VMware vSphere 8.x Advanced Design - 3V0-21.23 Free Exam Questions

QUESTION NO: 1  
An architect is designing a solution based on the following information:  
- Each ESX host has a single physical NIC with two 10 Gbps ports.  
- There is a performance-based service-level agreement (SLA) that guarantees 15 Gbps bandwidth for production virtual machines at all times.  
- There is no budget to purchase additional hardware.  
- The hardware replacement SLA is based on a delivery agreement of two business days.  
Which recommendation for the configuration of vSphere High Availability (HA) should the architect include in the design?

☒ A. Configure vSphere HA Set das.ignoreRedundantNetWarning to true Consider an OEM with NIC failure conditions in their Proactive HA plugin  
☐ B. Configure Proactive HA Automation Level: Automated Remediation: Maintenance mode for all failures Consider an OEM with NIC failure conditions in their Proactive HA plugin  
☐ C. Configure vSphere HA Configure two existing data stores for heartbeat Consider an OEM with NIC failure conditions in their Proactive HA plugin  
☐ D. Configure vSphere HA Configure % based admission control Configure two isolation addresses Consider an OEM with NIC failure conditions in their Proactive HA plugin

[Hide answer/explanation](#) [Discussion](#)

Correct Answer: B [Vote an answer](#)

QUESTION NO: 2  
A VMware Service Provider is tasked with delivering a solution for continuous availability for a subset of Tier 1 virtual machines (VMs) and vApps running in their vSAN environment. The VMs make up a mission-critical application and there can be no data loss in the event of an outage at their primary data center. In the event of a regional outage, they have established a 10-minute recovery point objective (RPO). Failover/failback to the third site must be automated. They have the following in place:  
- Two local data centers (primary and secondary) connected with 100 Gb dedicated fiber  
- 2ms round-trip time (RTT) latency between the sites  
- A third data center located on another power grid  
- 70ms latency between the primary and secondary data centers  
- Matching storage arrays at all locations.  
Which two solutions could be used to meet the requirements? (Choose two.)

☐ A. Snapshots  
☐ B. vSphere Data Protection  
☐ C. Site Recovery Manager  
☐ D. vStorage APIs for Array Integration (VAAI)  
☐ E. vSAN Metro Cluster

Our 3V0-23.25 study prep has inspired millions of exam candidates to pursue their dreams and motivated them to learn more high-efficiently. Many customers get manifest improvement. 3V0-23.25 simulating exam will inspire your potential. And you will be more successful with the help of our 3V0-23.25 training guide. Just imagine that when you have the certification, you will have a lot of opportunities to come to the bigger companies and get a higher salary.

This is a VMware 3V0-23.25 practice exam software for Windows computers. This 3V0-23.25 practice test will be similar to the actual 3V0-23.25 exam. If user wish to test the Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) study material before joining Test4Engine, they may do so with a free sample trial. This 3V0-23.25 Exam simulation software can be readily installed on Windows-based computers and laptops. Since it is desktop-based 3V0-23.25 practice exam software, it is not necessary to connect to the internet to use it.

>> 3V0-23.25 Training Online <<

## Valid 3V0-23.25 Guide Exam - 3V0-23.25 Actual Questions & 3V0-23.25 Exam Torrent

Practice is one of the essential factors in passing the exam. To perform at their best on the real exam, candidates must use VMware 3V0-23.25 practice test material. To this end, 3V0-23.25 has developed three formats to help candidates prepare for their 3V0-23.25 exam: desktop-based practice test software, web-based practice test, and a PDF format.

## VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q30-Q35):

### NEW QUESTION # 30

A VCF Deployment Specialist is explaining the I/O path of a write operation in a new vSAN ESA cluster to a junior administrator.

...

[Architecture Diagram Concept]

VM (Guest OS) -> vSCSI -> [ ? ] -> Network -> [ ? ] -> Physical NVMe Drive

...

The specialist must fill in the missing architectural components to show how a write propagates from the compute layer to the storage layer.

Which combination correctly completes the I/O path for a write operation originating on Host A but destined for a replica on Host B?

- A. DOM Owner (Host A) -> Network -> LSOM (Host B) -> DOM Client (Host B)
- **B. DOM Client (Host A) -> Network -> DOM Owner (Host B) -> LSOM (Host B)**
- C. LSOM (Host A) -> Network -> CLOM (Host B) -> DOM Owner (Host B)
- D. CLOM (Host A) -> Network -> DOM Client (Host B) -> LSOM (Host B)

**Answer: B**

### NEW QUESTION # 31

A VI Admin is configuring the Automation Level for a new Storage DRS Datastore Cluster backing a critical SAP HANA environment on Fibre Channel storage. The DBAs strictly forbid any automated operations that could disrupt database memory paging.

...

# Datastore Cluster Spec

```
"sdrsConfig": {  
  "automationLevel": "fullyAutomated",  
  "spaceThreshold": 80,  
  "ioLatencyThreshold": 15,  
  "ruleSet": [  
    "intraVmAntiAffinity"  
  ]  
}
```

...

Based on the DBAs' constraints, which configuration change MUST the VI Admin make to the JSON specification?

