format is perfect for busy test takers who prefer to study for the SAP Certified Associate - Data Analyst - SAP Analytics Cloud (C_SAC_2501) exam on the go. Questions bank in the DumpsTests SAP C_SAC_2501 Pdf Dumps is accessible via all smart devices. We also update SAP Certified Associate - Data Analyst - SAP Analytics Cloud (C_SAC_2501) PDF questions regularly to ensure they match with the new content of the C_SAC_2501 exam.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q47-Q52):

NEW QUESTION # 47
Your story takes a long time to open. What could cause this? Note: There are 3 correct answers to this question.

- A. Complex formatting
- B. Large calculation scope
- C. Many hyperlinks
- D. Many story filters
- E. Many data sources

Answer: A,D,E

NEW QUESTION # 48
What can you use to organize dimensions into logical categories in a live model?

- A. Level-based hierarchy
- B. Groups
- C. Parent-child hierarchy
- D. Value driver tree

Answer: C

Explanation:
In a live model within SAP Analytics Cloud, dimensions can be organized into logical categories using either level-based hierarchies or parent-child hierarchies. Level-based hierarchies are used when the relationships between items are defined by distinct levels, such as Geography might be divided into Country, State, and City levels. Parent-child hierarchies, on the other hand, are useful when the data's hierarchy is not strictly defined by levels but by a parent relationship where a child member is associated with a parent member, which is common in organizational structures or product categories.

NEW QUESTION # 49
You are using a live connection for a model. Where is the data stored?

- A. Public dataset
- B. Source system
- C. Embedded data set
- D. SAP Analytics Cloud model

Answer: B

Explanation:
Connections and data preparation
When using a live connection in SAP Analytics Cloud, the data remains stored in the source system. This means that no data is imported or replicated into SAP Analytics Cloud; instead, it is accessed and analyzed in real-time directly from the source system. This approach ensures that the most current data is always used for analysis and that data governance and security policies of the source system remain in control.

SAP Analytics Cloud Data Connections - InsightCubes

In the context of SAP Analytics Cloud, when using a live connection to connect to a data source, the data remains stored in the source system. This setup means that SAP Analytics Cloud directly queries the data in its original location, without importing or copying it into the SAP Analytics Cloud environment. This approach is advantageous for several reasons, including maintaining a single source of truth, reducing data redundancy, and ensuring data is always up-to-date without the need for synchronization processes. Live connections are particularly useful for real-time or near-real-time data analysis and reporting, providing insights based on the most current data available without the overhead of data replication.

SAP Analytics Cloud documentation and user guides typically emphasize the benefits and use cases of live connections, highlighting how they maintain data in the source system to ensure real-time data access and analysis.

SAP training materials for Data Analysts using SAP Analytics Cloud, including study guides and official certification resources, explain the technical and practical aspects of live connections, including where data is stored and how it is accessed.

Best practice guides for SAP Analytics Cloud, often available through the SAP Community or SAP Knowledge Base, provide insights and recommendations on setting up and using live connections, reinforcing the concept that data stays in the source system.

NEW QUESTION # 50

You are creating a data action to copy data from one year to the next.In the parameter for the source year, which default setting must you change?

- A. Hierarchy
- B. Cardinality
- C. Granularity
- D. Level

Answer: B

NEW QUESTION # 51

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- A. Save
- B. Send
- C. Publish
- D. Nothing

Answer: C

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.
