Exam 1z0-1110-25 Study Solutions - Latest 1z0-1110-25 Exam Camp

Exam Code: 1Z0-1110-25
Exam Title: Oracle Cloud Infrastructure 2025 Data Science Professional

https://www.certsexpert.com

QUESTION: 1

Where do calls to stdout and stderr from score.py go in the model deployment?

Option A : The file that was defined for them on the virtual machine (VM)
Option B : The OCI Console
Option C : The OCI Cloud Shell, which can be accessed from the console
Option D :

The predict log in the Oracle Cloud Infrastructure (OCI) Logging service as defined in the deployment

Correct Answer: D

Explanation/Reference:

Detailed Answer in Step-by-Step Solution: Objective: Locate stdout/stderr output from score.py in deployment. Understand Deployment: score.py runs in a model endpoint; logs are managed by OCI. Evaluate Options: A: False-No VM file is defined by default; logs go to OCI Logging. B: False-Console displays UI, not raw logs. C: False-Cloud Shell is a separate tool, not a log destination. D: True-Predict logs in OCI Logging capture stdout/stderr. Reasoning: OCI centralizes logs in its Logging service for deployments. Conclusion: D is correct. OCI documentation states: -œDuring model deployment, stdout and stderr from score.py are automatically sent to the predict log in the OCI Logging service, as configured in the deployment settings.- A, B, and C don't align with this managed logging approach-only D is accurate. : Oracle Cloud Infrastructure Data Science Documentation, "Model Deployment - Logging".

Success is just a click away visit Now: https://www.certsexpert.com/1Z0-1110-25-pdf-questions.html

We are stable and Reliable 1z0-1110-25 Exam Questions providers for persons who need them for their exam. We have been staying and growing in the market for a long time, and we will be here all the time, because our excellent quality and high pass rate. As for the safe environment and effective product, there are thousands of candidates are willing to choose our Oracle Cloud Infrastructure 2025 Data Science Professional study question, why don't you have a try for our study materials, never let you down!

Oracle 1z0-1110-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Apply MLOps Practices: This domain targets the skills of Cloud Data Scientists and focuses on applying MLOps within the OCI ecosystem. It covers the architecture of OCI MLOps, managing custom jobs, leveraging autoscaling for deployed models, monitoring, logging, and automating ML workflows using pipelines to ensure scalable and production-ready deployments.
Topic 2	• Create and Manage Projects and Notebook Sessions: This part assesses the skills of Cloud Data Scientists and focuses on setting up and managing projects and notebook sessions within OCI Data Science. It also covers managing Conda environments, integrating OCI Vault for credentials, using Git-based repositories for source code control, and organizing your development environment to support streamlined collaboration and reproducibility.

Topic 3	• Use Related OCI Services: This final section measures the competence of Machine Learning Engineers in utilizing OCI-integrated services to enhance data science capabilities. It includes creating Spark applications through OCI Data Flow, utilizing the OCI Open Data Service, and integrating other tools to optimize data handling and model execution workflows.
Topic 4	• Implement End-to-End Machine Learning Lifecycle: This section evaluates the abilities of Machine Learning Engineers and includes an end-to-end walkthrough of the ML lifecycle within OCI. It involves data acquisition from various sources, data preparation, visualization, profiling, model building with open-source libraries, Oracle AutoML, model evaluation, interpretability with global and local explanations, and deployment using the model catalog.
Topic 5	• OCI Data Science - Introduction & Configuration: This section of the exam measures the skills of Machine Learning Engineers and covers foundational concepts of Oracle Cloud Infrastructure (OCI) Data Science. It includes an overview of the platform, its architecture, and the capabilities offered by the Accelerated Data Science (ADS) SDK. It also addresses the initial configuration of tenancy and workspace setup to begin data science operations in OCI.

One of the Best Ways to Prepare For the 1z0-1110-25 Oracle Cloud Infrastructure 2025 Data Science Professional

Our 1z0-1110-25 exam question is widely known throughout the education market. Almost all the candidates who are ready for the qualifying examination know our 1z0-1110-25 exam questions. Even when they find that their classmates or colleagues are preparing a 1z0-1110-25 exam, they will introduce our study materials to you. So, our learning materials help users to be assured of the 1z0-1110-25 Exam. Currently, my company has introduced three versions of 1z0-1110-25 learning materials, covering almost all the needs of the different customers.

Oracle Cloud Infrastructure 2025 Data Science Professional Sample Questions (Q26-Q31):

NEW QUESTION # 26
What does the Data Science Service template in Oracle Resource Manager (ORM) NOTautomatically create?

- A. Dynamic groups
- B. Required user groups
- C. Individual Data Science users
- D. Policies for a basic use case

Answer: C

Explanation:
Detailed Answer in Step-by-Step Solution:
* Understand ORM Template: It automates OCI Data Science setup with predefined configurations.
* Evaluate Components:
* A: User groups are created for role-based access-automated.
* B: Dynamic groups (e.g., for notebook sessions) are included-automated.
* C: Individual users require manual creation via IAM-not automated.
* D: Basic policies (e.g., access to Data Science resources) are included-automated.
* Reasoning: ORM focuses on infrastructure and permissions, not user accounts.
* Conclusion: C is the exception.
The OCI Resource Manager template for Data Science "automatically provisions user groups, dynamic groups, and policies for basic use cases," but "individual users must be created separately in IAM and assigned to groups." C is the only item not handled by the template, per the documentation.
Oracle Cloud Infrastructure Resource Manager Documentation, "Data Science Template".

