

Testking FAAA_005 Exam Questions | Study FAAA_005 Test

id=1jxAZJ8u0KyYwpIPgW-7JMNmTcP1Kw5WW

You only need 20-30 hours to learn our FAAA_005 Test Braindumps and then you can attend the exam and you have a very high possibility to pass the exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our FAAA_005 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Pure Storage FlashArray Architect Associate exam torrent. Owing to the superior quality and reasonable price of our exam materials, our exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in many respects.

To keep with the fast-pace social life, we provide the fastest delivery services on our FAAA_005 exam questions. As most of the people tend to use express delivery to save time, our FAAA_005 preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant FAAA_005 Exam Materials to your mailbox within the given time. Our company attaches great importance to overall services, if there is any problem about the delivery of FAAA_005 exam materials, please let us know, a message or an email will be available.

>> Testking FAAA_005 Exam Questions <<

100% Pass Quiz 2026 FAAA_005: Professional Testking Pure Storage FlashArray Architect Associate Exam Questions

As we all know, it is difficult for you to prepare a Pure Storage FAAA_005 exam by yourself. You will feel confused about some difficult knowledge. Now, you are fortunate enough to purchase our FAAA_005 study questions. Our study materials are compiled by professional experts. They have researched the annual real Pure Storage FAAA_005 exam for many years.

Pure Storage FlashArray Architect Associate Sample Questions (Q41-Q46):

NEW QUESTION # 41

A customer needs to be able to replicate from on-prem into the public cloud. They want to use the cloud as their DR site with failover and fallback capabilities.

Which Pure Storage feature should the customer use?

- A. Snapshot replication to replicate between a FlashArray on site and Cloud Block Store
- B. ActiveCluster FC replication between a FlashArray on site and Evergreen//One
- C. Purity//FA CloudSnap periodic offload of snapshots to AWS

Answer: A

Explanation:

The customer requires a disaster recovery (DR) solution that allows them to replicate data from their on-premises environment to the public cloud. They also need failover and fallback capabilities, meaning they must be able to switch operations to the cloud during a disaster and revert back to on-premises once the issue is resolved.

Snapshot replication between a FlashArray on-premises and Cloud Block Store (CBS) is the best solution for this use case. CBS integrates seamlessly with on-premises FlashArrays, enabling efficient replication of snapshots to the cloud. This feature supports failover and fallback operations, ensuring business continuity in the event of a disaster.

Why Not the Other Options?

B). Purity//FA CloudSnap periodic offload of snapshots to AWS: While CloudSnap allows periodic offloading of snapshots to AWS S3 for backup purposes, it does not provide the real-time replication and failover/fallback capabilities required for DR.

C). ActiveCluster FC replication between a FlashArray on site and Evergreen//One: ActiveCluster is designed for synchronous replication between two FlashArrays in different locations, but it does not support replication to the public cloud.

Key Points:

Snapshot Replication: Enables efficient and reliable replication of data between on-premises FlashArrays and Cloud Block Store.

Failover and Fallback: CBS supports these capabilities, ensuring minimal downtime during a disaster.

Integration with FlashArray: CBS is specifically designed to work with FlashArray, providing a seamless DR solution.

Reference: Pure Storage Cloud Block Store Documentation: "Disaster Recovery with Cloud Block Store" Pure Storage Best Practices Guide: "Replication and Failover in Hybrid Cloud Environments" Pure Storage Whitepaper: "Hybrid Cloud Architectures with FlashArray and Cloud Block Store"

NEW QUESTION # 42

The customer asks if the FlashArray is suitable for a cloud-native application that utilizes containers and Kubernetes. Which response addresses this question?

- A. This is supported via an installable CSI provider specifically for the FlashArray.
- **B. This is supported via Pure's Portworx offering.**
- C. This is not supported with FlashArray and this application data will need to be stored on a different array.
- D. This is supported and Pure uses a software layer that is only compatible with DAS storage in Kubernetes.

Answer: B

Explanation:

The FlashArray is suitable for cloud-native applications that utilize containers and Kubernetes, but the best way to address this use case is through Pure Storage's Portworx offering.

