be performed by using a bootable USB flash drive or DVD that contains the Windows 10 installation files and the answer file1. This is the fastestway for the technician to install Windows 10 on a newly built computer, as it automates the whole process and saves time.
A factory reset is a way of restoring a computer to its original state by deleting all the data and applications and reinstalling the operating system.A factory reset can be performed by using the recovery partitionor media that came with the computer, or by using the Reset this PC option in Windows 10 settings2. A factory reset is not a way of installing Windows 10 on a newly built computer, as it requires an existing operating systemto be present.
A system restore is a way of undoing changes to a computer's system files and settings by using a restore point that was created earlier.A system restore can be performed by using the System Restore option in Windows 10 settings or by using the Advanced Startup Options menu3. A system restore is not a way of installing Windows 10 on a newly built computer, as it requires an existing operating systemand restore points to be present.
An in-place upgrade is a way of upgrading an existing operating systemto a newer version without losing any data or applications. An in-place upgrade can be performed by using the Windows 10 Media Creation Tool or by running the Setup.exe file from the Windows 10 installation media. An in-place upgrade is not a way of installing Windows 10 on a newly built computer, as it requires an existing operating systemto be present.

NEW QUESTION # 388
A company wants to take advantage of modern technology and transition away from face-to-face meetings.
Which of the following types of software would benefit the company the most? (Select two).

- A. Record-keeping
- B. File transfer
- C. Financial

- D. Videoconferencing
- E. Screen-sharing
- F. Remote access

Answer: D,E

Explanation:
For a company looking to transition away from face-to-face meetings, videoconferencing and screen-sharing software would be most beneficial.
Videoconferencing software allows participants to conduct virtual meetings with audio and video capabilities, effectively simulating a face-to-face interaction without the need for physical presence.
This can greatly reduce travel costs and time while maintaining the personal touch of meetings.
Screen-sharing enables participants in a virtual meeting to view one another's computer screens in real time. This is particularly useful for presentations, collaborative work, and troubleshooting, as it allows for a more interactive and engaging meeting experience.
Both technologies support the company's goal of leveraging modern technology to enhance communication and collaboration while reducing reliance on physical meetings.

NEW QUESTION # 389
A company's assets are scanned annually. Which of the following will most likely help the company gain a holistic view of asset cost?

- A. Creating a database
- B. Assigning users to assets
- C. Updating the procurement account owners
- D. Inventorying asset tags

Answer: A

Explanation:
Creating a database is the most likely option to help the company gain a holistic view of asset cost. A database can store and organize information about the assets, such as purchase date, depreciation value, maintenance cost, warranty status, and replacement cost. Assigning users to assets, inventorying asset tags, and updating the procurement account owners are important steps for asset management, but they do not directly provide a holistic view of asset cost. NEW QUESTION # 390
APC is taking a long time to boot Which of the following operations would be best to do to resolve the issue at a minimal expense? (Select two).

- A. Installing additional RAM
- B. Running the Disk Cleanup utility
- C. Removing the applications from startup
- D. Defragmenting the hard drive
- E. Ending the processes in the Task Manager
- F. Installing a faster SSD

Answer: B,C

Explanation:
Explanation
The best operations to do to resolve the issue of a long boot time at a minimal expense are B. Removing the applications from startup and D. Running the Disk Cleanup utility. These are two simple and effective ways to speed up your PC's boot time without spending any money on hardware upgrades.
Removing the applications from startup means preventing unnecessary programs from launching automatically when you turn on your computer. This can reduce the load on your system resources and make the boot process faster. You can do this in Windows 10 by pressing Ctrl + Alt + Esc to open the Task Manager, and going to the Startup tab. There, you can see a list of programs that start with your computer, and their impact on the startup performance. You can disable any program that you don't need by right-clicking on it and choosing Disable12.
Running the Disk Cleanup utility means deleting temporary files, system files, and other unnecessary data that may be taking up

space and slowing down your computer. This can free up some disk space and improve the performance of your system. You can do this in Windows 10 by typing disk cleanup in the search box and selecting the Disk Cleanup app. There, you can choose which files you want to delete, such as Recycle Bin, Temporary Internet Files, Thumbnails, etc. You can also click on Clean up system files to delete more files, such as Windows Update Cleanup, Previous Windows installation(s), etc34.

NEW QUESTION # 391

A technician is troubleshooting an issue involving programs on a Windows 10 machine that are loading on startup but causing excessive boot times. Which of the following should the technician do to selectively prevent programs from loading?

- A. Open the Startup tab and methodically disable items currently listed as enabled and reboot, checking for issue resolution at each startup.
- B. Manually disable all startup tasks currently listed as enabled and reboot checking for issue resolution at startup
- C. Remark out entries listed HKEY_LOCAL_MACHINE>SOFTWARE>Microsoft>Windows>CurrentVersion>Run
- D. Right-click the Windows button, then select Run entering shell startup and clicking OK, and then move items one by one to the Recycle Bin

Answer: A

Explanation:
This is the most effective way to selectively prevent programs from loading on a Windows 10 machine. The Startup tab can be accessed by opening Task Manager and then selecting the Startup tab. From there, the technician can methodically disable items that are currently listed as enabled, reboot the machine, and check for issue resolution at each startup. If the issue persists, the technician can then move on to disabling the next item on the list.