NEW QUESTION # 27

You realize that your model deployment is about to reach its utilization limit. What would you do to avoid the issue before requests start to fail? Pick THREE.

- A. Update the deployment to add more instances
- B. Update the deployment to use fewer instances
- C. Reduce the load balancer bandwidth limit so that fewer requests come in
- D. Delete the deployment
- E. Update the deployment to use a larger virtual machine (more CPUs/memory)

Answer: A,C,E

Explanation:
Detailed Answer in Step-by-Step Solution:
* Objective: Prevent deployment failure due to high utilization.
* Evaluate Options:
* A: More instances-Scales capacity-correct.
* B: Delete-Stops service, not a solution.
* C: Fewer instances-Worsens utilization.
* D: Larger VM-Increases resource capacity-correct.
* E: Reduce bandwidth-Limits load-correct.
* Reasoning: A and D boost capacity, E controls demand-proactive fixes.
* Conclusion: A, D, E are correct.
OCI documentation advises: "To handle high utilization, increase instances (A), use a larger compute shape (D), or adjust load balancer bandwidth (E) to manage request volume." B stops service, C reduces capacity- only A, D, E prevent failure per OCI's scaling options.
Oracle Cloud Infrastructure Data Science Documentation, "Model Deployment Scaling".

NEW QUESTION # 28

You are a data scientist using Oracle AutoML to produce a model and you are evaluating the score metric for the model. Which of the following TWO prevailing metrics would you use for evaluating a multiclass classification model?

- A. Recall
- B. F1 Score
- C. R-Squared
- D. Mean squared error
- E. Explained variance score

Answer: A,B

Explanation:
Detailed Answer in Step-by-Step Solution:
* Objective: Select two metrics for multiclass classification in AutoML.
* Understand Multiclass Metrics: Focus on class-specific performance-classification, not regression.
* Evaluate Options:
* A. Recall: Measures true positives per class-key for multiclass-correct.
* B. Mean squared error: Regression metric-incorrect.
* C. F1 Score: Balances precision and recall-standard for multiclass-correct.
* D. R-Squared: Regression fit-incorrect.
* E. Explained variance: Regression metric-incorrect.
* Reasoning: A and C assess classification accuracy across multiple classes-fit AutoML's evaluation.
* Conclusion: A and C are correct.
OCI AutoML documentation states: "For multiclass classification, common evaluation metrics include recall (A) for per-class sensitivity and F1 Score (C) for balanced performance." B, D, and E are regression- focused-only A and C are supported and relevant per OCI's AutoML metrics suite.
Oracle Cloud Infrastructure AutoML Documentation, "Evaluation Metrics for Classification".

NEW QUESTION # 29

True or false? Data scientists typically need a combination of technical skills, nontechnical ones, and suitable personality traits to be successful.

- A. False
- B. True

Answer: B

Explanation:
Detailed Answer in Step-by-Step Solution:
* Objective: Assess required skills for data scientists.
* Analyze Skills:
* Technical: Coding, stats, ML.
* Nontechnical: Communication, business acumen.
* Traits: Curiosity, problem-solving.
* Reasoning: Success requires this mix-e.g., explaining models to stakeholders.
* Conclusion: A (True) is correct.
OCI documentation states: "Effective data scientists combine technical skills (e.g., Python), nontechnical skills (e.g., storytelling), and traits like analytical thinking." This holistic requirement is true (A), not false (B).
Oracle Cloud Infrastructure Data Science Documentation, "Data Scientist Skills".

NEW QUESTION # 30

Where do calls to stdout and stderr from score.py go in the model deployment?

- A. The predict log in the Oracle Cloud Infrastructure (OCI) Logging service as defined in the deployment
- B. The OCI Console
- C. The OCI Cloud Shell, which can be accessed from the console
- D. The file that was defined for them on the virtual machine (VM)

Answer: A

Explanation:
Detailed Answer in Step-by-Step Solution:
* Objective: Locate stdout/stderr output from score.py in deployment.
* Understand Deployment: score.py runs in a model endpoint; logs are managed by OCI.
* Evaluate Options:
* A: False-No VM file is defined by default; logs go to OCI Logging.
* B: False-Console displays UI, not raw logs.
* C: False-Cloud Shell is a separate tool, not a log destination.
* D: True-Predict logs in OCI Logging capture stdout/stderr.
* Reasoning: OCI centralizes logs in its Logging service for deployments.
* Conclusion: D is correct.
OCI documentation states: "During model deployment, stdout and stderr from score.py are automatically sent to the predict log in the OCI Logging service, as configured in the deployment settings." A, B, and C don't align with this managed logging approach-only D is accurate.
Oracle Cloud Infrastructure Data Science Documentation, "Model Deployment - Logging".

NEW QUESTION # 31

......

Our desktop Oracle Cloud Infrastructure 2025 Data Science Professional (1z0-1110-25) practice exam software allows you to see your progress report at the end of each attempt. In this way, you find your mistakes and overcome them before the final take. Our desktop software is customizable so you can change the duration and Oracle questions of 1z0-1110-25 Practice Tests according to your learning requirements. Since this software requires installation on Windows computers, you can take the Oracle Cloud Infrastructure 2025 Data Science Professional (1z0-1110-25) practice exam offline.
