Real 156-836 Exam - High Pass-Rate CheckPoint Check Point Certified Maestro Expert - R81 (CCME) - Free 156-836 Practice Exams

We have professional technicians examine the website every day, therefore if you buy 156-836 exam cram from us, you can enjoy a clean and safe online shopping environment. What's more, we offer you free demo to have a try before buying 156-836 exam torrent, you can know what the complete version is like through free demo. 156-836 Exam Materials cover most of knowledge points for the exam, and you can improve your ability in the process of learning as well as pass the exam successfully if you choose us. We offer you free update for 365 days for 156-836 exam materials after purchasing.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q73-Q78):

NEW QUESTION # 73
What type of license is required for an MHO?

- A. The MHO requires a NGTP license.
- B. The MHO requires a VSX license.
- C. A license is needed for each attached SGM.
- D. The MHO does not require a license.

Answer: D

Explanation:
Explanation
The MHO (Maestro Hyperscale Orchestrator) does not require a license by itself, but each SGM (Security Group Module) that is attached to the MHO needs a license. The license type depends on the features and blades that are enabled on the SGM. For example, if the SGM is running VSX, it needs a VSX license.

NEW QUESTION # 74
What command will be used for updating fwkern.conf file on all Appliances within Security Group?

- A. vi
- B. g_update_kernel
- C. g_update_conf_file
- D. g_all update_conf_file

Answer: C

NEW QUESTION # 75
Logs without a dedicated log file can be found in

- A. /var/log/junk.log.dbg
- B. /var/log/messages
- C. $RTDIR/log/junk.log
- D. $FWDIR/log/fw.log

Answer: B

Explanation:
Explanation
The /var/log/messages file is a general system log file that contains information about various system events, such as booting, shutdown, cron jobs, kernel messages, and other system services. Logs without a dedicated log file can be found in this file, as well as some Maestro Gaia Clishcommands that are not saved in the
/var/log/command_logger.log file.

NEW QUESTION # 76
When working with Maestro, what is the difference between using Clish and gClish?

- A. Clish commands apply only to a specific SG member. gClish commands apply to all UP SG members, by default.
- B. Clish commands are run on the SG members. gClish commands are run on the MHO and applied to all connected SG members in a specified group.
- C. Clish commands are for testing purposes only and cannot be saved, gClish commands apply to all SG members, by default.
- D. Clish commands apply to all UP SG members, by default. gClish commands apply to all SG members, by default.

Answer: A

Explanation:
Explanation
This is the correct answer because it describes the difference between using Clish and gClish when working with Maestro. Clish is the Check Point command line shell that allows users to configure and manage the SG members individually. gClish is the global Clish that allows users to run commands on all UP SG members of the current Security Group at once. UP SG members are theones that are in the UP state and have the same policy installed as the SMO Master.

NEW QUESTION # 77

What is the Correction Layer mechanism?

- A. Enforces the access policy on the SGMs and synchronizes the enforcement verdict to other SGMs in the SG.
- B. Ensures asymmetric traffic is handled properly, especially in the case of NAT or VPNs.
- C. The MHO's distribution algorithm which determines the handling SGM for a given connection.
- D. The load-balancing mechanism used by the MHO.

Answer: B

Explanation:
Explanation
The Correction Layer mechanism is a Maestro component that ensures that packets from the same connection are handled by the same Security Group Module (SGM) in a multi-appliance system. This is especially important when NAT or VPNs are involved, as packets sent from the client to the server can be distributed to a different SGM than packets from the same session sent from the server to the client. The Correction Layer must then forward the packet to the correct SGM.