Why This Matters:

Portworx:

Portworx is a container storage and data management platform specifically designed for Kubernetes and cloud-native applications. It integrates seamlessly with FlashArray to provide persistent storage, data protection, and advanced features like snapshots, replication, and disaster recovery for containerized workloads.

Portworx ensures high performance, scalability, and reliability for stateful applications running in Kubernetes environments.

Why Not the Other Options?

A). This is not supported with FlashArray and this application data will need to be stored on a different array:

This statement is incorrect. FlashArray is fully capable of supporting cloud-native applications when paired with the right tools, such as Portworx.

B). This is supported via an installable CSI provider specifically for the FlashArray:

While FlashArray does support a Container Storage Interface (CSI) driver, it is a basic integration and does not provide the advanced features and capabilities offered by Portworx for Kubernetes environments.

D). This is supported and Pure uses a software layer that is only compatible with DAS storage in Kubernetes:

This statement is incorrect. Pure Storage solutions are compatible with both direct-attached storage (DAS) and external storage arrays like FlashArray.

Key Points:

Portworx: The recommended solution for integrating FlashArray with Kubernetes and containerized applications.

Advanced Features: Provides persistent storage, data protection, and scalability for cloud-native workloads.

Integration: Ensures seamless compatibility between FlashArray and Kubernetes environments.

Reference: Pure Storage Portworx Documentation: "Integrating Portworx with FlashArray" Pure Storage Whitepaper: "Cloud-Native Storage Solutions with Portworx" Pure Storage Knowledge Base: "Best Practices for Kubernetes and FlashArray Integration"

NEW QUESTION # 43

A customer wants to add capacity to support a new Oracle workload. It has been determined that the application needs 398 TB of thick-provisioned storage from the host. The customer wants to purchase the minimum storage capacity to handle this workload. How much capacity should the SE propose, assuming DRR is 3:1?

- A. 21 TB
- **B. 132 TB**
- C. 186 TB
- D. 62 TB

Answer: B

Explanation:

To calculate the minimum storage capacity required to handle the Oracle workload, we need to account for the thick-provisioned storage requirement and the expected data reduction ratio (DRR).

Step-by-Step Calculation:

Logical Storage Requirement:

The application requires 398 TB of thick-provisioned storage from the host.

Data Reduction Ratio (DRR):

The DRR is 3:1, meaning the physical storage required is:

Recommendation:

The SE should propose 132 TB of physical storage, as it meets the requirement after accounting for data reduction.

Final Recommendation:

The correct answer is

A). 132 TB.

Pure Storage Capacity Planning

Provides guidance on calculating usable capacity based on data reduction ratios.

Thick vs. Thin Provisioning:

Provisioning Best Practices

Explains the differences between thick and thin provisioning.

NEW QUESTION # 44

What metric is used to compute billing when customers leverage the Evergreen//One offering?

- A. Effective capacity consumed
- B. Total capacity installed
- C. Raw capacity consumed
- D. Capacity provisioned to hosts

Answer: A

Explanation:

When customers leverage the Evergreen//One offering, billing is based on the effective capacity consumed.

Why This Matters:

Effective Capacity Consumed:

Evergreen//One is a subscription-based model where customers pay for the logical capacity they consume after applying data reduction techniques like deduplication, compression, and pattern removal.

This ensures customers only pay for the actual usable capacity they need, aligning with Pure Storage's commitment to delivering predictable and cost-effective storage solutions.

Why Not the Other Options?

A). Total capacity installed:

Billing is not based on the total raw capacity installed in the array, as this does not reflect the actual usable capacity after data reduction.

B). Raw capacity consumed:

Raw capacity refers to the physical storage used before applying data reduction. Evergreen//One focuses on effective capacity, not raw capacity.

D). Capacity provisioned to hosts:

Provisioned capacity refers to the logical space allocated to hosts, which may include unused or overprovisioned space. Billing is based on the actual consumed capacity.

Key Points:

Effective Capacity: Reflects the logical capacity consumed after data reduction.

