2026 Updated Oracle 1z0-1057-25: Valid Oracle Project Management Cloud 2025 Implementation Professional Test Prep

SurePassExams offers actual and updated Oracle 1z0-1057-25 Dumps after seeing the students struggling to prepare quickly for the test. We have made this product after consulting with a lot of professionals so the students can be successful. SurePassExams has

hired a team of professionals who work on a daily basis without caring about themselves to update the Oracle 1z0-1057-25 practice material.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q60-Q65):

NEW QUESTION # 60

Your organization wants to capture the project details for work order labor and equipment resource transactions as part of a project-driven supply chain solution.

Which expenditure type class is recommended for the expenditure types that need to be defined for these type of transactions?

- **A. Work In Process**
- B. Usages
- C. Inventory
- D. Supplier Invoice

Answer: A

Explanation:

The expenditure type class that is recommended for the expenditure types that need to be defined for work order labor and equipment resource transactions is Work In Process. This class indicates that the transactions are related to work orders that are performed as part of a project-driven supply chain solution. This class also allows the transactions to be processed by Oracle Fusion Manufacturing applications and transferred to Oracle Fusion Project Costing applications. Supplier Invoice is not a valid expenditure type class for work order labor and equipment resource transactions. This class indicates that the transactions are related to supplier invoices that are entered in Oracle Fusion Payables applications and transferred to Oracle Fusion Project Costing applications. Usages is not a valid expenditure type class for work order labor and equipment resource transactions. This class indicates that the transactions are related to material usages that are entered in Oracle Fusion Inventory Management applications and transferred to Oracle Fusion Project Costing applications. Inventory is not a valid expenditure type class for work order labor and equipment resource transactions. This class indicates that the transactions are related to inventory movements that are entered in Oracle Fusion Inventory Management applications and transferred to Oracle Fusion Project Costing applications. NEW QUESTION # 61

When scheduling the Update Project Performance Data process to run on a periodic basis, which summarization method would you select? (Choose the best answer.)

- A. Bulk
- B. Summary
- C. Detail
- **D. Incremental**

Answer: D

Explanation:

Reference <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/define-project-organizations.html#OAPFM177674> Settings That Affect Performance Data Summarization You can summarize performance data for a project unit, business unit, a range of projects, or projects managed by a project manager. When you run the Update Project Performance Data process from the Scheduled Processes page, select one of the summarization methods from the following table:

Summarization Method

Usage

Incremental

Summarizes new transactions that are yet to be summarized

Delete and re-summarize

Correct summary data when the source system data changes outside the regular transaction flow.

Do not use this summarization method when you run the Update Project Performance Data Without Producing Report process unless you are advised to do so.

Resource breakdown structure

Migrate all summary data from one resource breakdown structure version to the next.

If you select this option, you must also specify the resource breakdown structure header.

NEW QUESTION # 62

Your client is involved in automation control systems installation. Over the years, they have analyzed their total project spend on specific resource classes. They have identified that their cost spread distribution factor on a 10 spread point scale resembles: 0-4-10-11-14-13-10-4-0-0. Identify two ways to handle this kind of a spread on their budgets and forecasts. (Choose two)

- A. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to a project template.
- B. Use the predefined Bell Curve spread with small deviations on the spread points.
- C. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to the resource class.
- D. Use the predefined S-Curve spread with small deviations on the spread points.

Answer: A,C

Explanation:

To handle a custom spread on budgets and forecasts, you can either create a new spread curve or edit an existing one to match the desired spread points. Then, you can attach the spread curve to a project template or a resource class, depending on whether you want to apply it to all projects using that template or all transactions using that resource class. <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/define-project-budgets-and-forecasts.html#OAPFM2355819>

NEW QUESTION # 63

Stigma Consulting wants to implement the program management capability to coordinate and track their strategic programs. Which three components are required to configure the program options as part of implementing the program management capability? (Choose three.)

- A. Calendar
- B. Derivation Methods
- C. Calculation Methods
- D. Accounting Methods
- E. Currencies

Answer: A,B,C

Explanation:

Program management is a capability that allows you to coordinate and track multiple related projects and tasks as part of a strategic program. To configure the program options as part of implementing the program management capability, you need to define three components:

* Calendar: This component allows you to specify the calendar that is used to calculate the dates and durations for the program and its projects and tasks.

* Calculation Methods: This component allows you to specify the methods that are used to calculate the progress, performance, and variance measures for the program and its projects and tasks based on various sources and formulas.

* Derivation Methods: This component allows you to specify the methods that are used to derive the attributes and values for the program and its projects and tasks based on various rules and conditions.

Currencies and Accounting Methods are not components that are required to configure the program options. Currencies are used to define the currency conversion rates and rules for the program and its projects and tasks. Accounting Methods are used to define the subledger accounting rules and options for the program and its projects and tasks. Reference:

<https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-programs.html#OAPFM2356261>

NEW QUESTION # 64

Which three are valid password complexity criteria while setting up password policies? (Choose three.)

- A. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character
- B. Complex: At least 8 characters, 1 uppercase, and 1 number
- C. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters
- D. Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character
- E. Simple: At least 8 characters and 1 number

Answer: A,B,C

Explanation:

Password complexity criteria are criteria that determine how strong or secure a password must be for a user account. Password complexity criteria can include requirements such as minimum length, uppercase letters, lowercase letters, numbers, special characters, etc. Three of the valid password complexity criteria while setting up password policies are:

* Complex: At least 8 characters, 1 uppercase, and 1 number

* Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters

* Very Simple: At least 8 characters, 1 uppercase, 1 number, and 1 special character
Simple: At least 8 characters and 1 number is not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum security standards for Oracle Cloud applications.

Very Simple: At least 6 characters, 1 uppercase, 1 number, and 1 special character is also not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum length requirement of 8 characters for Oracle Cloud applications. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/set-up-project-financial-management.htm#OAPFM2356271>

NEW QUESTION # 65

.....

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our 1z0-1057-25 exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the 1z0-1057-25 exam than other study materials. It is very economical that you just spend 20 or 30 hours then you have the 1z0-1057-25 certificate in your hand, which is typically beneficial for your career in the future. Therefore, purchasing the 1z0-1057-25 guide torrent is the best and wisest choice for you to prepare your test.
