GH-900 Exam Paper Pdf & GH-900 Free Braindumps

There is nothing more important than finding the best-quality GH-900 practice questions for your exam preparation that will appear in the GH-900 actual test. To help our candidate solve the difficulty of GH-900 real exam, we prepared the most reliable questions and answers for the exam preparation, which comes in three versions. Our aim is help our candidates realize their ability by practicing our GH-900 Exam Questions and pass exam easily.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	- Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI - CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.
Topic 2	- Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI - CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.
Topic 3	Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.
Topic 4	Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 5	Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.

Microsoft GH-900 Free Braindumps - GH-900 Latest Exam Pattern

This kind of learning method is very convenient for the user, especially in the time of our fast pace to get Microsoft certification. In addition, our test data is completely free of user's computer memory, will only consume a small amount of running memory when the user is using our product. At the same time, as long as the user ensures that the network is stable when using our GH-900 Training Materials, all the operations of the learning material of can be applied perfectly.

Microsoft GitHub Foundations Sample Questions (Q22-Q27):

NEW QUESTION # 22
Which of the following best describes cloning a repository?

- A. It retrieves code updates from the remote repository.
- B. It creates a copy of the repository on your local machine.
- C. It imports your source code into a new repository.
- D. It creates a copy of the repository on GitHub.com.

Answer: B

Explanation:
Cloning a repository in GitHub refers to creating a copy of the repository on your local machine. This allows you to work on the project offline, make changes, and later push those changes back to the remote repository. It does not involve creating a copy on GitHub.com (which would be forking), retrieving updates (which would be pulling), or importing source code into a new repository (which is done differently).

NEW QUESTION # 23
What qualifier finds issues that mention a certain user?

- A. Smentioned:
- B. mentions:
- C. mentioned:
- D. threads:

Answer: B

Explanation:
The qualifier mentions: is used in GitHub's search functionality to find issues that mention a certain user. For example, if you want to find all issues where a specific user is mentioned, you would use mentions:username. This helps in tracking where a user has been involved in discussions across issues or pull requests.

NEW QUESTION # 24
Which of the following steps are part of the Codespaces lifecycle?
(Each answer presents a complete solution. Choose three.)

- A. Rebuild
- B. Commit
- C. Create
- D. Install
- E. Rollback
- F. Clone
- G. Delete

Answer: A,C,G

Explanation:
The Codespaces lifecycle on GitHub includes several key steps:
Create: This is the step where a new Codespace is initiated.
Rebuild: A Codespace can be rebuilt to ensure that the environment is up-to-date with the latest code or configurations.
Delete: Once a Codespace is no longer needed, it can be deleted to free up resources.
Committing, cloning, or installing are typical Git operations but are not considered part of the specific lifecycle steps for a GitHub Codespace.

NEW QUESTION # 25
Which of the following can be performed within GitHub Desktop?

- A. Integrating with office suite software
- B. Adding and cloning repositories
- C. Commenting on discussions
- D. Reviewing and approving pull requests
- E. Creating and managing issues

Answer: B

Explanation:
GitHub Desktop is a graphical interface that allows users to interact with GitHub repositories. It simplifies certain Git operations without the need for command-line usage.
GitHub Desktop Capabilities:
Option C is correct because GitHub Desktop allows users to add local repositories to their GitHub account, clone repositories from GitHub to their local machine, and manage repositories effectively.
Incorrect Options:
Option A is incorrect because GitHub Desktop does not support creating or managing issues directly; this is done through the GitHub web interface.
Option B is incorrect because reviewing and approving pull requests is also managed through the GitHub web interface.
Option D is incorrect because commenting on discussions is done on the GitHub platform, not through GitHub Desktop.
Option E is incorrect because GitHub Desktop does not integrate with office suite software.

NEW QUESTION # 26
Which of the following is a primary goal of GitHub's community?

- A. Creating a competitive environment for developers
- B. Facilitating collaboration and creativity
- C. Exclusively supporting experienced developers
- D. Enforcing strict code quality standards

Answer: B

Explanation:
GitHub's community is centered around enabling developers to collaborate and innovate together. The platform provides tools and environments that foster open communication, sharing of ideas, and collective problem-solving.
Facilitating Collaboration and Creativity:
Option C is correct because GitHub is designed to be a collaborative platform where developers can work together on projects, share code, and contribute to open source initiatives, all in an environment that encourages creativity.
Incorrect Options:
Option A is incorrect because GitHub is inclusive of developers of all skill levels, not just experienced ones.
Option B is incorrect because GitHub is not about creating a competitive environment; rather, it focuses on collaboration.
Option D is incorrect because while code quality is important, enforcing strict code quality standards is not the primary goal of the GitHub community.