Subscription Model: Aligns with Evergreen//One's focus on predictable and flexible billing.

Data Reduction: Deduplication, compression, and pattern removal optimize storage efficiency, reducing costs for customers.

Reference: Pure Storage Evergreen//One Documentation: "Understanding Billing Metrics" Pure Storage Whitepaper: "Maximizing Value with Evergreen Subscriptions" Pure Storage Knowledge Base: "How Evergreen//One Billing Works"

NEW QUESTION # 45

An admin is setting up replication and has set up a Protection Group.

What are the three choices when adding Members? (Select three.)

- A. AddHBAAWN
- B. Add Snapshots
- C. Add Hosts
- D. Add Volumes
- E. Add Host Groups

Answer: B,D,E

Explanation:

When setting up replication on a Pure Storage FlashArray, an admin creates a Protection Group to define which entities will be replicated to a remote FlashArray. When adding members to a Protection Group, there are three valid choices: Volumes,

Snapshots, and Host Groups. Here's a breakdown of each option:

Choices for Adding Members:

Add Volumes:

Volumes are the primary entities that can be added to a Protection Group. Replication ensures that the data within these volumes is copied to the remote FlashArray.

This is the most common use case for replication, especially for protecting critical data such as databases or virtual machine disks.

Add Snapshots:

Snapshots of volumes can also be added to a Protection Group. This allows point-in-time copies of the data to be replicated to the remote array.

Snapshots are useful for disaster recovery scenarios where you need to restore data to a specific point in time.

Add Host Groups:

Host Groups can be added to a Protection Group to replicate all volumes associated with the host group. This simplifies management when multiple volumes are tied to a single application or server.

Replicating Host Groups ensures that all related volumes are protected together, maintaining consistency across the workload.

Incorrect Options:

A). Add Hosts:

Hosts themselves cannot be directly added to a Protection Group. Instead, replication focuses on the data (volumes) or logical groupings (host groups) associated with the hosts.

E). Add HBA WWN:

HBA WWNs (World Wide Names) are identifiers for Fibre Channel adapters and are not relevant to replication or Protection Groups. They are used for zoning and connectivity but do not play a role in defining replication members.

Final Recommendation:

The correct options are

B). Add Volumes ,

C). Add Snapshots, and

D). Add Host Groups, as these are the valid entities that can be added to a Protection Group for replication.

Reference: Pure Storage Protection Groups Documentation:

Pure Storage Protection Groups

Provides detailed guidance on creating and managing Protection Groups.

NEW QUESTION # 46

.....

Perhaps you have wasted a lot of time to playing games. It doesn't matter. It is never too late to change. There is no point in regretting for the past. Our FAAA_005 exam materials can help you get the your desired FAAA_005 certification. You will change a lot after learning our FAAA_005 Study Materials. Also, you will have a positive outlook on life. All in all, abandon all illusions and face up to reality bravely. Our FAAA_005 practice exam will be your best assistant. You are the best and unique in the world. Just be confident to face new challenge!

Study FAAA_005 Test: https://www.getcertkey.com/FAAA_005_braindumps.html

During the process of using our FAAA_005 study materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your FAAA_005 practice time, which will make you feel the actual FAAA_005 exam environment and build up confidence, Pure Storage Testking FAAA_005 Exam Questions We are never behind any latest technology, We offer three versions of FAAA_005 practice pdf for you and help you give scope to your initiative according to your taste and preference.

Understanding Custom Profiles, Events with overlapping times can be scheduled, provided that both events do not include the same family member, During the process of using our FAAA_005 Study Materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your FAAA_005 practice time, which will make you feel the actual FAAA_005 exam environment and build up confidence.

Pure Storage FAAA_005 DUMPS - PERFECT CHOICE FOR FAST PREPARATION

We are never behind any latest technology, We offer three versions of FAAA_005 practice pdf for you and help you give scope to your initiative according to your taste and preference.

Our FAAA_005 training braindumps are famous for its wonderful advantages, Experts of the FAAA_005 reliable training vce will have a check at the question pool every day to see whether it has been renewed.