- **A. Change automationLevel to "manual" so that Storage DRS only generates recommendations but executes no migrations without administrator approval.**
- B. Remove the intraVmAntiAffinity rule, as it forces the database VMDKs to split across different LUNs, degrading VAAI performance.
- C. Modify ioLatencyThreshold to 30 to prevent sensitivity to normal database load spikes.
- D. Add an interVmAffinity rule to ensure all SAP HANA VMs remain on the same physical datastore.

**Answer: A**

### NEW QUESTION # 32

An Infrastructure Manager is analyzing the performance of a newly deployed vSAN ESA cluster using the vSAN Performance Service. The team has deployed highly transactional databases.

...

[vSAN Performance View]

Component I/O Breakdown

DOM Client IOPS: 50,000

DOM Owner IOPS: 50,000

LSOM IOPS: 12,000

NVMe Device IOPS: 12,000

...

The manager notices a massive discrepancy: The DOM layers are processing 50,000 IOPS, but the LSOM and physical NVMe devices are only processing 12,000 IOPS.

Which of the following architectural capabilities of the vSAN ESA log-structured filesystem explain this specific discrepancy? (Select all that apply.)

- A. The discrepancy indicates a critical caching failure where 38,000 IOPS are being dropped by the DOM network layer before reaching the destination host.
- B. The ESA architecture eliminates read-modify-write penalties for RAID-5/6, allowing the LSOM to write data natively without the traditional backend I/O amplification seen in OSA.
- C. The DOM Client uses the host CPU to compress 4KB blocks into 1KB blocks, meaning the LSOM receives fewer physical bytes to write, though the IOPS count typically reflects distinct operations rather than byte count.
- D. The LSOM utilizes a high-performance log-structured mechanism that coalesces (groups) thousands of small random DOM I/O requests into a single large, sequential I/O write to the NVMe device.

**Answer: B,C,D**

### NEW QUESTION # 33

An Operations Engineer is evaluating a VCF architecture that combines vSAN HCI Mesh with a multi- site network topology.

...

[Configuration Context]

\* Cluster-A (Server) is in Data Center 1.

\* Cluster-B (Client) is in Data Center 2.

\* The inter-datacenter link is 10 Gbps with 5ms RTT.

...

The engineer intends to mount Cluster-A's vSAN datastore to Cluster-B to run low-priority archive VMs.

What are the critical architectural limitations and trade-offs that the engineer must accept in this specific cross-site HCI Mesh design? (Select all that apply.)

- A. If the inter-datacenter link fails, the VMs running on Cluster-B will immediately experience an APD (All Paths Down) condition and freeze.
- B. HCI Mesh generates substantial synchronous I/O across the network; a 5ms RTT link will significantly increase the frontend latency for VMs running on Cluster-B.
- C. Enabling vSAN Data-in-Transit Encryption will further exacerbate the CPU overhead and latency on the 5ms RTT inter-datacenter link.
- D. The 10 Gbps link violates the minimum 25 Gbps requirement for vSAN ESA, meaning Cluster-A must be configured as vSAN OSA to support this topology.
- E. VCF explicitly prohibits mounting remote vSAN datastores across different vCenter Server instances (Cross-vCenter HCI Mesh is unsupported).

**Answer: A,B,C**

### NEW QUESTION # 34

What is the purpose of vSAN deduplication and compression?

- A. Improve CPU performance
- B. Reduce storage consumption
- C. Increase network bandwidth
- D. Improve VM boot speed

**Answer: B**

### NEW QUESTION # 35

.....

We will provide you with three different versions of our 3V0-23.25 exam questions. The PDF version allows you to download our 3V0-23.25 quiz prep. After you download the PDF version of our learning material, you can print it out. In this way, you can learn our 3V0-23.25 quiz prep on paper. We believe that it will be more convenient for you to take notes. Our website is a very safe and

regular platform. You can download our 3V0-23.25 Exam Guide with assurance. You can take full advantage of the fragmented time to learn, and eventually pass the authorization of 3V0-23.25 exam.

**3V0-23.25 Study Group:** [https://www.test4engine.com/3V0-23.25\\_exam-latest-braindumps.html](https://www.test4engine.com/3V0-23.25_exam-latest-braindumps.html)

VMware 3V0-23.25 Training Online Our users just need to study the Q&As we provide carefully, then could pass the exam by yourself, You just need to use your spare time to practice the 3V0-23.25 study questions and remember the main key points of the actual test skillfully, VMware 3V0-23.25 Training Online Our price is relatively cheap among our peer and we offer some discounts from time to time, The answers of 3V0-23.25 passleader training material are accurate, and the explanations are along with answers where is necessary.

Our 3V0-23.25 - Advanced VMware Cloud Foundation 9.0 Storage Latest Real Test Questions practice engine with passing rate up to 98 percent can build a surely system to elude any kind of loss of you and help you harvest success effortlessly.

## **Pass Guaranteed Quiz 2026 VMware High Pass-Rate 3V0-23.25: Advanced VMware Cloud Foundation 9.0 Storage Training Online**

Proven Techniques for Leading Virtual Projects, Our Exam 3V0-23.25 Study Guide users just need to study the Q&As we provide carefully, then could pass the exam by yourself, You just need to use your spare time to practice the 3V0-23.25 study questions and remember the main key points of the actual test skillfully.

Our price is relatively cheap among our peer and we offer some discounts from time to time, The answers of 3V0-23.25 passleader training material are accurate, and the explanations are along with answers where is necessary.

As we all know, to make something right, 3V0-23.25 the most important thing is that you have to find the right tool.
