## **SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q71-Q76):**

### **NEW QUESTION # 71**

Which system tenant is the first to be provisioned when implementing SAP S/4HANA Cloud, public edition?

- A. Central Business Configuration system
- B. SAP Cloud Identity Services
- C. SAP S/4HANA Cloud Development system
- D. SAP S/4HANA Cloud Sandbox system

### **Answer: A**

Explanation:

The implementation of SAP S/4HANA Cloud Public Edition involves provisioning multiple system tenants in a specific sequence to support configuration, testing, and production. The first tenant provisioned sets the foundation for subsequent activities.

\* Option A: SAP S/4HANA Cloud Sandbox systemIncorrect. The Sandbox system is provisioned later for prototyping and testing, not as the first tenant. The SAP S/4HANA Cloud Implementation Guide states, "The Sandbox system is provisioned after initial configuration to support exploration and testing, not as the first tenant."

\* Option B: SAP S/4HANA Cloud Development systemIncorrect. There is no dedicated Development system in SAP S/4HANA Cloud Public Edition; development occurs in other systems. The SAP S/4HANA Cloud Study Guide notes, "Development activities are handled in Sandbox or Test systems, not a separate Development tenant."

\* Option C: SAP Cloud Identity ServicesIncorrect. SAP Cloud Identity Services manage user authentication but are not the first tenant provisioned for implementation. The SAP S/4HANA Cloud Security Guide clarifies, "SAP Cloud Identity Services are configured alongside implementation systems, not as the initial tenant."

\* Option D: Central Business Configuration systemCorrect. The Central Business Configuration (CBC) system is the first tenant provisioned, enabling scoping and configuration of the SAP S/4HANA Cloud solution. The SAP Central Business Configuration Guide explains, "The Central Business Configuration system is the first tenant provisioned in SAP S/4HANA Cloud Public Edition, providing the platform for defining scope, organizational structure, and pre-configuration." Extract from Official Documentation:

\* SAP Central Business Configuration Guide (SAP Help Portal, <https://help.sap.com>): "The Central Business Configuration system is the first tenant provisioned when implementing SAP S/4HANA Cloud Public Edition, enabling the initial scoping and configuration of the solution."

\* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>):

"Implementation begins with the provisioning of the Central Business Configuration system, which serves as the foundation for defining the SAP S/4HANA Cloud solution scope and settings." Additional Context:

The CBC system is critical for initiating the implementation, as it allows customers to define the solution scope, activate SAP Best Practices, and configure organizational structures before other systems like the Starter or Sandbox are provisioned. This ensures a standardized and efficient setup process.

### **NEW QUESTION # 72**

How do you define the term Organizational Change Management?

- A. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with focus on the added value for the impacted users.
- B. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state with intended business benefits.
- C. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a current to a future state with focus on the added value for the impacted users.
- D. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with intended business benefits.

### **Answer: B**

Explanation:

Organizational Change Management (OCM) is a critical discipline in SAP S/4HANA Cloud Public Edition projects, ensuring successful adoption by managing the human aspects of change. The definition must reflect its comprehensive and structured nature.

\* Option A: It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with focus on the added value for the impacted users. Incorrect. While comprehensive and structured, OCM is not limited to transitioning to an agile setup; it applies to any future state. The SAP S/4HANA Cloud OCM Guide clarifies, "OCM is not specific to agile transformations but supports transitions to any desired future state."

\* Option B: It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state with intended business benefits. Correct.

This definition captures OCM's broad, structured, and benefit-focused approach. The SAP Activate Methodology Guide defines OCM as, "A comprehensive, cyclic, and structured approach to transition individuals, groups, and organizations from a current to a future state, delivering intended business benefits through managed change."

\* Option C: It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with intended business benefits. Incorrect. OCM is not selective, singular, or intuitive; it is systematic and comprehensive. The SAP OCM Guide states, "OCM is a structured, not intuitive, process that applies broadly, not selectively, to organizational transitions."

\* Option D: It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a current to a future state with focus on the added value for the impacted users. Incorrect. The selective and intuitive aspects are inaccurate, and the focus on user value is too narrow. The SAP S/4HANA Cloud Study Guide notes, "OCM focuses on business benefits, not solely user value, through a comprehensive, structured approach." Extract from Official Documentation:

\* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Organizational Change Management is defined as a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state, with a focus on achieving intended business benefits."
