But if you buy our Google-Workspace-Administrator Study Guide you can both do your most important thing well and pass the test easily because the preparation for the test costs you little time and energy.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54
A subset of users from the finance and human resources (HR) teams need to share documents with an external vendor. However, external content sharing is prohibited for the entire finance team. What would be the most secure method to enable external sharing for this set of users?

- A. Move all users from the finance org unit to the HR org unit.
- B. Create a group with the finance and HR users who need to share externally.
- C. Enable 'Visitor Sharing' for the entire finance org unit.
- D. Download and attach the documents to a Gmail message, and send them to the external vendor.

Answer: B

Explanation:
Create a Group: In the Google Admin console, navigate to Groups and create a new group for the specific users who need to share documents externally.
Add Members: Add the necessary users from the finance and HR teams to this group.
Set Group Sharing Settings: Configure the group's sharing settings to allow external sharing while keeping the broader organizational settings intact.
Educate Users: Inform the group members about the new sharing permissions and how to securely share documents with the external vendor.
Monitor Sharing Activity: Regularly monitor the group's sharing activity to ensure compliance with organizational policies.

NEW QUESTION # 55
Your company is using Google Workspace Business Plus edition, and the security team has reported several unsuccessful attempts to sign in to your Google Workspace domain from countries where you have no local employees. The affected accounts are from several executives in the main office.
You are asked to take measures to mitigate this security risk. Although budget is not a concern, your company prefers a minimal financial outlay to fix the issue, which you are tasked with managing. Which two solutions would help you mitigate the risk at minimal cost?
Choose 2 answers

- A. Subscribe to Cloud Identity Premium for all accounts, and define Context-Aware Access levels to only a list of countries where the company has employees.
- B. Deploy 2-Step Verification for all users who have security keys.
- C. Deploy Google Cloud Armor on a dedicated project, and create a rule to allow access to Google Workspace only from specific locations.
- D. For all executives, create new accounts with random characters to match Google best practices, migrate
- E. Upgrade to Google Workspace Enterprise Plus for all accounts, and define Context-Aware Access levels to only a list of countries where the company has employees.

Answer: B,E

Explanation:
data from the former accounts, and then delete them.

NEW QUESTION # 56
Your-company.com recently bought 2500 Chrome devices and wants to distribute them to various teams globally. You decided that enterprise enrollment would be the best way to enforce company policies for managed Chrome devices. You discovered that Chrome devices currently end up in the top-level organization unit, and this needs to change to the organizational unit of the device administrator.
What should you do?

- A. Change Enrollment Controls to Place Chrome device in user organization.
- B. Change Enrollment Permissions to only allow users in this organization to re-enroll existing devices.
- C. Change Enrollment Controls to Keep Chrome device in current location.
- D. Change Enrolment Permissions to not allow users in this organization to enroll new devices.

Answer: A

Explanation:
* Change Enrollment Controls to Place Chrome device in user organization:
* To ensure that newly enrolled Chrome devices are placed in the organizational unit (OU) of the device administrator rather than the top-level OU, you need to change the enrollment settings in Google Workspace.
* In the Admin console, navigate to Devices > Chrome > Settings > Enrollment controls. Set the option to place Chrome devices in the user's organization during enrollment. This aligns the devices with the correct OU based on the enrolling user's OU.

NEW QUESTION # 57
An employee at your organization had very poor quality during a Google Meet video call from their laptop. They were at a coffee shop and not on the corporate network during the meeting.
You must troubleshoot the issue quickly and efficiently. What should you do first?

- A. Check to see if there was a Google Meet outage at the time of the meeting by using the Google Workspace Status Dashboard.
- B. Check to see if Context-Aware access rules were set to prevent Meet access from the user's network location.
- C. Search for the Meet log events during the time of the Meeting by using the security investigation tool.
- D. Check the user's participant statistics by using the Meet quality tool and entering the corresponding meeting code.

Answer: D

NEW QUESTION # 58
User A is a Basic License holder. User B is a Business License holder. These two users, along with many additional users, are in the same organizational unit at the same company. When User A attempts to access Drive, they receive the following error: "We are sorry, but you do not have access to Google Docs Editors.
Please contact your Organization Administrator for access." User B is not presented with the same error and accesses the service without issues.
How do you provide access to Drive for User A?

- A. Select User A in the Directory, and under the Licenses section, change their license from Basic to Business to add the Drive and Docs service.
- B. In Apps > Google Workspace, determine the Group that has Drive and Docs enabled as a service. Add User A to this group.
- C. In Apps > Google Workspace > Drive and Docs, select the organizational unit the users are in and enable Drive for the organizational unit.
- D. Select User A in the Directory, and under the Apps section, check whether Drive and Docs is disabled.
  If so, enable it in the User record.

Answer: A

Explanation:
* Access the Admin Console: Log into your Google Workspace Admin Console.
* Select User A: Navigate to the Directory and select User A's account.
* Check Licenses: Under the Licenses section, check the current license type of User A. As User A holds a Basic License, they lack access to certain services available to Business License holders.
* Change License: Change User A's license from Basic to Business. This can be done by assigning the Business License to User A within the Licenses section.
* Verify Access: After changing the license, verify that User A can now access Google Drive and Docs without any errors.
References
* Google Support: Assign or remove a user license

NEW QUESTION # 59
......
