Esri EAEP2201 Test Collection | EAEP2201 Valid Braindumps Questions

Our Esri Exam Questions greatly help Enterprise Administration Professional 2201 (EAEP2201) exam candidates in their preparation. Our Esri EAEP2201 practice questions are designed and verified by prominent and qualified Enterprise Administration Professional 2201 (EAEP2201) exam dumps preparation experts. The qualified Enterprise Administration Professional 2201 (EAEP2201) exam questions preparation experts strive hard and put all their expertise to ensure the top standard and relevancy of EAEP2201 exam dumps topics.

Esri Enterprise Administration Professional 2201 Sample Questions (Q52-Q57):

NEW QUESTION # 52
A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- B. Run usage reports in Portal for ArcGIS to determine the effect on the organization.
- C. Open ArcGIS Server statistics to create a report for commonly used items.

Answer: B

Explanation:
Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can generate and export these reports in tabular formats for further analysis.
ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.
Reference Source: ArcGIS Enterprise documentation on usage reports in Portal for ArcGIS.

NEW QUESTION # 53
An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.
Which action should the administrator perform?

- A. Use command line utilities
- B. Delete users using the Member tab
- C. Batch delete users with ArcPy

Answer: A

Explanation:
The most efficient and supported method for managing and removing multiple users after a Portal for ArcGIS upgrade is by usingcommand line utilities, specifically the deleteusers utility included with Portal for ArcGIS. This tool allows administrators to batch delete user accounts by referencing a file that lists usernames. This method is especially useful when needing to quickly reduce the number of named users to comply with licensing restrictions.
Deleting users individually via theMember tab(Option B) is time-consuming and inefficient when dealing with large numbers of accounts. UsingArcPy(Option C) is not supported for managing Portal users in bulk.

NEW QUESTION # 54
An ArcGIS analyst is curating a series of basemaps for field crews editing utility infrastructure in the field.
The analyst must ensure optimal performance.
Which type of service should be published?

- A. Vector tile service
- B. Cached map service
- C. Dynamic map service

Answer: A

Explanation:
For field operations, Vector Tile Services are highly efficient and suitable for basemaps. They offer fast rendering, smaller file sizes, and are easily scalable across various devices, including those with limited bandwidth or processing capabilities. Vector tiles also support dynamic styling and are ideal for offline use, which is often necessary for field crews working in areas with limited connectivity.
Cached map services (Option A) are raster-based and can be larger in size, making them less optimal for mobile use. Dynamic map services (Option C) require real-time data rendering, which can be resource- intensive and may not perform well in field conditions with limited connectivity.
Reference Source: ArcGIS Enterprise documentation on customizing basemaps

NEW QUESTION # 55

An organization experiences a temporary loss of service for its ArcGIS Enterprise deployment due to expired licenses.
What should the administrator have done to prevent this issue?

- A. Configure the ArcGIS Enterprise portal to send an automated email when the portal license is expiring
- B. Design an information banner to automatically display the license expiration date
- C. Use the license file in read-only mode to extend the license
- D. Create a Python script to run an administrative report and schedule the script to run regularly

Answer: D

Explanation:
ArcGIS Enterprise doesn't currently offer automated license expiration email alerts. However, administrators can use administrative scripts to query license status and generate reports that can be automated using task schedulers (e.g., Windows Task Scheduler).
From Esri guidance:
"Administrators can monitor license status using the ArcGIS REST API or scripting tools. Automating these checks allows timely action before licenses expire."
* Option A is not a native capability of the portal.
* Option C is not tied to licensing and is only useful as a passive alert.
* Option D is not a valid license management option.
Reference: ArcGIS Enterprise - Managing License Expiry and Automating Admin Reports

NEW QUESTION # 56
A GIS administrator receives reports of slow-performing services and notices that disk space is filling up after recent troubleshooting sessions.
In those sessions, the following tasks were performed:
* Services added to the shared instance pool
* Log retention settings reduced
* Log level set to Debug
* ArcGIS Server machine restarted
* An additional ArcGIS Server site federated
What is causing this slow performance?

- A. Adjusting the log level to Debug
- B. Additional services in the shared instance pool
- C. Federating the additional ArcGIS Server site
- D. Restarting ArcGIS Server

Answer: B

NEW QUESTION # 57
......

Professionals who hold EAEP2201 certification demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. To meet the growing demand for Esri EAEP2201 certification exam, preparation platforms have emerged in recent years. ITdumpsfree offers candidates actual EAEP2201 Questions Pdf, practice exams, and 24/7 support to ensure they have the best possible preparation for the exam.
